Language and Language Communication Barriers

1996

communication and language play a foundational role in the overall pursuit of equity and social justice in education this volume does not take up the majority and dominant views which are especially visible in developments in the field of linguistic education and english language instruction rather it travels the path less followed to attend to the language and communication concerns of populations that possess little political and economic power and whose academic and social needs are often neglected the volume attends to the role of language acquisition in levelling the playing field to enable all students to develop into contented family members good neighbours and productive citizens in an increasingly diverse and global society the issue takes on far greater importance as it gradually comes to light that the

capacity for language corresponds to and even implements the ability to interrelate with others far from being a mere utilitarian tool this is now appreciated as constituting the realm of abilities to take the position of the other to share a field of meaning and to project and pursue truly humane and indeed inter humane attitudes and goals in this light communication and language whether verbal or preverbal constitute the field in which one first attains and progressively evolves one s humanity in this volume scholars from ten different countries examine issues related to the influence of language and communication patterns on equity and social justice in the lives of disadvantaged and marginalized populations around the globe i e educational opportunities community stability economic prospects and political power critical issues addressed include education in traditional national or western languages language integration through dialects and code switching non verbal academic engagement through art signing and photography cross cultural engagement through language equity in higher education and the influence of western language acquisition on the self concepts of disadvantaged students as the succession of sections in this volume makes clear success in the realization of language and communication abilities is not simple rather it reflects human life and interaction in all its complexity
