the inspiration for this monograph is the progress in information and it technologies observed over several decades and the accompanying development of digital competences the collected results of the research work are grouped into three distinct chapters which at the same time have a common denominator in research perspectives network based economy innovation based economy and competence based economy are primarily analyzed in relation to technological changes in the ict area each of these perspectives ultimately leads towards economy 4 0 due to the progressing digital revolution called the fourth industrial revolution the contemporary importance of networks innovations and managerial competences in the economy is analyzed primarily in connection with technological progress the issue of networks in economic life has been developing for over 30 years the role of the network in achieving a competitive advantage is unquestioned while research issues are still being developed this technological perspective is the most important context for network research today contemporary business models are developed based on a skillfully built inter organizational network and a consciously used intra organizational network this applies to both commercial organizations and public entities these issues are reflected in articles contained in this monograph in particular in the first chapter various research conducted in organizations proves the increasing awareness of the importance of social life by managers and leaders as well as the increase in the ability to build networks using information and ict research on networks which allows an understanding of the phenomenon of network formation leads to the creation of methods and tools supporting network management modern network researchers especially in the field of management sciences point out that understanding the nature of the network and the possibilities of interacting with the network will determine the competitive position of the organization this awareness and the complexity of the network are a constant motivation to develop knowledge and use its application character the concept of an innovation based economy is included in the second chapter and is also related to technological progress in the field of communication the studies presented relate to the degree of innovation skillful differentiation of innovation and imitation the effectiveness of project financing and the implementation of innovation an important contribution to building knowledge on innovation comes from research conducted in individual sectors or regions where a new important perspective is gained and specific sometimes unique determinants of creating innovation are pointed out references to regional and sectoral conditions can be found in individual subchapters the research conclusions drawn have a cognitive and practical value for both researchers and management practitioners in the third chapter of the monograph studies that make an important contribution to building or verifying knowledge about the competence based economy are grouped together the research refers to the most important management problems and barriers to the development of organizations related to employees competences reference was made to many research currents in management e g to empower employees build the image of the employer and the concept of sustainable development due to their long history of development they would seem to be running out while researchers prove that in contemporary commercial and non commercial organizations deficits in managerial competencies are still identified this applies to both human management and technical competences especially digital therefore research indicating the reasons for a lack of competence in an era of strong popularization of these issues seems to be interesting the purpose of this monograph was to present current research results and their importance in developing knowledge about the economy based on networks innovations and competences a lot of research was conducted from the perspective of changes in technological progress and the challenges of economy 4 0 the new possibilities brought by the digital revolution in the field of building and managing networks and developing network based business models cannot be underestimated it should be expected that future innovations will be developed mainly thanks to digital progress and will be determined by the digital competences of managers and leaders modern research also shows that new generations of employees will compete primarily in the use of modern technological solutions such as data acquisition and processing analyzes and simulations on large data sets big data science data automation and robotization of production processes software integration cloud solutions and especially the increasingly comprehensive use of the internet the importance of scientific research for learning about future phenomena understanding and taming the future is invaluable the authors and editors of the book express the hope that the research results presented in it will become an inspiration for new scientific explorations and the implementation of changes in organizations and economics

dangerous churches should be norm church leaders and church people alike shrink back from danger because we want safety jesus said that he s overcome the world and its troubles dangerous churches put everything on the line for the one thing that matters most reaching lost people it s dangerous not to be a dangerous church the book is less about methods or even the message of god but about a church that risks everything it has to reach lost people living hope was birthed 8 years ago and has grown from five families to 5000 attendees grown from one to 19 services on many campuses and baptized 5 000 people along the way a dangerous church sees what only god can do when it acts upon what the church is supposed to be it risks everything to reach people god wants us to live on the edge of our margin when it comes to mission and methods so much of living hope s journey has been going back to the book of acts and trying to live authentically with the givens of who they were where they were and what they had to work with they learned to abandon agendas and short sighted human plans especially ones that copy what other churches are doing that s when they found god s blessing we went from being a good church to being god honoring church he reports drawing insight from the book of acts this book unfolds the very personal journey of a pastor and then his entire church when they finally began to live a dangerous faith the transition had a dramatic impact on the pastor s life and marriage as well as on the congregation and its outreach it opened a new sense of mission and incredible spiritual fruitfulness the pastor is not only a radically different person today but the entire church has become an atmosphere that values taking dangerous steps of faith it will lead christ s followers to become risk takers who change the world through a revolution that begins with a dangerous grace the book is story rich with examples of the grace filled culture from living hope church through the experiences of its pastor john bishop it will avoid a smug attitude that implies we ve arrived we re the first to live out grace or we re the best at giving grace instead the book will convey a humble attitude of we ve got a lot to learn including examples of mistakes the church has made along the way the rapid transition of living hope will not be projected as a speed for other churches to follow lest the book invite a crash and burn outcome at other churches thus the book will find its primary story in and from living hope in 2007 outreach magazine ranked living hope as the seventh fastest growing schurh in the us they have also been listed among the 50 most influential churches in america
