John Greaves, Pyramidographia and Other Writings, with Birch's Life of John Greaves

2019-01-22

this is a modern spelling edition of john greaves s pyramidographia 1646 together with some miscellaneous travel writings letters and a biography of greaves by thomas birch it includes a full scholarly introduction and detailed notes this book is the first of its kind in english and undertakes a scientific evaluation of the pyramids through metrics using state of the art instruments and drawing on both ancient and modern authorities amongst which is included arab and persian writers as well as western sources greaves s work is distinguished from others by his refusal to be drawn into mystical or theological speculation and is an excellent example of how seventeenth century scientists may be said to have pioneered modern methods of scientific inquiry greaves discusses the age of the pyramids their purpose the nature of their builders and the methods he believes were used to erect them it may be said that he is probably the earliest genuine english egyptologist and that pyramidographia is indeed the earliest scientific treatise on the subject greaves s travel writings which also contain a great deal of measurement show readers how he approached his sojourn in foreign lands and his letters give some measure of the man and his relationships with fellow scientists and patrons the biography by thomas birch further fills out greaves s life and career

since the beginning of the royal navy submarine service in 1901 173 submarines have been lost and in many circumstances with their entire crew war inevitably takes a heavy toll in world war two alone 341 officer and 2 801 ratings failed to return to harbour the loss of personnel was roughly equivalent to the strength of the submarine arm at the outbreak of war between the first loss a1 in 1904 and the last artemis in 1971 lie many stories in which cool nerve was very much in evidence and one can marvel at the escape of the only survivor of perseus and of the sinking of olympus from which the few survivors had to swim seven miles before receiving help and of surgeon lieutenant charles rhodes who died that others may live these and many other accounts of submarine escape are described within this history and whenever possible in the words of survivors or witnesses
