soft computing wikipedia

Jan 08 2024

□□□ soft computing is an umbrella term used to describe types of algorithms that produce approximate solutions to unsolvable high level problems in computer science typically traditional hard computing algorithms heavily rely on concrete data and mathematical models to produce solutions to problems

applied soft computing journal sciencedirect com by elsevier

Dec 07 2023

□□□ applied soft computing is an international journal promoting an integrated view of soft computing to solve real life problems soft computing is a collection of methodologies which aim to exploit tolerance for imprecision uncertainty and partial truth to achieve tractability robustness and low solution cost
