although readers of detective fiction ordinarily expect to learn the mystery's solution at the end there is another kind of detective story the history of which encompasses writers as diverse as poe borges robbe grillet auster and stephen king that ends with a question rather than an answer the detective not only fails to solve the crime but also confronts insoluble mysteries of interpretation and identity as the contributors to detecting texts contend such stories belong to a distinct genre the metaphysical detective story in which the detective hero's inability to interpret the mystery inevitably casts doubt on the reader's similar attempt to make sense of the text and the world detecting texts includes an introduction by the editors that defines the metaphysical detective story and traces its history from poe's classic tales to today's postmodernist experiments in addition to the editors contributors include stephen bernstein joel black john t irwin jeffrey t nealon and others texts in detective fiction and the rise of the japanese novel satoru saito sheds light on the deep structural and conceptual similarities between detective fiction and the novel in prewar japan arguing that the interactions between the two genres were not marginal occurrences but instead critical moments of literary engagement saito demonstrates how detective fiction provided japanese authors with the necessary frameworks through which to examine and critique the nature and implications of japan's literary formations and its modernizing society through a series of close readings of literary texts by canonical writers of japanese literature and detective fiction including tsubouchi shoyo natsume soseki shimazaki toson sato haruo kuroiwa ruiko and edogawa ranpo saito explores how the detective story functioned to mediate the tenuous relationships between literature and society as well as between subject and authority that made literary texts significant as political acts by foregrounding the often implicit and contradictory strategies of literary texts choice of narrative forms symbolic mappings and intertextual evocations among others this study examines in detail the intricate interactions between detective fiction and the novel that shaped the development of modern japanese literature the locked room mystery is one of the iconic creations of popular fiction michael cook's critical study reveals how this archetypal form of the puzzle story has had a significant effect in shaping the immensely popular genre of detective fiction the book includes analysis of texts from poe to the present day this book focuses on the distinctive role that artists have played in detective fiction as detectives as villains and victims and as bystanders with a few significant exceptions literary detectives have always identified themselves as essentially the deconstructors of the artful crimes of others they may use various methods ratiocinative scientific or hard boiled but they always unravel the threads that the villains have woven into delective covers

for their crimes the detective does in the end produce a work of art a narrative that explains everything that needs explanation but the detective s moral work is often juxtaposed to the aesthetic work of the painters poets and writers that the detective encounters during an investigation the author surveys this juxtaposition in works by important authors from the early development of the genre poe conan doyle the golden age bentley christie sayers james et al and the hard boiled era hammett chandler macdonald spicer et al critics typically regard abe kobo 1924 93 as writing against realism due to his avant garde aesthetics that challenged the naturalist realism dominating the literary mainstream and the socialist realism of the orthodox left in postwar japan he considered his work thoroughly realist however and starting in the early 1950s in a series of avant garde art and literary groups he championed the possibility of a vital contemporary realism that challenged the reader to question the reality represented in the text through increasingly self conscious writing strategies through a reassessment of the texts in which he worked out his theory of realism this study traces the development of his commitment to making truth from a lie to fiction drama and reportage that openly display their artifice key argues that the reflexivity of abe s texts which lay bare their own processes of artificial construction in order to reflect how our everyday sense of reality is constructed and maintained created a critical space for metatextual ideas that were not acknowledged by the literary establishment of his time and have yet to be recognized by critics today undergirding his theory and practice of realism was a critique of conventional documentary and of the classic detective story the texts examined here expose the degree to which the documentarian and the detective are active fabricators of meaning rather than neutral observers of fact by paying close attention to the tension between the documentary and the fictive in abe s works key draws out the ethical implications of his documentary approach arguing persuasively that the documentary qualities of his writing such as its valorization of objectivity over psychologism and the realm of concrete things over abstraction are strategies for challenging the dominant assumptions about what constitutes good ethics and good art as well as the relationship between these two spheres this book offers a bold critical method for reading gertrude stein s work on its own terms by forgoing conventional explanation and adopting stein s radical approach to meaning and knowledge inspired by the immanence of landscape both of provence where she travelled in the 1920s and the spatial relations of landscape painting stein presents a new model of meaning whereby making sense is an activity distributed in a text and across successive texts from love poetry to plays and portraiture linda voris offers close readings of stein s most anthologized and less known writing in a case study of a new method of interpretation by practicing stein s innovative means of making sense voris framework offered by neo aristotelian virtue ethics this book makes the case that moral philosophers ought to take murder mysteries seriously seeing them as a source of ethical insight and as a tool that can be used to spark the ethical imagination detective fiction is a literary genre that asks readers to consider questions of good and evil justice and injustice virtue and vice and is consequently a profoundly and inescapably ethical genre moreover in the figure of the detective readers are presented with an accessible role model who demonstrates the virtues of honesty courage and a commitment to justice that are required by those who want to live well as a virtue ethicist would understand it this book also offers a critique of contemporary moral philosophy and considers what features a neo aristotelian conception of autonomy might display christianity and the detective story is the first book to gather together academic criticism on this particular connection between religion and popular culture the articles cover the origin of this relationship in the works of g k chesterton examine its development through the golden age of mystery writers such as dorothy l religious insight this book explores the thought of and is dedicated to david frisby one of the leading sociologists of the late twentieth and early twenty first centuries presenting original examinations of his unique social theory and underlining his interdisciplinary approach to the critical interpretation of modern metropolitan society and culture it emphasises frisby s legacy in highlighting the role of the social researcher as a collector reader observer detective and archivist of the phenomena and ideas that exemplify the modern metropolis as society with contributions from for the first time in england in 1988 and in the u s in 1990 has been widely categorised as detective fiction among literary scholars and critics there is however a striking diversity and lack of consensus regarding the classification of the trilogy within the existing genre forms of the detective novel among others auster s stories are described as metaanti detective fiction mysteries about mysteries a strangely humorous working of the detective novel very soft boiled a metamystery glassy little jigsaws a mixture between the detective story and the nouveau roman a metaphysical detective story a deconstruction of the detective novel antidetective fiction a late example of the anti detective genre and being related to hard boiled novels by authors like hammett and chandler such a striking lack of agreement within the secondary literature has inspired me to write this paper it does not however elaborate further an this diversity of viewpoints although they all seem to have a certain validity and underline the richness and diversity of auster s detective trilogy neither do i intend to coin a new term for auster s detective fiction i would rather place the new york trilogy within a more general and open literary form namely postmodern detective fiction this classifies paul auster as an american writer who is part of the generation that immediately

followed the classical literary movement of american postmodernism of the 60s and 70s his writing demonstrates that he has been influenced by the revolutionary and innovative postmodern concepts characterised by the notion of anything goes an a planet of multiplicity as well as by french poststructuralism he may however be distinguished from a traditional postmodern writer through a certain coherence in the narrative discourse a neo realistic approach and by showing a certain responsibility for social and moral aspects going beyond mere metafictional and subversive elements many of the ideas of postmodernism were formulated in theoretical literary texts of the 60s and 70s and based an formal experiments include the attempt of subverting the ability of language to refer truthfully to the world and a radical turning away from coherent narrative discourse and plot these ideas seem to have been intemalized by the new generation of postmodern writers of the 80s to such 50 masterpieces
