the first comprehensive history of the cultural impact of the phoenicians who knit together the ancient mediterranean world long before the rise of the greeks imagine you are a traveler sailing to the major cities around the mediterranean in 750 bc you would notice a remarkable similarity in the dress alphabet consumer goods and gods from gibraltar to tyre this was not the greek world nit was the phoenician based in tyre sidon byblos and other cities along the coast of present day lebanon the phoenicians spread out across the mediterranean building posts towns and ports propelled by technological advancements of a kind unseen since the neolithic revolution phoenicians knit together diverse mediterranean societies fostering a literate and sophisticated urban elite sharing common cultural economic and aesthetic modes the phoenician imprint on the mediterranean lasted nearly a thousand years beginning in the early iron age following the trail of the phoenicians from the levant to the atlantic coast of iberia carolina l pez ruiz offers the first comprehensive study of the cultural exchange that transformed the mediterranean in the eighth and seventh centuries bc greeks etruscans sardinians iberians and others adopted a levantine inflected way of life as they aspired to emulate near eastern civilizations l pez ruiz explores these many inheritances from sphinxes and hieratic statues to ivories metalwork volute capitals inscriptions and ashtart iconography meticulously documented and boldly argued phoenicians and the making of the mediterranean revises the hellenocentric model of the ancient world and restores from obscurity the true role of near eastern societies in the history of early civilizations the european research advisory board was established in 2001 to advise the commission on the design and implementation of community rtd policy its members included some of europe s best known scientists and industrialists during 2001 2007 eurab produced a series of recommendations on various topics which are presented in this publication publisher description this volume and its companion volume lnai 4441 constitute a state of the art survey in the field of speaker classification together they address such intriguing issues as how speaker characteristics are manifested in voice and speaking behavior the nineteen contributions in this volume are organized into topical sections covering fundamentals characteristics applications methods and evaluation this book constitutes the refereed proceedings of the 22nd annual ifip wg 11 3 working conference on data and applications security held in london uk in july 2008 the 22 revised full papers presented together with 1 keynote lecture and 1 invited talk were carefully reviewed and selected from 56 submissions the papers are organized in topical sections on access control audit and logging privacy systems security certificate management trusted computing platforms security policies and metrics as well as and pervasive systems the four volume set comprising lncs volumes 5302 5303 5304 5305 constitutes the refereed proceedings of the 10th european conference on computer vision eccv 2008 held in marseille france in october 2008 the 243 revised papers presented were carefully reviewed and selected from a total of 871 papers submitted the four books cover the entire range of current issues in computer vision the papers are organized in topical sections on recognition stereo people and face recognition object tracking matching learning and features mrfs segmentation computational photography and active reconstruction the incursion of information and communication technologies ict in health care entails evident benefits at the levels of security and efficiency that improve not only the quality of life of the patients but also the quality of the work of the health care professionals and the costs of national health care systems leaving research approaches aside the analysis of ict in health care shows an evolution from the initial interest in representing and storing health care data i e electronic health care records to the current interest of having remote access to electronic health care systems as for example hl7 initiatives or telemedicine this sometimes imperceptible evolution can be interpreted as a new step of the progress path of health care informatics whose next emerging milestone is the convergence of current solutions with formal methods for health care knowledge management in this sense k4care is a european project aiming at contributing to this progress path it is centered on the idea that health care knowledge represented in a formal way may favor the treatment of home care patients in modern societies the project highlights several aspects that are considered relevant to the evolution of medical informatics health care knowledge production health care knowledge integration update and adaptation and health care intelligent systems provides a single record of technologies and practices of the semantic approach to the management organization interpretation retrieval and use of based data julie blyfield is one of australia s leading contemporary jewellers her work has consistently kept pace with investigations of location identity and cross cultural understanding and involves an innovative engagement with traditional jewellery and metalwork techniques sourced from all over the world the united nations documents index covers documents and publications issued by united nations offices worldwide the publication indexes a wide variety of documentation such as major reports and studies including documents of restricted distribution the information in this publication is arranged in the following nine sections documents and publications official records sales publications united nations maps included in un documents united nations sheet maps united nations document series symbols author index title index and subject index the united nations documents index covers documents and publications issued by the united nations offices worldwide the publication indexes a wide variety of documentation such as major reports and studies

resolutions and decisions draft resolutions and meeting records including documents of restricted distribution the information in this publication is arranged in the following nine sections documents and publications official records sales publications united nations maps included in un documents united nations sheet maps united nations document series symbols author index title index and subject index this book constitutes the refereed proceedings of hci and usability for e inclusion held as the 5th symposium of the workgroup human computer interaction and usability engineering of the austrian computer society usab 2009 in linz austria in november 2009 the 12 revised full papers and 26 revised short papers presented were carefully reviewed and selected from 60 submissions the papers are organized in topical sections on gender and cognitive performance usefulness usability accessibility emotion confidence and elderly usability testing evaluation measurement education learning and e inclusion design for adaptive content processing grounded theory activity theory and situated action smart home health and ambient assistent living user centred design and usability practice interaction assistive technologies and virtual environments communication interfaces and haptic technology as well as new technologies and challenges for people with disabilities this book constitutes the refereed proceedings of the 6th international xml database symposium xsym 2009 held in lyon france in august 2009 in conjunction with the international conference on very large data bases vldb 2009 the 8 revised full papers together with 7 short paper were carefully reviewed and selected from 26 submissions covering all current aspects of core database technology for xml data management xml and data integration and development and deployment of xml applications the papers are organized in topical sections on xml twig queries query execution xml document parsing and compression xquery and xml transaction management and schema design this book includes papers from the twentieth jurix conference first organized in 1988 over the years jurix has become more and more international jurix is originally a dutch belgian initiative nowadays the conference papers are in majority from non dutch authors and since 2002 jurix is held outside the netherlands and belgium every other year most accepted papers can largely be fitted into either work on argumentation or work on ontology argumentation has been a jurix topic during all past years and the interest in ontology has revived recently with semantic initiatives the topic communication and information systems security features articles from the wiley handbook of science and technology for homeland security covering strategies for protecting the telecommunications sector wireless security advanced web based technology for emergency situations science and technology for critical infrastructure consequence mitigation are also discussed this book presents the latest developments in computer vision methods applicable to various problems in multimedia computing including new ideas as well as problems in computer vision and multimedia computing provided by publisher this two volume set consisting of lncs 7181 and lncs 7182 constitutes the thoroughly refereed proceedings of the 13th international conference on computer linguistics and intelligent processing held in new delhi india in march 2012 the total of 92 full papers were carefully reviewed and selected for inclusion in the proceedings the contents have been ordered according to the following topical sections nlp system architecture lexical resources morphology and syntax word sense disambiguation and named entity recognition semantics and discourse sentiment analysis opinion mining and emotions natural language generation machine translation and multilingualism text categorization and clustering information extraction and text mining information retrieval and question answering document summarization and applications this book constitutes the refereed proceedings of the 8th mexican international conference on artificial intelligence micai 2009 held in guanajuato mexico in november 2009 the 63 revised full papers presented together with one invited talk were carefully reviewed and selected from 215 submissions the papers are organized in topical sections on logic and reasoning ontologies knowledge management and knowledge based systems uncertainty and probabilistic reasoning natural language processing data mining machine learning pattern recognition computer vision and image processing robotics planning and scheduling fuzzy logic neural networks intelligent tutoring systems bioinformatics and medical applications hybrid intelligent systems and evolutionary algorithms the scandinavian conference on artificial intelligence continues a tradition of being one of the most important regional ai conferences in europe for ten years now the topics of this year s contributions have a broad range from machine learning knowledge representation robotics planning and scheduling natural language computer vision search algorithms industrial applications to philosophical foundations these contributions exemplify the diversity of research in artificial intelligence today and confirm the achievement and magnitude of 25 years ai research in scandinavia in this tenth edition there will be an overview of the past present and future of artificial intelligence furthermore attention will be paid to the industrial aspects of artificial intelligence and the impressions from swedish ai through the years other topics discussed are biosurveillance and an elaboration on probalistic modelling and learning in a relational world the future of surgery is intrinsically linked to the future of computational sciences the medical act will be computer assisted at every single step from planning to post surgery recovery and through the surgical procedure itself looking back at the history of surgery surgery practice has changed drama cally with the extensive use of revolutionary techniques such as medical imaging laparoscopy endoscopy sensors and actuators and robots this trend is dependent on the use of computer processing computational method and virtualization computational surgery will not only improve the ef ciency and quality of surgery but will also give new access to very complex operations that require extreme precision and minimum intrusion such examples are today s inoperable cancer tumors that have invaded critical tissues or nervous centers in order for this milestone to be reached quicker

and more efficiently surgeons will have to become very familiar with computing methods such as image analysis augmented reality and robotics it will be critical for surgeons to assimilate computers in their training understand how computers work understand the limitations advantages of these computer tools and be able to interpret computer imaging and simulations this book constitutes the refereed proceedings of the third international conference on electronic participation epart 2011 held in delft the netherlands in august september 2011 the 26 revised full papers were carefully reviewed and selected from numerous submissions the papers are organized in topical sections on appreciation of social media visualizing arguments understanding eparticipation eparticipation initiatives and country studies participation and services and innovative technologies parallel and distributed processing although within the focus of computer science research for a long time is gaining more and more importance in a wide spectrum of applications these proceedings aim to demonstrate the use of parallel and distributed processing concepts in different application fields and attempt to spark interest in novel research directions to advance the embracing model of high performance computing research in general the objective of these workshops is to specifically address researchers coming from university industry and governmental research organizations and application oriented companies in order to close the gap between purely scientific research and the applicability of the research ideas to real life problems euro par is an annual series of international conferences dedicated to the promotion and advancement of all aspects of parallel and distributed computing the 2007 event was the 13th issue of the conference euro par has for a long time been eager to attract colocated events sharing the same goal of promoting the development of parallel and distributed computing both as an industrial technique and an academic discipline extending the frontier of both the state of the art and the state of the practice since 2006 euro par offers researchers the chance to colocate advanced technical workshops back to back with the main conference this is for a mutual benefit the workshops can take advantage of all technical and social facilities which are set up for the conference so that the organizational tasks are kept to a minimal level the conference can rely on workshops to experiment with specific areas of research which are not yet mature enough or too specific to lead to an official full edged topic at the conference this book is a comprehensive and in depth reference to the most recent developments in the field covering theoretical developments techniques technologies among others provided by publisher the 2008 international symposium on rule interchange and applications ruleml th 2008 colocated in orlando florida with the 11 international business rules forum was the premier place to meet and to exchange ideas from all fields of rule technologies the aim of ruleml 2008 was both to present new and interesting research results and to show successfully deployed rule based applications this annual symposium is the flagship event of the rule markup and modeling initiative ruleml the ruleml initiative ruleml org is a non profit umbrella organization of several technical groups organized by representatives from academia industry and government working on rule technologies and applications its aim is to promote the study research and application of rules in heterogeneous distributed environments such as the ruleml maintains effective links with other major international societies and acts as intermediary between various specialized rule vendors applications industrial and academic research groups as well as standardization efforts from for example w3c omg and oasis the internet is a remarkable catalyst for creativity collaboration and innovation providing us with amazing possibilities that just two decades ago would have been impossible to imagine this work includes a peer reviewed collection of scientific papers addressing some of the challenges that shape the internet of the future hctl open international journal of technology innovations and research ijtir issn online 2321 1814 is an international open access peer reviewed online journal devoted to various disciplines of science and technology hctl open ijtir is a bi monthly journal published by hctl open publications solutions india and hybrid computing technology labs india get more information at ijtir hctl org the international symposium on distributed computing and artificial intelligence dcaai 10 is an annual forum that brings together past experience current work and promising future trends associated with distributed computing artificial intelligence and their application to provide efficient solutions to real problems this symposium is organized by the biomedicine intelligent system and educational technology research group bisite usal es of the university of lamanca the present edition has been held at the polytechnic university of lencia from 7 to 10 september 2010 within the congreso español de informática cedi 2010 technology transfer in this field is still a challenge with a large gap between academic research and industrial products this edition of dcaai aims at contributing to reduce this gap with a stimulating and productive forum where these communities can work towards future cooperation with social and economic benefits this conference is the forum in which to present application of innovative techniques to complex problems artificial intelligence is changing our society its application in distributed environments such as internet electronic commerce environment monitoring mobile communications wireless devices distributed computing to cite some is continuously increasing becoming an element of high added value with social and economic potential both industry life quality and research these technologies are changing constantly as a result of the large research and technical effort being undertaken in universities companies this book goes to great depth concerning the fast growing topic of technologies and approaches of fuzzy logic in the semantic the topics of this book include fuzzy description logics and fuzzy ontologies queries of fuzzy description logics and fuzzy ontology knowledge bases extraction of fuzzy description logics and ontologies from fuzzy data models storage of fuzzy ontology knowledge bases in fuzzy databases fuzzy semantic ontology mapping and fuzzy rules and their interchange

in the semantic the book aims to provide a single record of current research in the fuzzy knowledge representation and reasoning for the semantic the objective of the book is to provide the state of the art information to researchers practitioners and graduate students of the intelligence and at the same time serve the knowledge and data engineering professional faced with non traditional applications that make the application of conventional approaches difficult or impossible are international and asian regional institutions serving the development goals of asian and pacific economies as well they should the global economy led by the asia pacific region has undergone immense change and growth have the existing institutions and arrangements been able to keep pace with those changes in the global economy international institutions and asian development tackles these questions and is an essential book for the assessment of regional and international institutions as well as policy prescriptions for reforming them to ensure they deliver on sustainable peaceful growth and development in the region drawing from papers presented to the 32nd pacific trade and development conference in hanoi in 2007 the contributions by distinguished authors add to the understanding of the purpose evolution relevance and gaps in regional and global institutions and their arrangements shiro armstrong is a research fellow at the crawford school of economics and government at the australian national university vo tri thanh is director of the department for international economic integration studies of the central institute of economic management in vietnam this book collects high quality research papers presented at the international conference on computing applications in electrical electronics engineering held at rajkiya engineering college sonbhadra india on august 30 31 2019 it provides novel contributions in computational intelligence together with valuable reference material for future research the topics covered include big data analytics iot and smart infrastructures machine learning artificial intelligence and deep learning crowd sourcing and social intelligence natural language processing business intelligence high performance computing wireless mobile and green communications ad hoc sensor and mesh networks sdn and network virtualization cognitive systems swarm intelligence human computer interaction network and information security intelligent control soft computing networked control systems renewable energy sources and technologies biomedical signal processing pattern recognition and object tracking and sensor devices and applications this book presents a set of 4 papers accompanying the lectures of leading researchers given at the 10th edition of the international school on formal methods for the design of computer communication and software systems sfm 2010 held in bertinoro italy in june 2010 sfm 2010 was devoted to formal methods for quantitative aspects of programming languages and covered several topics including probabilistic and timed models model checking static analysis quantum computing real time and embedded systems and security
