Comprehensive Cervical Cancer Control

2006

most women who die from cervical cancer particularly in developing countries are in the prime of their life they may be raising children caring for their family and contributing to the social and economic life of their town or village their death is both a personal tragedy and a sad and unnecessary loss to their family and their community unnecessary because there is compelling evidence as this guide makes clear that cervical cancer is one of the most preventable and treatable forms of cancer as long as it is detected early and managed effectively unfortunately the majority of women in developing countries still do not have access to cervical cancer prevention programmes the consequence is that often cervical cancer is not detected until it is too late to be cured an urgent effort is required if this situation is to be corrected this guide is intended to help those responsible for providing services aimed at reducing the burden posed by cervical cancer for women communities and health systems it focuses on the knowledge and skills needed by health care providers at different levels of care

Cancer Prevention

2012-04-20

in not quite a cancer vaccine medical anthropologist s d gottlieb explores how the vaccine gardasil developed against the most common sexually transmitted infection human papillomavirus hpv was marketed primarily as a cervical cancer vaccine gardasil quickly became implicated in two pre existing debates about adolescent sexuality and pediatric vaccinations more generally prior to its market debut gardasil seemed to offer female empowerment touting protection against hpv and its potential for cervical cancer gottlieb questions the marketing pitch s vaunted promise and asks why vaccine marketing unnecessarily

gendered the vaccine's utility undermining gardasil's benefit for men and women alike this book demonstrates why in the ten years since gardasil's u.s. launch its low rates of public acceptance have their origins in the early days of the vaccine dissemination not quite a cancer vaccine addresses the on going expansion in u.s. healthcare of patients as consumers and the ubiquitous and sometimes insidious health marketing of large pharma
