User Rights for Pastoralists and Fishermen 2009

this unique text reference highlights a selection of practical applications of advanced image analysis methods for medical images the book covers the complete methodology for processing analysing and interpreting diagnostic results of sample ct images the text also presents significant problems related to new approaches and paradigms in image understanding and semantic image analysis to further engage the reader example source code is provided for the implemented algorithms in the described solutions features describes the most important methods and algorithms used for image analysis examines the fundamentals of cognitive computer image analysis for computer aided diagnosis and semantic image description presents original approaches for the semantic analysis of ct perfusion and ct angiography images of the brain and carotid artery discusses techniques for creating 3d visualisations of large datasets reviews natural user interfaces in medical imaging systems including gdl technology

Natural User Interfaces in Medical Image Analysis 2014-06-07

with the average price of a new car now exceeding 16 000 this guide fully updated and revised annually provides consumers with the kinds of information needed to make the best choices evaluating a used car s fuel economy and performance level as well as its overall quality and repair record

A Human-Centered Perspective of Intelligent Personalized Environments and Systems 1994

popular science gives our readers the information and tools to improve their technology and their world the core belief that popular science and our readers share the future is going to be better and science and technology are the driving forces that will help make it better

User Car Buying Guide 1994 1981

popular science gives our readers the information and tools to improve their technology and their world the core belief that popular science and our readers share the future is going to be better and science and technology are the driving forces that will help make it better

Users of Legal Information Systems in Europe 2007-05

personalized and adaptive systems employ user models to adapt content services interaction or navigation to individual users needs user models can be inferred from implicitly observed information such as the user s interaction history or current location or from explicitly entered information such as user profile data or ratings applications of

personalization include item recommendation location based services learning assistance and the tailored selection of interaction modalities with the transition from desktop computers to mobile devices and ubiquitous environments the need for adapting to changing contexts is even more important however this also poses new challenges concerning privacy issues user control transparency and explainability in addition user experience and other human factors are becoming increasingly important this book describes foundations of user modeling discusses user interaction as a basis for adaptivity and showcases several personalization approaches in a variety of domains including music recommendation tourism and accessible user interfaces

Popular Science 2000

this open access book provides researchers and professionals with a foundational understanding of online privacy as well as insight into the socio technical privacy issues that are most pertinent to modern information systems covering several modern topics e g privacy in social media iot and underexplored areas e g privacy accessibility privacy for vulnerable populations cross cultural privacy the book is structured in four parts which follow after an introduction to privacy on both a technical and social level privacy theory and methods covers a range of theoretical lenses through which one can view the concept of privacy the chapters in this part relate to modern privacy phenomena thus emphasizing its relevance to our digital networked lives next domains covers a number of areas in which privacy concerns and implications are particularly salient including among others social media healthcare smart cities wearable it and trackers the audiences section then highlights audiences that have traditionally been ignored when creating privacy preserving experiences people from other non western cultures people with accessibility needs adolescents and people who are underrepresented in terms of their race class gender or sexual identity religion or some combination finally the chapters in moving forward outline approaches to privacy that move beyond one size fits all solutions explore ethical considerations and describe the regulatory landscape that governs privacy through laws and policies perhaps even more so than the other chapters in this book these chapters are forward looking by using current personalized ethical and legal approaches as a starting point for re conceptualizations of privacy to serve the modern technological landscape the book s primary goal is to inform it students researchers and professionals about both the fundamentals of online privacy and the issues that are most pertinent to modern information systems lecturers or teachers can assign parts of the book for a professional issues course it professionals may select chapters covering domains and audiences relevant to their field of work as well as the moving forward chapters that cover ethical and legal aspects academics who are interested in studying privacy or privacy related topics will find a broad introduction in both technical and social aspects

Mathematical Morphology and Its Applications to Signal and Image Processing 2002

this book constitutes the refereed proceedings of the 30th ifip tc 11 international information security and privacy conference sec 2015 held in hamburg germany in may 2015 the 42 revised full papers presented were carefully reviewed and selected from 212 submissions the papers are organized in topical sections on privacy web security access control trust and identity management network security security management and human aspects of security software security applied cryptography mobile and cloud services security and cyber physical systems and critical infrastructures security

□□□□□□□□ 2005

this proceedings is focused on the emerging concept of collaborative innovation networks coins coins are at the core of collaborative knowledge networks distributed communities taking advantage of the wide connectivity and the support of communication technologies spanning beyond the organizational perimeter of companies on a global scale the book presents the refereed conference papers from the 7th international conference on coins october 8 9 2019 in warsaw poland it includes papers for both application areas of coins 1 optimizing organizational creativity and performance and 2 discovering and predicting new trends by identifying coins on the through online social media analysis papers at coins19 combine a wide range of interdisciplinary fields such as social network analysis group dynamics design and visualization information systems and the psychology and sociality of collaboration and intercultural analysis through the lens of online social media they will cover most recent advances in areas from leadership and collaboration trend prediction and data mining to social competence and internet communication

Code of Federal Regulations 2008-08

recently the contract section of the german civil code was amended after one hundred years of un altered existence the german law of contract radically recast enlarged and re written since its first edition now details and explains for the first time these changes for the benefit of anglophone lawyers one hundred and twenty translated contract decisions also make this work a unique source book for students academics and practitioners along with its companion volume the german law of torts the two volumes provide one of the fullest accounts of the german law of obligations available in the english language through its method of presentation of german law the book represents an original contribution to the art of comparison an additional feature of the contract volume is the way in which it reveals the growing impact which european directives are having upon the traditional liberal contract model thereby bringing german and english law closer to each other especially in the area of consumer protection

Complex Networks 2018

this book highlights cutting edge research in the field of network science offering scientists researchers students and practitioners a unique update on the latest advances in theory together with a wealth of applications it presents the peer reviewed proceedings of the vii international conference on complex networks and their applications complex networks 2018 which was held in cambridge on december 11 13 2018 the carefully selected papers cover a wide range of theoretical topics such as network models and measures community structure and network dynamics diffusion epidemics and spreading processes and resilience and control as well as all the main network applications including social and political networks networks in finance and economics biological and neuroscience networks and technological networks

Human Factors Supporting the Integrated Railway 2018

following on from 2005 s rail human factors supporting the integrated railway this book brings together an even broader range of academics and practitioners from around the world to share their expertise and experience on rail human factors the content is both comprehensive and cutting edge featuring more than 55 chapters addressing the following topics passengers and public driver performance and workload driving and cognition train cab and interfaces simulation and design routes signage signals and drivability signalling and control of the railway planning for the railway engineering work and maintenance level crossings accidents and safety human error and human reliability spads signals passed at danger human factors integration and standards impairments to performance staff competencies and training people and rail systems human factors at the heart of the railway will be invaluable for all those concerned with making railways safer more reliable of higher quality and more efficient it will be essential reading for policy makers researchers and industry around the world

Business Periodicals Index 2005

this book examines and engages with the ambivalence of digitization illuminating the diverse ways in which researchers approach negotiate understand and interpret objects and practices of digital research

Social Media Data Extraction and Content Analysis 2018-03-26

this book contains the thoroughly refereed proceedings of the 12th international symposium on mathematical morphology ismm 2015 held in reykjavik iceland in may 2015 the 62 revised full papers were carefully reviewed and selected from 72 submissions the papers are organized in topical sections on evaluations and applications hierarchies color multivalued and orientation fields optimization differential calculus and probabilities topology and discrete geometry and algorithms and implementation

Degunking EBay 2015-05-08

this book includes original peer reviewed research from the 3rd international conference on emerging trends in electrical communication and information technologies icecit 2018 held at srinivasa ramanujan institute of technology ananthapuramu andhra pradesh india in december 2018 it covers the latest research trends and developments in the areas of electrical engineering electronic and communication engineering and computer science and information

□□□□□□□□□□ □□□□□□□□□□ 216 □ MAZDA □□□□□ 1985

the first comparative examination of planning paradigms this text begins with the principle that the ability to anticipate and plan is an essential feature of intelligent systems whether human or machine it further assumes that better planning results in greater achievements with these principles as a foundation planning in intelligent systems provides readers with the tools needed to better understand the process of planning and to become better planners themselves the text is divided into two parts part one theoretical discusses the predominant schools of thought in planning psychology and cognitive science organizational science computer science mathematics artificial intelligence and systems theory in particular the book examines commonalities and differences among the goals methods and techniques of these various approaches to planning the result is a better understanding of the process of planning through the cross fertilization of ideas each chapter contains a short introduction that sets forth the interrelationships of that chapter to the main ideas featured in the other chapters part two practical features six chapters that center on a case study of the netherlands railways readers learn to apply theory to a real world situation and discover how expanding their repertoire of planning methods can help solve seemingly intractable problems all chapters have been contributed by leading experts in the various schools of planning and carefully edited to ensure a consistent high standard throughout this book is designed to not only expand the range of planning tools used but also to enable readers to use them more effectively it challenges readers to look at new approaches and learn from new schools of thought planning in intelligent systems delivers effective planning approaches for researchers professors students and practitioners in artificial intelligence computer science cognitive psychology and mathematics as well as industry planners and managers

ICT Systems Security and Privacy Protection 2020-07-28

this book constitutes the proceedings of the second eai international conference on smart objects and technologies for social good goodtechs 2016 held in venice italy november 30 december 1 2016 the 38 revised full papers were carefully reviewed and selected from 73 submissions the papers reflect the design implementation deployment operation and evaluation of smart objects and technologies for social good a social good can be understood as a service that benefits a large number of people in a most possible way some classic examples are healthcare safety environment democracy and human rights or even art entertainment and communication

Encyclopedia of Information Systems and Services 2006-02-27

the second edition of this comprehensive handbook of computer and information security provides the most complete view of computer security and privacy available it offers in depth coverage of security theory technology and practice as they relate to established technologies as well as recent advances it explores practical solutions to many security issues individual chapters are authored by leading experts in the field and address the immediate and long term challenges in the authors respective areas of expertise the book is organized into 10 parts comprised of 70 contributed chapters by leading experts in the areas of networking and systems security information management cyber warfare and security encryption technology privacy data storage physical security and a host of advanced security topics new to this edition are chapters on intrusion detection securing the cloud securing web apps ethical hacking cyber forensics physical security disaster recovery cyber attack deterrence and more chapters by leaders in the field on theory and practice of computer and information security technology allowing the reader to develop a new level of technical expertise comprehensive and up to date coverage of security issues allows the reader to remain current and fully informed from multiple viewpoints presents methods of analysis and problem solving techniques enhancing the reader s grasp of the material and ability to implement practical solutions
