Logical Investigations Volume 1 2012-11-12

after husserl the study of phenomenology took off in different directions the ambiguity inherent in phenomenology between conscious experience and structural conditions lent itself to a range of interpretations many existentialists developed phenomenology as conscious experience to analyse ethics and religion other phenomenologists developed notions of structural conditions to explore questions of science mathematics and conceptualization phenomenology responses and developments covers all the major innovators in phenomenology notably sartre merleau ponty and the later heidegger and the major schools and issues the volume also shows how phenomenological thinking encounters a limit a limit most apparent in the aesthetical and hermeneutical development of phenomenology the volume closes with an examination of the furthering of the division between analytic and continental philosophy

End of Phenomenology 2014-06-04

this volume identifies and develops how philosophy of mind and phenomenology interact in both conceptual and empirically informed ways the objective is to demonstrate that phenomenology as the first personal study of the contents and structures of our mentality can provide us with insights into the understanding of the mind and can complement strictly analytical or empirically informed approaches to the study of the mind insofar as phenomenology as the study or science of phenomena allows the mind to appear this collection shows how the mind can reappear through a constructive dialogue between different ways phenomenological analytical and empirical of understanding mentality

Advancing Phenomenology 2010-09-08

the current revival of interest in ethics in literary criticism coincides fortuitously with a revival of interest in love in philosophy the literary return to ethics also coincides with a spate of neuroscientific discoveries about cognition and emotion but without a philosophical grounding this new

work cannot speak convincingly about literature's relationship to our ethical lives jean luc marion's articulation of a phenomenology of love provides this philosophical grounding the phenomenology of love and reading accepts jean luc marion's argument that love matters for who we are more than anything more than cognition and more than being itself cassandra falke shows how reading can strengthen our capacity to love by giving us practice in love's habits attention empathy and a willingness to be overwhelmed confounding our expectations literature equips us for the confounding events of love which falke suggests are not rare and fleeting but rather constitute the most meaningful and durable part of our everyday life
