brown adipose tissues it contains state of the art methods from researchers that are world leaders in this field detailed lab protocols range from methods to visualize adipocytes and adipose tissues in humans and experimental models to convert stem cells into white and brown adipocytes in vitro to evaluate aspects of adipocyte metabolism to inducibly knock out genes in adipose tissues and to evaluate transcriptional control of adipogenesis on a global scale the study of adipose tissue goes hand in hand with our global effort to understand and reverse the epidemic of obesity and associated medical complications contributors include leading researchers who have made tremendous contributions to our ability to investigate white and brown adipose tissues the wide variety of experimental approaches detailed within this volume including the evaluation of adipose tissue biology at the molecular biochemical cellular tissue and organismal levels surplus record is the leading independent no 8 three centuries of english idioms their unusual origins and unexpected interpretations to pay through the nose raining cats and dogs by hook or by crook curry favor drink like a fish eat crow we hear such phrases every day but this book is the first truly all encompassing etymological guide to both their meanings and origins spanning more than three centuries take my word for it is a fascinating one of a kind window into the surprisingly short history of idioms in english widely known for his studies of word origins anatoly liberman explains more than one thousand idioms both popular and obscure occurring in both american and british standard english and including many regional expressions the origins and even the precise meaning of most idioms are often obscure and lost in history based on a critical analysis of countless conjectures with exact in depth references rare in the literature on the subject take my word for it provides not only a large corpus of idiomatic phrases but also a vast bibliography detailed indexes and a thesaurus make the content accessible at a glance and liberman s introduction and conclusion add historical dimensions the result of decades of research by a leading authority this book is both instructive and absorbing for scholars and general readers who won t find another resource as comparable in scope or based on data even remotely as exhaustive surplus record is the leading independent business directory of new and used capital equipment machine tools machinery and industrial equipment listing over 120 000 industrial assets since issue vol 99 no 6 manual of trauma management in the dog and cat provides quick access to clinically relevant information on stabilizing diagnosing and managing the trauma patient the book uses an outline format to provide fast access to essential information focusing on practical advice and techniques for treating traumatic injuries manual of trauma management in the dog and cat is an ideal handbook for quickly and confidently managing this common presenting complaint beginning with a concise

summary of the global assessment of traumatized patients the heart of the book is devoted to guidance on managing specific types of trauma following definitive diagnosis manual of trauma management in the dog and cat is a valuable quick reference guide to treating canine and feline trauma patients for general practitioners and emergency specialists alike surplus record is the leading independent business directory of new and used capital equipment machine tools machinery and industrial equipment listing over 110 000 industrial assets since 1924 including metalworking and fabricating machine vol 100 no 3 this book is part of a two volume work that offers a unique blend of information on realistic evaluations of catalyst based synthesis processes using green chemistry principles and the environmental sustainability applications of such processes for biomass conversion refining and petrochemical production the volumes provide a comprehensive resource of state of the art technologies and green chemistry methodologies from researchers academics and chemical and manufacturing industrial scientists the work will be of interest to professors researchers and practitioners in clean energy catalysis green chemistry chemical engineering and manufacturing and environmental sustainability this volume focuses on the potentials recent advances and future prospects of catalysis for biomass conversion and value added chemicals production via green catalytic routes readers are presented with a mechanistic framework assessing the development of product selective catalytic processes for biomass and biomass derived feedstock conversion the book offers a unique combination of contributions from experts working on both lab scale and industrial catalytic processes and provides insight into the use of various catalytic materials e g mineral acids heteropolyacid metal catalysts zeolites metal oxides for clean energy production and environmental sustainability concise english 100 no 4 this special issue on catalysts for syngas production included in the catalysts open access journal shows new research about the development of catalysts and catalytic routes for syngas production and the optimization of the reaction conditions for the process this issue includes ten articles about the different innovative processes for syngas production synthesis gas or syngas is a mixture of hydrogen and carbon monoxide with different chemical composition and h₂ co molar ratios depending on the feedstock and production technology used syngas may be obtained from alternative sources to oil such as natural gas coal biomass organic wastes etc syngas is a very good intermediate for the production of high value compounds at the industrial scale such as hydrogen methanol liquid fuels and a wide range of chemicals accordingly efforts should be made on the co feeding of co₂ with syngas as an alternative for reducing greenhouse gas emissions in addition more syngas will be required in the near future in order to satisfy the demand for synfuels and high value chemicals this is the climactic volume on the archaeological and architectural history from ca 31 b c to a d 365 of the extramural sanctuary of demeter and persephone at cyrene libya it deals with the impact of christianity on the cult and the causes of its decline with particular emphasis on the largest body of evidence recorded anywhere for iconoclastic damage presumably by christian populations to sculpted images of worshippers and twin goddesses the volume traces the characteristics of major demeter sanctuaries elsewhere e g eleusis corinth pergamon acragas and selinus and places cyrene s sanctuary within the context of this development the volume also presents the sanctuary s important lapidary and lead inscriptions as analyzed by joyce reynolds it is the eighth volume in the final reports series for the excavations conducted for the university of michigan and subsequently the
