Biotechnology and Agricultural Development

2006-11-22

this book addresses the continuing controversy over the potential impact of genetically modified gm crops in developing countries supporters of the technology claim it offers one of the best hopes for increasing agricultural production and reducing rural poverty while opponents see it as an untested intervention that will bring corporate control of peasant farming the book examines the issues by reviewing the experience of gm insect resistant cotton the most widely grown gm crop in developing countries the book begins with an introduction to agricultural biotechnology a brief examination of the history of cotton production technology and the institutions required to support that technology and a thorough review of the literature on the agronomic performance of gm cotton it then provides a review of the economic and institutional outcomes of gm cotton during the first decade of its use the core of the book is four country case studies based on original fieldwork in the principal developing countries growing gm cotton china india south africa and colombia the book concludes with a summary of the experience to date and implications for the future of gm crops in developing countries this review challenges those who have predicted technological failure by describing instances in which gm cotton has proven useful and has been enthusiastically taken up by smallholders but it also challenges those who claim that biotechnology can take the lead in agricultural development by examining the precarious institutional basis on which these hopes rest in most countries the analysis shows how biotechnology s potential

contribution to agricultural development must be seen as a part of and often secondary to more fundamental policy change the book should be of interest to a wide audience concerned with agricultural development this would include academics in the social and agricultural sciences donor agencies and ngos

Pakistan - Social and Cultural Transformations in a Muslim Nation

2002

this is the first english language survey of pakistan s socio economic evolution mohammad qadeer gives an essential overview of social and cultural transformation in pakistan since independence which is crucial to understanding pakistan s likely future direction pakistan examines how tradition and family life continue to contribute long term stability and explores the areas where very rapid changes are taking place large population increase urbanization economic development and the nature of civil society and the state it offers an insightful view into pakistan exploring the wide range of ethnic groups the countryside religion and community and popular culture and national identity it concludes by discussing the likely future social development in pakistan captivating students and academics interested in pakistan and multiculturalism qadeer s impressive work is a comprehensive examination of social and cultural forces in pakistani society and is an important resource for anyone wanting to understand contemporary pakistan
