the pc revolution the advent of pdas and growth in the use of wireless lans have changed the way we live our lives next on the horizon is the application of new technologies that will change the way we drive our cars de rigeur for many drivers electronic passes and gps systems represent the tip of the iceberg in terms of emerging applications

Juan Manuel Fangio

filling the many gaps in formula 1 records this book re writes the racing history books the history of f1 can be neatly divided into two eras the first formally ending january 1980 when the terms grand prix and world championship became synonymous although there would be three more non championship races after that date however up to january 1973 over half of f1 races were not included in the championship results for the spurious reason that each country should have just a single f1 race the classification of many f1 races as non championship did a disservice to the achievements of drivers of the fangio moss clark and

stewart era and even more so to the four pre championship years which began in 1946 when today a commentator says rosberg's 16th win equals the f1 wins of stirling moss this is manifestly untrue if the same drivers in the same f1 cars compete at the same tracks and over a similar distance then each race deserves to have its place in the records as a championship quality event this book includes such races alongside contemporary championship races and combined with known figures since 1980 produces what can surely be accepted as the real score of formula 1
