a sensational eye opening account of emma jung s complex marriage to carl gustav jung and the hitherto unknown role she played in the early years of the psychoanalytic movement clever and ambitious emma jung yearned to study the natural sciences at the university of zurich but the strict rules of proper swiss society at the beginning of the twentieth century dictated that a woman of emma s stature one of the richest heiresses in switzerland travel to paris to finish her education to prepare for marriage to a suitable man engaged to the son of one of her father s wealthy business colleagues emma s conventional and predictable life was upended when she met carl jung the son of a penniless pastor working as an assistant physician in an insane asylum jung dazzled emma with his intelligence confidence and good looks more important he offered her freedom from the confines of a traditional haute bourgeois life but emma did not know that jung s charisma masked a dark interior fostered by a strange isolated childhood and the sexual abuse he d suffered as a boy as well as a compulsive philandering that would threaten their marriage using letters family interviews and rich never before published archival material catrine clay illuminates the jungs unorthodox marriage and explores how it shaped and was shaped by the scandalous new movement of psychoanalysis most important clay reveals how carl jung could never have achieved what he did without emma supporting him through his private torments the emma that emerges in the pages of labyrinths is a strong brilliant woman who with her husband s

carl was very much depressed when he went into the teamsters quarters to get his supper the men wanted to talk about the battle but carl wanted some information about his cattle how long had they been there did anybody come with them and did they run as though they were very much frightened about something the teamsters answered these questions as well as they could but they were certain about two things nobody had been seen with the cattle when they came up and they were running as though they had made up their minds not to stop until they reached the mississippi river but they were easily controlled and the men who had been sent after them had no trouble at all in driving them back to the fort now carl tell us something more about the fight said one of the teamsters how did lieutenant parker behave any way he acted as though there was not an indian within a hundred miles of him answered carl with animation he let his horse take his own way and never stopped until we were a mile away from the camp did he kill any indians every time i saw him pull on an indian he dropped but he saved one sioux from being killed and that s one thing i didn t like about him while carl was engaged in telling this story about the indian who was shot through both legs and had a knife left with which to defend himself the bugle sounded and that was something that carl delighted to hear he hurried out to get his horse and when he came back the men were all drawn up in line and the captain was listening to some parting instructions from the colonel if you see any signs of the sioux out there you will follow them up until you are certain that they go on their reservation said he carl i hope it is not as bad as you think he added turning to the young scout who came up at that moment a boy who behaved as you did in the fight don t deserve to have his ranch raided good luck to you in a few minutes more the column headed by carl and the captain were out of the gate and the darkness shut them out from view for miles they travelled at a fast walk and not a word was said by anybody in the ranks finally carl who had been watching his horse for some time stopped his own nag and reached out and touched the captain on the shoulder there was somebody coming and he was coming fast too in a few seconds more he caught sight of two or three hats which were bobbing back and forth in front of the horizon and in response to the captain s challenge they hauled up very suddenly halt who comes there asked the captain halt yourself answered a voice and carl was almost ready to yell when he recognized that thompson was speaking to them you are soldiers ain t you have you seen any cattle down this way thompson cried carl well i declare if there ain t carl said thompson so delighted that he could scarcely speak where have you been i have been in a fight but i am all here yet said carl riding forward to shake his men by the hand how did those cattle manage to get away from you you have been in a fight have you said thompson so overjoyed to see carl again that he could hardly let him go well you haven t been in any worse one than we have we ve killed nine indians and have a prisoner up there to show you a prisoner who is it it is harding that is who it is he came out to the ranch with twenty five indians to gather up some stock and we were too many for him he stampeded some of the cattle but we whipped the indians and drove them away that is the same thing he proposed to me while i was a prisoner said carl turning to the captain i knew that if i gave him an order on thompson for the stock he would be killed when he presented it well he helped me to escape once and you can help him this time

television scholarship has substantially ignored programming aimed at black audiences despite a few sweeping histories and critiques in this volume the first of its kind contributors examine the televisual diversity complexity and cultural imperatives manifest in programming directed at a black and marginalized audience watching while black considers its subject from an entirely new angle in an attempt to understand the lives motivations distinctions kindred lines and individuality of various black groups and suggest what television might be like if such diversity permeated beyond specialized enclaves it looks at the macro structures of ownership producing casting and advertising that all inform production and then delves into television programming crafted to appeal to black audiences historic and contemporary domestic and worldwide chapters rethink such historically significant programs as roots and black journal such seemingly innocuous programs as fat albert and bro town and such contemporary and culturally complicated programs as noah s arc treme and the boondocks the book makes a case for the centrality of these programs while always recognizing the racial dynamics that continue to shape black representation on the small screen painting a decidedly introspective portrait across forty years of black television watching while black sheds much needed light on under examined demographics broadens common audience considerations and gives deference to the the preferences of audiences and producers of black targeted programming

historical materialism is what is called a fashionable subject the theory came into being fifty years ago and for a time remained obscure and limited but during the last six or seven years it has rapidly attained great fame and an extensive literature which is daily increasing has grown up around it it is not my intention to write once again the account already given many times of the origin of this doctrine nor to restate and criticise the now well known passages in which marx and engels asserted the theory nor the different views of its opponents its supporters its exponents and its correctors and corruptors my object is merely to submit to my colleagues some few remarks concerning the doctrine taking it in the form in which it appears in a recent book by professor antonio labriola of the university of rome for many reasons it does not come within my province to praise labriola s book but i cannot help saying as a needful explanation that it appears to me to be the fullest and most adequate treatment of the question the book is free from pedantry and learned tattle whilst it shows in every line signs of the author s complete knowledge of all that has been written on the subject a book in short which saves the annoyance of controversy with erroneous and exaggerated opinions which in it appear as superseded it has a grand opportunity in italy where the materialistic theory of history is known almost solely in the spurious form bestowed on it by an ingenious professor of economics who even pretends to be its inventor
