## The Pocket List of Railroad Officials 1896

our healthcare system is on life support it does not need temporary relief what it needs is intensive therapy for a quick recovery we need to abandon persistent past failures and current abuses to pursue a fundamentally different approach to achieve affordable healthcare for everyone the fundamental problem of healthcare in our country is the persistently rising medical care cost nationally we spent 254 billion in 1980 and 3.3 trillion in 2018 a 1200% rise in about four decades in contrast our population increased by 32% during the same time period and yet about 30 million americans remain uninsured and about 25 million under insured those who are insured pay extra out of pocket in addition to paying high premiums and high deductibles the medical care insurers are often blamed for rising medical care cost although they only collect premiums from the consumers and pay the bills of the medical care providers doctors hospitals drug makers and others as the size of providers bills goes up so do the premiums of the insurers the providers grossly abuse the system and they are accountable to no one here an innovative practical and sustainable system is presented that would control these abuses and make quality basic medical care affordable to everyone at about half the current cost per capita medical care cost in every state would be calculated and capped this would not be socialized medicine nor would it be controlled by the government this would be independent and non profit system it would be guided by the central board and managed by the state boards it would be overseen by the respective senates this plan would be pilot tested in a small state for three years prior to its application nationwide

## Oliver & Boyd's new Edinburgh almanac and national repository. [With] Western suppl 1872

carefully teaches students the steps in history taking the most important part of the clinical examination 5 star doody's review this is a well organized and comprehensive book that teaches a systematic approach to the establishment of a differential diagnosis by maximizing the information that can be collected and developed from a patient's history this book is ideal for medical students housestaff and any clinicians dedicated to refining their skills in this area students will find this book very useful in guiding them through the common presenting symptoms that bring patients to medical attention by systematically reviewing the information attained to formulate a differential diagnosis taking into account prevalence data associated causes likelihood ratios of alarm symptoms and such students will cultivate the discipline helping them to perform at the highest level doody's review service features offers a patient centered approach to the medical history by emphasizing symptoms rather than diseases applies principles of evidence based medicine to the clinical history illustrates the history taking process through the discussion of 60 common clinical symptoms such as dizziness weight loss dyspnea chest pain nausea and vomiting low back pain memory loss and anxiety includes diagnostic approach algorithms to summarize important concepts focuses on actual questions for use in daily practice provides tips for effective interviewing
