2018-12-13

the euract performance agenda eupa of the european academy of teachers in general practice family medicine euract is the third paper in a row following the european definition of general practice family medicine wonca europe in 2002 which identified 6 core competencies and 11 abilities every general practitioner gp should master and the euract educational agenda in 2005 which provided a framework to teach the core competencies by setting learning aims and monitoring their achievement performance in contrast to competence is understood as the level of actual performance in clinical care and communication with patients in daily practice small groups of euract council members from 40 european countries have discussed and developed eupa since 2007 eupa is a general uniform and basic agenda of performance elements every gp masters in daily practice applicable and adaptable to different countries with different systems it deals with the process and result of actual work in daily practice not with a teaching learning situation eupa discusses in depth the psychometrics and edumetrics of performance assessment case vignettes of abilities in gps daily practice illustrate performance and its assessment in every chapter examples of common assessment tools are workplace based assessment by a peer feedback from patients or staff and audit of medical records eupa can help to shape various performance assessment activities held locally in general practice family medicine e g in continuing professional development cycles re certification re accreditation licensing procedures peer hospitation programmes and practice audit programmes in quality management it can give orientation for self assessment for reflective practitioners in their continuing professional development the euract performance agenda eupa encourages general practitioners to initialize performance agendas adapted to their national health system to further strengthen the role of general practice family medicine in their country

Clinical Method

1999

one of the paradoxes of general practice is that we emphasize on the one hand how important it is that the general practitioner learns to tolerate uncertainty and then regret on the other hand that so few general practitioners research the uncertainties they find in their every day work in the first chapter of my first edition of this book i suggested that general practitioners were missing opportunities to

take part in a fascinating and rewarding professional activity because of an unnecessary fear of the unknown and tried to encourage more to try research for themselves there has been an impressive increase in what has been asked about researched and written about in the last decade and this second edition tries to bring up to date the advice i think may help others to become involved in research for themselves the basic principles of good research are of course timeless and apply to enquiry in any discipline however detail changes there are new aids to reviewing literature the increased emphasis in social science research has been matched by a range of new methods of collecting information computers have revolutionized how data is handled and statistics is an ever developing science in its own right the chapters in this book which describe what can be referred to as the technology of the research process have been revised to reflect the impact of these recent developments rather than re written

The State of Medical Education and Practice in the UK

2012
