when you hear apple tv you immediately think it is an actual tv that you are purchasing but this is not the case the apple tv is actually a device that you will use to stream something a little similar to amazon s fire or roku it is a little black box that is about an inch and a half tall just a little bit less than four inches and it runs on a very

similar platform to the ipad and the popular iphones you can download a list of apps and also games beyond the standard streaming video that you could get from hulu netflix amazon just to name a few the apple tv has been centered on various apps and it is still able to stream multiple tv shows movies straight to your hdtv but this is just the tip of the iceberg on the features this box has been packed with the box allows you to watch and stream podcasts play your favorite game stream your workout playlist and much more but what is important to note to enjoy all these benefits this box is ready to provide it will all depend on the apps that you have installed some of the apps you will use are free and some will cost think of it this way the apple tv is able to turn your tv into a smart tv you can either rent your favorite movies or merely stream your collection from your itunes account you could also stream movie shows from apps like hulu plus or netflix stream your music from the pandora or apple music apps i mean the list is endless on what the apple tv can actually do for you the apple tv 4k has been designed with some of the fastest processors you could find the same that powers the ipad pro the apple tv box has been made to be as powerful as most laptops we use it also has a fast graphics processor that has been designed with enough power that could turn the black box into a game console nothing sounds better than this apple has genuinely revamped the new generation but this does not mean you have to throw away your older model just the same thing they have been doing with iphone the third generation is still available in the market for you to purchase

for most people the apple tv 4k might as well not exist in a market where nearly every new tv is smart where i can load them with my favorite streaming apps including apple tv a separate set top box is superfluous so why get an apple tv 4k what does it bring to the home entertainment equation that your existing smart tv doesn't let's dig in and figure it out apple tv 4k is a smart set top box capable of pushing out a 4k hdr image it supports apps for all major streaming platforms like netflix hulu amazon prime disney plus youtube tv and more with baked in access to apple's original content platform apple tv apple tv 4k can also play games any game that you can play on apple arcade you can load up onto apple tv 4k and play on the big screen with a controller if supported if you workout with apple fitness you can access workouts directly from the device as well and it'll sync with your apple watch this is the first generation of apple tv to sport a newly designed remote as well totally revamped it has a touch enabled click wheel at the top reminiscent of old school ipods instead of the hard to navigate touch surface of the previous gen it's also thicker and has a discernable up both frustrations leveled at the old remote obviously you can watch all kinds of shows on apple tv 4k it'll even suggest things based on how often you use certain apps the home screen is easily navigable and provides ready access to your apps shows games apple fitness and smart home if you want to play apple arcade games on your tv apple tv 4k is the best way to do it with native support for the same games you play on your other devices and controller support it's a bit like an apple gaming console but you'll need to hunt a bit to find games that play well on the big screen ready to explore new features and know your device better read apple tv 4k user guide for kids beginners seniors for a comprehensive manual for beginners and seniors to the master apple tv 4k hidden features with tips and tricks
