this book originated in a conference on culture and reproduction held at the university of california it discusses conceptual changes in demographic theory focuses on micro level issues and explores linkages between micro level processes and the macro level constraints that shape those processes world population growth especially its fertility component poses a major dilemma for policymakers throughout the world however theoretical developments in demography have not yet provided a solid foundation for understanding contemporary population processes from an anthropological perspective the current micro level models do not properly recognize the cultural and biological constraints within which people make reproductive decisions on the macro level demographic transition continues to be linked to processes of modernization arguing that it is necessary to readdress micro level issues in light of the cultural historical variability of particular places and times and to explore linkages between macro and micro level phenomena through which population processes work themselves out the contributors point the way to new theoretical formulations of the concept of culture the nature of macro micro linkages and methods of placing demographic theory within the more encompassing framework of evolutionary theory

this book relies on a global studies interdisciplinary paradigm to study the basic transitions through which latin america has gone over the last millennium the global studies approach relies on an understanding of the distinct transitions through which cultures of latin america have passed as they have adapted to global economic and political forces since the sixteenth century unlike dependency or world systems theories a global studies paradigm does not accept the idea that cultures and peoples are passive to globalization or capitalism this work shows that latin american institutions can only be understood as embedded in latin american culture which is a product of history and adaptation and has interacted with quite distinct global systems for the last five centuries the book presents the case that until very recently the economic institutions of latin america were not capitalistic but either mercantilist or corporatist only since 1985 have latin american countries adopted capitalism and democracy and these have not been a failure while this book stresses political and economic analyses it also examines the impact of corporatism state capitalism on ecosystems demographics social systems and cultural forms the book is a largely upbeat and positive examination of the new phenomenon of globalization in latin america
