Immunology

1998

this companion to immunology 5th edition is designed to provide clear clinical relevance to the science of immunology all the main diseases covered in the parent textbook are covered in case studies in immunology with 45 detailed case presentations each presentation is followed by 4 5 questions that are discussed in great detail the cases are designed to reinforce the clinical relevance of immunology and to encourage the student in problem based learning three new case studies have been added to reflect advances in immunology and to be consistent with immunology fifth edition which has increased coverage of aids nutrition and immunity designed for problem based learning approach to teaching medicine eleven tables in appendices provide an invaluable aid to clinical immunologists case studies emphasize and reinforce the link between clinical immunology and the science of immunology companion to immunology fifth edition spanish version also available isbn 84 8174 179 5

The Immune System

2021-02-01

the immune system is a concise yet thorough human oriented introduction to how the human immune system works it provides an up to date presentation of the field written in an accessible style replete with relevant medical examples plentiful illustrations and micrographs complement and illuminate the explanations the fifth edition is supported by inquizitive nortonÕs award winning easy to use adaptive learning tool that provides student practice and promotes critical thinking

Immunobiology

1994

immunobiology tells the story of the immune system the book covers all of the material that comprises a typical immunology course the fifth edition is an extensive revision which includes new material and major insights improved logical progression of topics and an emphasis on unifying principles with clear concise text and a full color art program this book continues to set the standard for a current and authoritative immunology textbook copyright libri gmbh all rights reserved

Clinical Immunology E-Book

2018-01-13

keep abreast of the latest advances in this complex field with the 5th edition of clinical immunology principles and practice this substantially revised edition by drs robert r rich thomas a fleisher william t shearer harry w schroeder jr anthony j frew and cornelia m weyand offers authoritative guidance from some of the most respected global leaders in immunology helping you navigate today s latest knowledge and evidence based practices that result in improved patient care this trusted resource features sweeping content updates rewritten chapters a highly clinical perspective and an easy to use organization designed to enhance your diagnosis and management skills in daily practice includes new chapters on the microbiota in immunity and inflammation immune responses to fungi and genetics and genomics of immune response features extensive revisions to many chapters including the major histocompatibility complex multiple sclerosis diabetes and related autoimmune diseases biologic modifiers of inflammation and tumor immunotherapy covers hot topics such as the role of genetics and genomics in immune response and immunologic disease atherosclerosis recurrent fever syndromes aging and deficiencies of innate immunity the role of microbiota in normal immune system development and the pathogenesis of immunologic and inflammatory diseases and novel therapeutics addresses notable advances in key areas such as the importance of the microbiota to normal immune system development and to the pathogenesis of immunologic and inflammatory diseases relationships between the innate and adaptive immune systems progress in rapid and cost effective genomics cell signaling pathways and the structure of cell surface molecules and many more summarizes promising research and development anticipated over the next 5 10 years with on the horizon boxes and discussion of translational research

Cellular and Molecular Immunology

2005

the 5th edition of this comprehensive title continues the tradition of delivering an accessible engaging and current introduction to this essential subject the authors describe the principles of basic and applied immunology in a concise straightforward manner while incorporating the most up to date information over 400 illustrations help readers quickly and easily grasp key concepts the entire text has been revised and includes new information about the organization of lymphoid organs and the mechanisms of innate immunity midwest

Medical Immunology, Fifth Edition

2001-08-24

maintaining the high standard of quality that made previous editions so successful this totally revised and updated text incorporates the most recent advances in basic and clinical immunology emphasizing diagnostic and clinical applications as well as state of the art discussions of the principles and strategies for modulation of the immune response and treatment of hypersensitivity autoimmune and immune deficiency diseases includes clinical case studies as well as end of chapter questions in the usml multiple choice format for self evaluation and preparation for licensure and specialty boards continuing as the only textbook providing a balanced discussion of basic and clinical immunology the fifth edition of medical immunology offers a current review of the basic principles that govern the immune response an updated review of phagocytic cell physiology and functional deficiencies a new comprehensive section on diagnostic immunology extensively revised and updated discussions on tolerance autoimmunity and hypersensitivity diseases state of the art discussion of immunosuppression and immunomodulation a modern overview of cancer immunology current discussions on the diagnosis pathogenesis and management of primary and secondary immune deficiency diseases and more written by seasoned experts in the field the fifth edition of medical immunology is an exceptional text for advanced undergraduate and graduate students taking courses in immunology in departments of medicine dentistry and veterinary science medical fellows residents and interns and practicing physicians taking seminars in clinical immunology
