cloth and cut it out according to your requirements these patterns can be modified by adding or subtracting and once you know the basics of drafting you are going to understand exactly what needs to be done when you see a pattern and recognize the different parts of it you are going to learn all about pattern drafting and dressmaking in further volumes of the series and this is going to be an extensive project somewhat like an encyclopedia about all the information of which you could think about dressmaking simple stitch craft sewing pattern designing and everything else which has to do with tailoring but first before you think about tailoring you need to have some basic supplies with you these are essential in order to give your clothes a professional look or at least to show that you are serious about tailoring you can add to these supplies as time goes by and you will get more skilled and enthusiastic about how you intend to draft clothes before you cut them out on cloth you may want to do some practice cutting sessions on useless pieces of cloth so that even if you manage to pin the wrong portions together and stitch them together without even finding out what happened during the pinning and sewing process you can just rip the seams open with the seam ripper and begin fresh as i

did not want to waste lots of cloth because i have a bit of problem visualizing the end product i should have started young i did my cutting out on sheets of newspaper

cutting sewing finishing is the common terminology used for the overall process that takes place in any organisation manufacturing garments via the industrial way the cutting room or cutting department is the place where all the pre sewing activities like spreading cutting bundling ticketing fusing and embroidery are conducted before the cut components are sent to the sewing department in a garment factory cutting department is pivotal from the point of view of controlling the material utilisation considering the fact that material constitutes 60 of the manufacturing cost although the labour cost component in spreading and cutting is very less in comparison to sewing the process involves material conversion which is irreversible and hence it is profoundly significant like any other department the technology used and the processes being followed are the two most important parameters of cutting room this multi author book is an honest attempt on our part to cover all the cutting room processes in detail to unravel the relevance of material utilisation for garment manufacturing and thus provide an essential guide for cutting room managers and executives these processes act as the tipping point for a garment factory where even a minor wastage or saving done in the fabric being used can have a

major impact on the order margins besides they lay the foundation for the garments quality and hence become all the more important

this fourth edition of metric pattern cutting for children s wear and babywear remains the standard text book but has three major improvements first the sections have been re organised to reflect changes in producing and marketing children s clothes today s popularity of easy fitting styles and knitted fabrics means that basic flat pattern cutting is used to construct the majority of children s wear and babywear and this type of cutting is therefore emphasised in this new edition shaped blocks and garments cut to fit the body form are still included and are placed in chapters covering some school uniform garments or more expensive fashion or formal clothes the book now clearly separates the sections useful to student beginners parts one two and three and also offers more advanced or specialist sections for students who wish to pursue a career in children s wear or for designers working in the different manufacturing sectors of the trade the second change in this fourth edition is the introduction of colour

coding to the sections this makes it easier to identify specific processes in the book and enhances the illustrations finally the size charts have been revised to reflect the changes in body sizing the clear division of the boys and girls measurements in the charts has been in response to the way clothes are marketed and to co ordinate with european size charts plus charts for heavier children have also been added
