a new york times 2016 notable book robert tombs s momentous the english and their history is both a startlingly fresh and a uniquely inclusive account of the people who have a claim to be the oldest nation in the world the english first came into existence as an idea before they had a common ruler and before the country they lived in even had a name they have lasted as a recognizable entity ever since and their defining national institutions can be traced back to the earliest years of their history the english have come a long way from those first precarious days of invasion and conquest with many spectacular changes of fortune their political economic and cultural contacts have left traces for good and ill across the world this book describes their history and its meanings from their beginnings in the monasteries of northumbria and the wetlands of wessex to the cosmopolitan energy of today s england robert tombs draws out important threads running through the story including participatory government language law religion the land and the sea and ever changing relations with other peoples not the least of these connections are the ways the english have understood their own history have argued about it forgotten it and yet been shaped by it these diverse and sometimes conflicting understandings are an inherent part of their identity rather to their surprise as ties within the united kingdom loosen the english are suddenly embarking on a new chapter the english and their history the first single volume work on this scale for more than half a century and which incorporates a wealth of recent scholarship presents a challenging modern account of this immense and continuing story bringing out the strength and resilience of english government the deep patterns of division and also the persistent capacity to come together in the face of danger one striking weaknesses of our financial architecture which helped bring on and perhaps deepen the panic of 2008 is an inadequate appreciation of the past information about how the system functioned and the reliability of organizations and institutional controls were drawn from a relatively narrow group of recent examples history and financial crisis lessons from the 20th century is an attempt to broaden the range of historical sources used by policy makers to understand and treat financial crises many recent discussions of the 2008 panic and the economic turmoil have found the situation to either be unprecedented or greatly similar to that of 1931 however the book s wide range of contributors suggest that the economic crisis of 2008 cannot be categorised in this way this book was originally published as a special issue of business history changes in technology and adversary behavior will invariably produce new threats that must be assessed by defense and homeland security planners an example of such a novel threat is the use of cruise missiles or unmanned aerial vehicles uavs by terrorist groups individual threats cannot be assessed in isolation however since adversaries always have many options for staging attacks to examine this threat rand utilized a red analysis of alternatives approach wherein the benefits costs and risks of different options are considered from the point of view of a potential adversary for several types of attacks the suitability of these systems was compared against other options this approach can help defense planners understand how the capabilities

that different attack modes provide address key adversary operational problems given the insights this analysis produced about when these systems would likely be preferred by an attacker and explored defensive options to address the threat uavs and cruise missiles represent a niche threat within a larger threat context therefore defenses were sought that provide common protection against both this and other asymmetric threats the monograph concludes with a discussion of cross cutting lessons about this threat and the assessment of novel threats in general the byzantine world presents the latest insights of the leading scholars in the fields of byzantine studies history art and architectural history literature and theology those who know little of byzantine history culture and civilization between ad 700 and 1453 will find overviews and distillations while those who know much already will be afforded countless new vistas each chapter offers an innovative approach to a well known topic or a diversion from a well trodden path readers will be introduced to byzantine women and children men and eunuchs emperors patriarchs aristocrats and slaves they will explore churches and fortifications monasteries and palaces from constantinople to cyprus and syria in the east and to apulia and venice in the west secular and sacred art profane and spiritual literature will be revealed to the reader who will be encouraged to read see smell and touch the worlds of byzantine ceremonial and sanctity liturgy and letters orthodoxy and heresy will be explored by both leading and innovative international scholars ultimately readers will find insights into the emergence of modern byzantine studies and of popular byzantine history that are informative novel and unexpected and that provide a thorough understanding of both in today s knowledge driven world innovation and innovation systems have become key policy issues however the extent of knowledge that is available on these concepts in less developed countries is still relatively low much of what we know about innovation theory and systems has come from the developed countries and reflects their world view this apparent knowledge deficit has major implications for less developed countries innovation systems and capabilities in developing regions adds to the growing body of knowledge on developing countries the theoretical and empirical case studies presented here advance the notion that while developing countries may not engage in frontier research a critical knowledge base upon which these countries compete for global markets is emerging there is evidence that state and non state actors are increasingly emphasising policies that sit within the framework of national innovation systems this book illuminates this shift in policy competence at national levels the contributions in this volume highlight the need for thorough understanding of the role of diffusion based innovation linked to technology transfer and acquisition they also provide empirical evidence on the drivers dynamics and impact of such innovation in developing economies and the constraints that apply contributors also document the application of the innovation system approach in developing countries as well as the build up and diffusion of technological capabilities within innovation systems academics higher level students policy makers and practitioners involved with innovation and the economics of technical change particularly in developing countries will find this a valuable book a follow up publication to the handbook of medieval studies this new reference work turns to a different focus medieval culture medieval research has grown tremendously in depth and breadth over the last decades particularly our understanding of

medieval culture of the basic living conditions and the specific value system prevalent at that time has considerably expanded to a point where we are in danger of no longer seeing the proverbial forest for the trees the present innovative handbook offers compact articles on essential topics ideals specific knowledge and concepts defining the medieval world as comprehensively as possible the topics covered in this new handbook pertain to issues such as love and marriage belief in god hell and the devil education lordship and servitude christianity versus judaism and islam health medicine the rural world the rise of the urban class travel roads and bridges entertainment games and sport activities numbers measuring the education system the papacy saints the senses death and money tracing the path from troy s destruction to rome s foundation the aeneid explores the transition between past and future as the trojans struggle to found a new city and the narrator sings of his audience s often painful history memory becomes intertwined with a crucial leitmotif the challenge of being part of a group that survives violence and destruction only to face the daunting task of remembering what was lost this book offers a new reading of the aeneid that engages with critical work on memory and questions the prevailing view that aeneas must forget his disastrous history in order to escape from a cycle of loss considering crucial scenes such as aeneas reconstruction of celaeno s prophecy and his slaying of turnus this book demonstrates that memory in the aeneid is a reconstructive and dynamic process one that offers a social and narrative mechanism for integrating a traumatic past with an uncertain future after the cold war a new era began in the eurasian region with the countries that gained their independence from the ussr acquiring a place in the international system after 1991 the absence of strong international gravity in russia increased the positive relations of many countries with the west as this book shows across the world there are regions caught between identity and power in this respect the ideological origin of the russian federation s foreign policy goals is connected with its position as a great power on this note the book analyses the great powers challenges in eurasia within the framework of strategic interests conflict and cooperation from january 1991 through march 1995 the united states conducted numerous incursions into somalia undertaking a variety of missions and objectives all of the actions had humanitarian elements yet the operations that made up this mosaic of american involvement ranged from benign to aggressive from purely humanitarian to clearly combative somalia from the sea is an account that attempts to explain and analyze these actions and place them within the overarching strategic and operational concepts developing in the first years following the end of the cold war introduction chieftains into ancestors describes the intersection of imperial administration and chieftain dominated local culture in the culturally diverse southwestern region of china contemplating the rhetorical question of how one can begin to rewrite the story of a conquered people whose past was never transcribed in the first place the authors combine anthropological fieldwork with historical textual analysis to build a new regional history the postcolonial historical novel is the first systematic work to examine how the historical novel has been transformed by its appropriation in postcolonial writing it proposes new ways to understand literary realism and explores how the relationship between history and fiction plays out in contemporary african and australasian writing using a multidisciplinary approach human respiratory viral infections is

set at the level between the definitive reference work and an essential clinical manual exploring recent advances in human respiratory viral research the text builds on the basic sciences of epidemiology virology molecular biology and immunology to cover clinical diagnosis examining one of the most hotly debated topics in contemporary politics media and academia the research handbook on populism brings together a diverse range of academics from across the globe to provide a detailed and comprehensive overview of the developing field of populism research immigration has long shaped us society in fundamental ways with latinos recently surpassing african americans as the largest minority group in the us attention has been focused on the important implications of immigration for the character and role of race in us life including patterns of racial inequality and racial identity this insightful new book offers a fresh perspective on immigration and its part in shaping the racial landscape of the us today moving away from one dimensional views of this relationship it emphasizes the dynamic and mutually formative interactions of race and immigration drawing on a wide range of studies it explores key aspects of the immigrant experience such as the history of immigration laws the formation of immigrant occupational niches and developments of immigrant identity and community specific topics covered include the perceived crisis of unauthorized immigration the growth of an immigrant rights movement the role of immigrant labor in the elder care industry the racial strategies of professional immigrants and the formation of pan ethnic latino identities written in an engaging and accessible style this book will be invaluable for advanced undergraduate and beginning graduate level courses in the sociology of immigration race and ethnicity research into the mechanisms and the morality of athenian hegemony is now perhaps livelier than ever of particular importance are the methods by which athens drew money from the aegean world with which to fund a vast fleet to facilitate her own demokratia and to create ambitious public buildings still visible today this collection of new studies inspired and guided by an internationally acknowledged authority on ancient finance thomas figueira by focusing on how athens raised finance sheds light on more familiar questions how oppressive or otherwise was athens to fellow greeks and how did her demands vary over time contributors here suggest that athens may have exercised hegemonic ambitions for longer than usually thought applying greater experience and more sensitivity to individual communities

one striking weaknesses of our financial architecture which helped bring on and perhaps deepen the panic of 2008 is an inadequate appreciation of the past information about how the system functioned and the reliability of organizations and institutional controls were drawn from a relatively narrow group of recent examples history and financial crisis lessons from the 20th century is an attempt to broaden the range of historical sources used by policy makers to understand and treat financial crises many recent discussions of the 2008 panic and the economic turmoil have found the situation to either be unprecedented or greatly similar to that of 1931 however the book s wide range of contributors suggest that the economic crisis of 2008 cannot be categorised in this way this book was originally published as a special issue of business history

tracing the path from troy's destruction to rome's foundation the aeneid explores the transition between past and future as the trojans struggle to found a new city and the narrator sings of his audience's often painful history memory becomes intertwined with a crucial leitmotif the challenge of being part of a group that survives violence and destruction only to face the daunting task of remembering what was lost this book offers a new reading of the aeneid that engages with critical work on memory and questions the prevailing view that aeneas must forget his disastrous history in order to escape from a cycle of loss considering crucial scenes such as aeneas reconstruction of celaeno's prophecy and his slaying of turnus this book demonstrates that memory in the aeneid is a reconstructive and dynamic process one that offers a social and narrative mechanism for integrating a traumatic past with an uncertain future
