gender justice and the wars in iraq offers a feminist critique and reconstruction of just war theory it points out gender biases in the just war tradition and suggests alternative jus ad bellum and jus in bello standards that emphasize women political marginality and empathy laura sjoberg applies this feminist just war theory to analyze the wars in iraq since the end of the cold war the first gulf war the war of sanctions and the second gulf war by examining international political discourse from and about iraq it shows where war generally and just war specifically are gendered through the stories of key just war characters like jessica lynch this book reveals where women are omitted and subordinated in global politics sjoberg suggests that dialogue and empathy replace righteousness in just war thinking for the good of human safety everywhere and concludes with alternative visions of gulf war policies inspired by feminist just war theory they are canadas heroes recipients of the prestigious star of courage and these are the stories of their bravery images that document the changes in and challenges of life in the real maine in 1933 the boeing aircraft company set a new standard for air transportation by introducing the boeing 247 a graceful all metal twin engined aircraft that was 50 percent faster than the competition van der linden traces the development of the 247 and the odyssey from its brief period of dominance for the past 20 years corporations have been receiving huge tax breaks and subsidies in the name of jobs jobs jobs but as greg leroy demonstrates in this important new book it s become a costly scam playing states and communities off against each other in a bidding war for jobs corporations reduce their taxes to next to nothing and win subsidy packages that routinely exceed 100 000 per job but the subsidies come with few strings attached so companies feel free to provide fewer jobs or none at all or even outsource and lay people off they are also free to pay poverty wages without health care or other benefits all too often communities lose twice they lose jobs or gain jobs so low paying they do nothing to help the community and lose revenue due to the huge corporate tax breaks that means fewer resources for maintaining schools public services and infrastructure in the end the local governments that were hoping for economic revitalization are actually worse off they re forced to raise taxes on struggling small businesses and working families or reduce services or both greg leroy uses up to the minute examples naming names including wal mart raytheon fidelity bank of america dell and boeing to reveal how the process works he shows how carefully corporations orchestrate the bidding wars between states and communities he exposes shadowy site location consultants who play both sides against the middle and he dissects government and corporate mumbo jumbo with plain talk the book concludes by offering common sense reforms that will give taxpayers powerful new tools to deter future abuses and redirect taxpayer investments in ways that will really pay off deals with the result of a study conducted by the fdic on banking crisis of the 1980s and early 1990s examines the evolution of the processes used by fdic and rtc to resolve banking problems and protect depositors and dispose of the assets of the failed institutions please not in this strategically

elizabeth thompson develops the idea of the pioneer woman as an archetypal character firmly entrenched in canadian fiction and the canadian consciousness thompson s broad definition of the concept of pioneer can be seen to reflect the history of canadian women starting with the pioneers of settlement and continuing

through the pioneers of spiritual perfection and psychological liberation various versions of the pioneer woman have appeared in english canadian fiction since traill s development of the character type sara jeannette duncan s the imperialist and ralph connor s the man from glengarry and glengarry school days feature pioneer women who cope not only with physical frontiers but also with those grounded in social and personal concerns more recently margaret laurence used this character type in the stone angel a jest of god and the diviners with characters who inhabit internal personal frontiers thompson argues that the longevity of this character type in english canadian fiction reveals an affinity between the pioneer woman and a common conception of the role of women in canadian society she suggests that the role for women proposed by the early immigrants was an appropriate choice for the canadian frontier regardless of the location and nature of that frontier

fans of baseball football basketball and hockey have long been exploited and oppressed by the monopolistic practices of team owners the time has come for a revolution in the organization of major u s sports fans of the world unite is a clarion call to sports fans appealing to anyone who is in despair due to the greed and incompetence of team owners this book proposes a significant restructuring of sports leagues it sets out a rational program for a revolution that will serve the best interests of the fans and of the sport itself but stephen f ross and stefan szymanski are no marxists they show how a revolution in the organization of sports might even benefit the owners by harnessing the power of markets sports leagues can be made both more responsive to the needs of the fans and more efficient ross and szymanski have spent many years evaluating the ways in which leagues work across the globe drawing on

their extensive study of leagues the authors boil down their plan to two major reforms borrowing from nascar they propose that team owners should not own sports leagues as well rather league ownership should be separate their second proposal is drawn from soccer introduce competition through a promotion and relegation system in this type of system the worst teams in the league are kicked out at the end of the season and replaced by the best performing teams in the next division down this gives poor performing teams incentive to step up their game and allows fresh blood to enter the leagues if the poor performers fail to do so the main goal of these reforms is to align the financial interest of those who own the league with the best interests of the fans and the sport having laid out the problem and the solution the authors skillfully address practical implications of introducing their scheme suggesting how leagues might at least make some changes if not all of those suggested the time for change has come armed with this book and with fairness on their side fans can set forth to begin a revolution

for the past 20 years corporations have been receiving huge tax breaks and subsidies in the name of jobs jobs jobs but as greg leroy demonstrates in this important new book it s become a costly scam playing states and communities off against each other in a bidding war for jobs corporations reduce their taxes to next to nothing and win subsidy packages that routinely exceed 100 000 per job but the subsidies come with few strings attached so companies feel free to provide fewer jobs or none at all or even outsource and lay people off they are also free to pay poverty wages without health care or other benefits all too often communities lose twice they lose jobs or gain jobs so low paying they do nothing to help the community and lose revenue due to the huge corporate tax breaks that means fewer resources for maintaining schools public services and infrastructure in the end the local governments that were hoping for economic revitalization are actually worse off they re forced to raise taxes on struggling small

businesses and working families or reduce services or both greg leroy uses up to the minute examples naming names including wal mart raytheon fidelity bank of america dell and boeing to reveal how the process works he shows how carefully corporations orchestrate the bidding wars between states and communities he exposes shadowy site location consultants who play both sides against the middle and he dissects government and corporate mumbo jumbo with plain talk the book concludes by offering common sense reforms that will give taxpayers powerful new tools to deter future abuses and redirect taxpayer investments in ways that will really pay off

this book provides a unique exposé of women in family businesses in the australian commercial fishing industry and explores their visibility contributions barriers and opportunities for participation and

knowledge recognising the need to move beyond an exploration of women s roles this book applies a detailed well articulated and sophisticated feminist post structural approach which explores women s identity power knowledge and positioning in relation to the current industry climate in the context of discourses of crisis and sustainability this is particularly pertinent with climate change looming as the next industry crisis as such this book has significant interdisciplinary appeal and will benefit feminist gender natural resource management and fisheries scholars and policy makers ultimately it is hoped that this book will have a substantial impact on industry women in both australia and elsewhere and reduce their marginalisation increase awareness about their contributions and result in greater opportunities to voice their unique knowledge on social issues with a view to enhancing industry sustainability
