this book constitutes the refereed proceedings of the 13th pacific asia conference on knowledge discovery and data mining pakdd 2009 held in bangkok thailand in april 2009 the 39 revised full papers and 73 revised short papers presented together with 3 keynote talks were carefully reviewed and selected from 338 submissions the papers present new ideas original research results and practical development experiences from all kdd related areas including data mining data warehousing machine learning databases statistics knowledge acquisition automatic scientific discovery data visualization causal induction and knowledge based systems

Advances in Knowledge Discovery and Data Mining

2009-04-20

from the american college of sports medicine acsm this text provides the information necessary to develop skills for assessing an individual s health related physical fitness it provides a practical how to do it approach for performing assessment skills effectively and an understanding of the theory behind and the importance of each skill or assessment the third edition includes updated references to acsm s guidelines for exercise testing and prescription eighth edition more diagrams and pictures highlighting assessment techniques and new material on physical activity assessments considerations for medication usage and common measurement errors a companion website includes an image collection a test generator and powerpoint slides

ACSM's Health-related Physical Fitness Assessment Manual

2010

this book is a selection of results obtained within two years of research per formed under synat a nation wide scientific project aiming at creating an infrastructure for scientific content storage and sharing for academia education and open knowledge society in poland the selection refers to the research in artificial intelligence knowledge discovery and data mining information retrieval and natural language processing addressing the problems of implementing intelligent tools for building a scientific information platform this book is a continuation and extension of the ideas presented in intelligent tools for building a scientific information platform published as volume 390 in the same series in 2012 it is based on the synat 2012 workshop held in warsaw the papers included in this volume present an overview and insight into information retrieval repository systems text processing ontology based systems text mining multimedia data processing and advanced software engineering

Intelligent Tools for Building a Scientific Information Platform

2013-01-12

since the publication of the first volume infrasound monitoring for atmospheric studies published in 2010 significant advances were achieved in the fields of engineering propagation modelling and atmospheric remote sensing methods the global infrasound network which consists of the international monitoring network ims for nuclear test ban verification completed by an increasing number of regional cluster arrays

deployed around the globe has evidenced an unprecedented potential for detecting locating and characterizing various natural and man made sources in recent years infrasound has evolved into a broad interdisciplinary field encompassing academic disciplines of geophysics and innovative technical and scientific developments the advances in innovative ground based instruments including infrasound inversions for continuous observations of the stratosphere and mesosphere provide useful insights into the geophysical source phenomenology and atmospheric processes involved systematic investigations into low frequency infrasound signals and the development of complementary observational platforms point out new insights into the dynamics of the middle atmosphere which play a significant role in both tropospheric weather and climate this monitoring system also provides continuous relevant information about natural hazards with high societal benefits like on going volcanic eruptions surface earthquakes meteorites or severe weather with this new edition researchers and students benefit from a comprehensive content of both fundamental and applied interdisciplinary topics

Infrasound Monitoring for Atmospheric Studies

2018-10-26

this volume includes over 30 chapters written by experts from around the world it examines numerous management strategies for dealing with drought and scarcity these strategies include management approaches for different regions such as coastal urban rural and agricultural areas it offers multiple strategies for monitoring assessing and forecasting drought through the use of remote sensing and gis tools it also presents drought mitigation management strategies such as groundwater management rainwater harvesting conservations practices and more

Handbook of Drought and Water Scarcity

2017-09-01

the two volume set Incs 5761 and Incs 5762 constitute the refereed proceedings of the 12th international conference on medical image computing and computer assisted intervention miccai 2009 held in london uk in september 2009 based on rigorous peer reviews the program committee carefully selected 259 revised papers from 804 submissions for presentation in two volumes the second volume includes 134 papers divided in topical sections on shape modelling and analysis motion analysis physical based modelling and image reconstruction neuro cell and multiscale image analysis image analysis and computer aided diagnosis and image segmentation and analysis

Medical Image Computing and Computer-Assisted Intervention -- MICCAI 2009

2009-09-30

this 2009 article iv consultation on timor leste highlights that the timorese economy has posted high economic growth over the past two years driven by rapid increases in government spending and a recovery in agriculture from a 2007 drought central government spending rose sharply in 2008 reflecting efforts to address pressing development needs and secure social cohesion executive directors have welcomed the recently announced moderation in government spending directors have also supported the prudent approach toward widening the fund s investment portfolio

the discovery of the involvement of neuropeptides with behaviours other than regulatory motivated ones took place in the midst of 1960 s with david de wiede s first

report on the influence of pituitary peptides on memory this major scientific breakthrough opened a new frontier of studies in endocrinology and its related fields neuroendocrinology and psychoneuroendocrinology neuropeptides were initially thought to be involved in homeostatic regulation and secreted only from neurons located in the hypothalamus they are now recognized neurotransmitters produced in and secreted from distinct brain areas associated with a myriad of not only motivated but also psychopathological behaviours motivated behaviours are determinant for individual and species survival but their expression in a large spectrum and deviations from average may give rise to a number of psychiatric conditions

Predictive Screening Test of Articulation: Manual

1970

knowledge engineering and management presents selected papers from the 2013 international conference on intelligent systems and knowledge engineering iske2013 the aim of this conference is to bring together experts from different expertise areas to discuss the state of the art in intelligent systems and knowledge engineering and to present new research results and perspectives on future development the topics in this volume include but not limited to knowledge representation and modeling knowledge maintenance knowledge elicitation knowledge based systems kbs content management and knowledge management systems ontology engineering data mining and knowledge discovery knowledge acquisition etc the proceedings are benefit for both researchers and practitioners who want to utilize knowledge engineering methods in their specific research fields dr zhenkun wen is a professor at the college of computer and software engineering shenzhen university china dr tianrui li is a professor at the school of information science and technology southwest jiaotong university xi an china

Cross-Border Challenges in Informatics with a Focus on Disease Surveillance and Utilising Big Data

2014-05-21

this practical manual presents the main drugs and protocols currently used in the psychopharmacological treatment of psychiatric disorders in cancer and palliative care settings and explores the principal issues involved in such treatment significant clinical challenges encountered in the psychopharmacological management of various psychiatric conditions are discussed covering aspects such as side effects and drug drug interactions attention is also paid to the emerging theme of adjuvant use of psychotropic drugs for the treatment of symptoms or syndromes not primarily related

to psychiatric disorders in addition practical suggestions are provided for dealing with special populations including children and the elderly the book is designed to be easy to read and to reference with helpful concise tables and boxes the authors include some of the most renowned clinicians working in the field of psycho oncology

Neuropeptides and Behaviour: From Motivation to Psychopathology

clinical or translational science is the field of study devoted to investigating human

health and disease interventions and outcomes for the purposes of developing new treatment approaches devices and modalities to improve health new molecular tools and diagnostic technologies based on clinical and translational research have lead to a better understanding of human disease and the application of new therapeutics for enhanced health clinical and translational science is designed as the most authoritative and modern resource for the broad range of investigators in various medical specialties taking on the challenge of clinical research prepared with an international perspective this resource begins with experimental design and investigative tools to set the scene for readers it then moves on to human genetics and pharmacology with a focus on statistics epidemiology genomic information drug discovery and development and clinical trials finally it turns to legal social and ethical issues of clinical research concluding with a discussion of future prospects to provide readers with a comprehensive view of the this developing area of science clinical research is one of the fastest growing fields in private practice and academic medicine with practical biological physiological cellular and therapeutic applications contributions from international leaders provide insight into background and future understanding for clinical and translational science provides the structure for complete instruction and guidance on the subject from fundamental principles approaches and infrastructure to human genetics human pharmacology research in special populations the societal context of human research and the future of human research

Psychopharmacology in Oncology and Palliative Care

2008

cancer related fatigue crf is increasingly recognized as a significant problem for patients with cancer at all stages including those undergoing therapy and in remission in fact studies have shown that crf causes patients more distress than pain nausea or vomiting and yet fatigue is still often undertreated and rarely studied however several new treatments such as are being investigated to determine the most effective ways to manage this debilitating symptom and improve patient quality of life cancer related fatigue will provide a concise overview of this condition with an evidence based discussion of diagnosis treatment and long term management

put the authority and accuracy of harrison s in the palm of your hand now in full color referenced to harrison s principles of internal medicine the world s leading internal medicine textbook this ultra handy portable reference delivers on the spot answers to the clinical problems you face in everyday practice turn to any page and you ll find essential point of care guidance on all the major conditions seen in clinical medicine completely updated to reflect all the major advances and new clinical developments the new edition of the manual is the most indispensable yet it continues to focus on diagnosis and therapy with an emphasis on patient care and offers authoritative high yield coverage of etiology and epidemiology clinically relevant pathophysiology signs symptoms differential diagnosis physical and laboratory findings therapeutics practice guidelines new features full color presentation for the first time full color images of clinical conditions encountered in dermatology cardiology and eye diseases new chapters on end of life care congenital heart disease in the adult patient non invasive cardiac examination and metabolic syndrome look for these other great harrison s titles harrison s principles of internal medicine 17e harrison s online available through accessmedicine.com

Text, Speech and Dialogue

1985

as time goes on big companies such as amazon microsoft google and apple become increasingly interested in virtual assistants the interest and development of social robots has put research into affective and social computing at the forefront of the scene the aim of opinion analysis in interactions is to present methods based on artificial intelligence through a combination of machine learning models and symbolic approaches also discussed are natural language processing and affective computing via the analysis and generation of socio emotional signals the book explores the

analysis of opinions in human human interaction and tackles the less explored yet crucial challenges related to the analysis methods of user opinions within the context of human agent interaction it also illustrates the implementation of strategies for selecting and generating agent utterances in response to user opinions and opens up perspectives on the agent s multimodal generation of utterances that hold attitudes
