Nobel Lectures in Physics 1998 this volume is a collection of the nobel lectures delivered by the prizewinners together with their biographies and the presentation speeches by nobel committee members for the period 2006 2010 the criterion for the physics award is to the discoverer of a physical phenomenon that changed our views or to the inventor of a new physical process that gave enormous benefits to either science at large or to the public the biographies are remarkably interesting to read and the nobel lectures provide detailed explanations of the phenomena for which the laureates were awarded the nobel prize aspiring young scientists as well as more experienced ones but also the interested public will learn a lot from and appreciate the geniuses of these narrations list of prizewinners and their discoveries 2006 to john c mather and george f smoot for their discovery of the blackbody

form and anisotropy of the cosmic microwave background radiation the very detailed observations that the laureates have carried out from the COBE satellite have played a major role in the development of modern cosmology into a precise science 2007 to Albert Fert and Peter Grünberg for the discovery of giant magnetoresistance applications of this phenomenon have revolutionized techniques for retrieving data from hard disks the discovery also plays a major role in various magnetic sensors as well as for the development of a new generation of electronics the use of giant magnetoresistance can be regarded as one of the first major applications of nanotechnology 2008 to Yoichiro Nambu for the discovery of the mechanism of spontaneous broken symmetry in subatomic physics and to Makoto Kobayashi and Toshihide Maskawa for the discovery of the origin of the broken symmetry which predicts the existence of at least three families of quarks in nature why is there something instead of nothing why are there so many different elementary particles the laureates presented theoretical insights that give us a deeper understanding of what happens far inside the tiniest building blocks of matter 2009 to Charles Kuen Kao for groundbreaking achievements concerning the transmission of light in fibers for optical communication and to Willard S. Boyle and George E. Smith for the invention of an imaging semiconductor circuit the CCD sensor Kao's discoveries have paved the way for optical fiber technology which today is used for almost all telephony and data communication Boyle and Smith have invented a digital image sensor CCD or charge coupled device which today has become an electronic eye in almost all areas of photography 2010 to Andre Geim and Konstantin Novoselov for groundbreaking experiments regarding the two dimensional material graphene the laureates have shown that a thin flake of ordinary carbon just one atom thick has exceptional properties that originate from the remarkable world of quantum physics

Nobel Lectures In Physiology Or Medicine (2006-2010)

2015-02-16 seamus heaney s nobel lecture captured here in crediting poetry is a powerful defense of poetry as the ship and the anchor of our spirit within an ocean of violent divisive politics and world sorrow beginning with the creaturely existence of his childhood in a thatched farmstead in rural county derry heaney traces his path in the wideness of language it is a way forged by listening to the burbles and squeaks of bbc and radio eireann from a wireless speaker to the triple rhyme in a line of yeats but also to the sound of gunfire in ulster and the keening desolation of all the wounded spots on the face of the earth out of all these sounds heaney discovers the necessity of poetic order an order where we can at last grow up to that which we stored up as we grew it is poetry s ability to convey the forces of the marvelous and the murderous together heaney writes that gives it at once a buoyancy and a holding and persuades us of its truth to life heaney s lecture not only finds a way of crediting poetry without anxiety or apology but it persuades us eloquently and gracefully of the rightness and thereness of our veritable human being

Nobel Lectures, Physiology Or Medicine, 1942-1962 1999 on december 7 2010 mario vargas llosa was awarded the nobel prize in literature his nobel llecture is a resounding tribute to fiction s power to inspire readers to greater ambition to dissent and to political action we would be worse than we are without the good books we have read more conformist not as restless more submissive and the critical spirit the engine of progress would not even exist vargas llosa writes like writing reading is a protest against the insufficiencies of life when we look in fiction for what is missing in life we are saying with no need to say it or even to know it that life as it is does not satisfy our thirst for the absolute the foundation of the human condition and should be better vargas

lossa's lecture is a powerful argument for the necessity of literature in our lives today for as he eloquently writes literature not only submerges us in the dream of beauty and happiness but alerts us to every kind of oppression

Nobel Lectures 2000 the essential lecture delivered by the 2023 nobel laureate in literature published for the first time in a collectible edition if there's any metaphor i would use for the act of writing it would have to be listening says jon fosse in a silent language the lecture he delivered after being awarded the 2023 nobel prize in literature when he writes fosse explains he listens for texts that exist somewhere outside of himself in order to transcribe them before they disappear with reverence and humility fosse traces his relationship to writing and celebrates the capacity of language to embrace the mystery complexity and existential uncertainty of the human experience it is only in the silence that you can hear god's voice he says offering a key to his beloved works of drama and fiction maybe

Nobel Lecture 1982-01-01 the nobel lecture in literature delivered by kazuo ishiguro the remains of the day and when we were orphans at the swedish academy in stockholm sweden on december 7 2017 in an elegant clothbound edition in their announcement of the 2017 nobel prize in literature the swedish academy recognized the emotional force of kazuo ishiguro's fiction and his mastery at uncovering our illusory sense of connection with the world in the eloquent and candid lecture he delivered

upon accepting the award ishiguro reflects on the way he was shaped by his upbringing and on the turning points in his career small scruffy moments quiet private sparks of revelation that made him the writer he is today with the same generous humanity that has graced his novels ishiguro here looks beyond himself to the world that new generations of writers are taking on and what it will mean what it will demand of us to make certain that literature remains not just alive but essential an enduring work on writing and becoming a writer by one of the most accomplished novelists of our generation
