Conversations of the Mind 2013-10-18 asking students to write journals that reflect on their learning has become a widespread pedagogical practice in recent years however the scholarly literature does not address certain key questions about how journal writing aids learning is there something inherent in journal writing that encourages students to write reflectively what psycholinguistic or cognitive factors help to explain the power of journal writing why do some students use journals to write prolifically and creatively while others limit their responses to summarizing the assigned course reading why do teachers find some journal entries so much more engaging than others how do teachers ways of responding to journals affect their students development as writers and thinkers this book addresses such questions through a careful analysis of the journal writing of the students in the author's esl classes at a large urban college it contains detailed case studies of five culturally and linguistically diverse students with widely differing responses to journal writing to teachers of composition for both first and second language students and to teachers of graduate courses in education and qualitative research this book offers a contextualized description of journal writings as a complex social activity by emphasizing the need for educators to reexamine their pedagogy and to learn from their students conversations of the mind is an indispensable

contribution to the emerging literature of teacher research and reflective practice

Toward Assessing Business Ethics Education 2010-11-01 toward assessing business ethics education edited by Diane L Swanson and Dann G Fisher of Kansas State University is a sequel to their book *Advancing Business Ethics Education in the Ethics in Practice IAP Book Series* the focus on assessment in this second book is a timely response to the urgent search among business schools for ways to teach and assess ethics at a time when the public's faith in corporations and business schools has been undermined greatly by the failure of both to respond to widespread corruption and scandals in the business sector although no one expects business education alone to resolve these problems the distinguished scholars represented in this book advocate that business schools should at least do their part by exposing their students to decision models that incorporate ethical dimensions on behalf of corporate stakeholders and society at large as the book's title conveys it is then important to assess key learning objectives to insure that business students graduate knowing ethics fundamentals and armed with the ability to recognize ethical dilemmas and possible solutions during the course of their careers this book will speak to all who are interested in accountability for business ethics education especially business school deans university administrators faculty members students and prospective employers this audience will find that the enterprise of assessing business ethics education is advanced in three ways first the book functions as a venue for distinguished scholars to share the innovative ways that they are assessing ethics coverage in courses and degree programs second these authors identify what needs to be assessed and the means for doing so third the book serves not only as a guide to assessment but also as a platform for expanding and improving ethics coverage in business schools moreover an important take away for readers is the provision of a simple formula first advocated by Diane L Swanson and William C Frederick University of Pittsburgh in 2005 for delivering ethics education that minimizes assessment errors by following this formula business schools can provide assurances that ethics will not be assessed as being sufficient when it is woefully inadequate or even missing in the curriculum and that it cannot be distorted diluted or trivialized by uninformed coverage and still pass inspection avoiding these assessment errors is critical in an educational environment in which weak accrediting standards for ethics go hand in hand with spotty uninformed coverage that would not be tolerated for other business disciplines
