2018-11-02

the last ten years have seen explosive growth in the technology available to the collision analyst changing the way reconstruction is practiced in fundamental ways the greatest technological advances for the crash reconstruction community have come in the realms of photogrammetry and digital media analysis the widespread use of scanning technology has facilitated the implementation of powerful new tools to digitize forensic data create 3d models and visualize and analyze crash vehicles and environments the introduction of unmanned aerial systems and standardization of crash data recorders to the crash reconstruction community have enhanced the ability of a crash analyst to visualize and model the components of a crash reconstruction because of the technological changes occurring in the industry many sae papers have been written to address the validation and use of new tools for collision reconstruction collision reconstruction methodologies volumes 1 12 bring together seminal sae technical papers surrounding advancements in the crash reconstruction field topics featured in the series include night vision study and photogrammetry vehicle event data recorders motorcycle heavy vehicle bicycle and pedestrian accident reconstruction the goal is to provide the latest technologies and methodologies being introduced into collision reconstruction appealing to crash analysts consultants and safety engineers alike

Real Market Economics

2017-12-08

this book provides a framework for understanding the economics that drive markets enabling investment professionals to understand the reality of markets and models and to be where the profits are economics is about the allocation of resources so it is at the heart of markets and yet to many economics is a field that feels far removed from the realities of what they see trading common sense some entrepreneurial intuition and a decent dose of luck might seem like the only tools one needs to navigate a profitable course especially when approaching a new financial market this is however a weak framework it is one where inconsistencies can thrive cancelling out the rewards of erstwhile successful views or leaving no protection when risks crystallize of course luck is always welcome but there is no accounting for it relying on luck for returns is to make those returns completely unreplicable and thus unstable a recipe for an unintentionally short relationship with real markets a robust framework is needed instead split into three parts real market economics first builds the core framework of economic concepts starting with real levels of activity before turning to growth in it and then prices ending with the dynamics of business cycles part two adds on the stabilizing crossbeams including the new macroprudential policies next to the more conventional monetary and fiscal ones it then addresses how we might watch and anticipate policy changes finally part three liberally coats the framework with financial markets thereby making the completed framework's robust structure truly useful for investing in real markets

Metal Sustainability

2016-07-29

the sustainable use of natural resources is an important global challenge and improved metal sustainability is a crucial goal for the 21st century in order to conserve the supply of critical metals and mitigate the environmental and health issues resulting from unrecovered metals metal sustainability global challenges consequences and prospects discusses important topics and challenges associated with sustainability in metal life cycles from mining ore to beneficiation processes to product manufacture to recovery from end of life materials to environmental and health concerns resulting from generated waste the broad perspective presented highlights the global interdependence of the many stages of metal life cycles economic issues are emphasized and relevant environmental health political industrial and societal issues are discussed the importance of applying green chemistry principles to metal sustainability is emphasized topics covered include recycling and sustainable utilization of precious and specialty metals formal and informal recycling from electronic and other high tech wastes global management of electronic wastes metal reuse and recycling in developing countries effects of toxic and other metal releases on the environment and human health effect on bacteria of toxic metal release selective recovery of platinum group metals and rare earth metals metal sustainability from a manufacturing perspective economic perspectives on sustainability mineral development and metal life cycles closing the loop minerals industry issues the aim of this book is to improve awareness of the increasingly important role metals play in our high tech society the need to conserve our metal supply throughout the metal life cycle the importance of improved metal recycling and the effects that unhindered metal loss can have on the environment and on human health

Crime and Planning

2012-11-07

the form and layout of a built environment has a significant influence on crime by creating opportunities for it and in turn shaping community crime patterns effective urban planners and designers will consider crime when making planning and design decisions a co publication with the american planning association crime and planning building socially sustainable communities presents a comprehensive discussion of the interconnections between urban planning criminal victimization and crime prevention an introduction into the main concerns at the intersection of criminology and community planning the book first provides an overview of crime patterns it then explores major issues within planning and their impact on crime critical topics discussed include connectivity mixed use developments land use and zoning transit oriented design and pedestrian trails greenways and parks the remaining chapters explore crime prevention theories crime prevention as a central component of sustainability how to incorporate social sustainability and planning guidelines into local planning decisions policy discussion of issues such as zoning how tools such as smart growth and form based codes relate to crime and crime prevention examples of how planning decisions can impact crime patterns in both a residential and retail setting and what has already worked in real world communities as communities continue to grapple with foreclosure sprawl and infill redevelopment a sound understanding of how the built
