North America is the third largest continent by size after Asia and Africa and the fourth largest continent by population after Asia, Africa, and Europe. As of 2021, North America's population was estimated as over 592 million people in 23 independent states or about 7.5% of the world's population.

North America (América del Norte / Amérique du Nord) is the third largest of the world's continents, lying for the most part between the Arctic Circle and the Tropic of Cancer. It extends for more than 5,000 miles (8,000 km) to within 500 miles (800 km) of both the North Pole and the Equator and has an east-west extent of 5,000 miles.

Northern America is the northernmost subregion of North America as well as the northernmost region in the Americas. The boundaries may be drawn slightly differently in one definition; it lies directly north of Central America. Geography of North America: Global View centered on North America. North America is the third largest continent and is also a portion of the third largest supercontinent if North and South America are combined into the Americas and Africa, Europe, and Asia are considered to be part of one supercontinent called Afro-Eurasia.

North America, the third largest continent, extends from the tiny Aleutian Islands in the northwest to the Isthmus of Panama in the south. The continent includes the enormous island of Greenland in the northeast and the small island countries and territories that dot the Caribbean Sea and Western North Atlantic.

North America, continent, Western Hemisphere, the third largest continent on Earth. It lies mostly between the Arctic Circle and the Tropic of Cancer. It is almost completely surrounded by bodies of water, including the Pacific Ocean, the Bering Sea and Strait, the Arctic Ocean, the Atlantic Ocean, and the Caribbean Sea and Gulf of Mexico.

North America is the world's third largest continent, covering an area of approximately 24.5 million square kilometers. It is bordered by the Arctic Ocean to the north, the Atlantic Ocean to the east, the Pacific Ocean to the west, and the Gulf of Mexico to the south.

North America is the third largest continent with the diversity to show for it. Weather ranges from icy Greenland to tropical beaches of the Caribbean, and an incredible array of national parks and preserves show off huge canyons, breathtaking mountains, ancient forests, and fascinating wildlife.

north america the third largest continent extends from the tiny aleutian islands in the northwest to the isthmus of panama in the south north america s physical geography environment and resources and human geography can be considered separately north america and south america are named after italian navigator amerigo vespucci
