since 1988 the state of working america has provided a comprehensive answer to a question newly in vogue in this age of occupy wall street to what extent has overall economic growth translated into rising living standards for the vast majority of american workers and their families in the 12th edition lawrence mishel josh bivens elise gould and heidi shierholz analyze a trove of data on income jobs mobility poverty wages and wealth to demonstrate that rising economic inequality over the past three decades has decoupled overall economic growth from growth in the living standards of the vast majority the new edition of the state of working america also expands on this analysis of american living standards most notably by placing the great recession in historical context the severe economic downturn that began in december 2007 came on the heels of a historically weak recovery following the 2001 recession a recovery that saw many measures of living standards stagnate the authors view the past decade as lost in terms of living standards growth and warn that millions of american households face another decade of lost opportunity especially troubling the authors stress is that while overall economic performance in the decades before the great recession was more than sufficient to broadly raise living standards broad based growth was blocked by rising inequality driven largely by policy choices a determinedly data driven narrative the state of working america remains the most comprehensive resource about the economic experience of working americans

2016-02-19

presentation tools such as powerpoint were initially created to simulate physical slides and have inherited a lot of their limitations in this dissertation we identify the shortcomings and unmet user needs in presentation software by means of literature study observations a survey and the programmatic analysis of over 12000 powerpoint documents the results indicate that user needs are slowly evolving while existing software has hardly changed over the last 30 years we motivate the need to rethink the concept of a presentation and we provide conceptual and technical foundations that can enable interoperable and well integrated solutions for the identified shortcomings the resulting mindxpres platform consists of a new conceptual framework content model information system and presentation engine we present mindxpres as a presentation platform that enables researchers and developers to build innovative presentation solutions that cannot be implemented in the existing tools we further demonstrate the flexibility of the mindxpres platform by discussing a wide range of proof of concept plug in solutions for the identified shortcomings and unmet user needs
