Systematic Assessment of Learning

Coaches

Outcomes 2002

this book is designed to be the comprehensive reference which focuses on the development of the most commonly used type of classroom assessment the multiple choice exam

Multiple Choice Questions for Economics with Answers 2013-06-01

multiple choice questions for economics is based upon the syllabus requirements of the international baccalaureate diploma for economics for first examinations in may 2013 at both standard and higher level is structured in the study order of our textbook economics from a global perspective third edition which exactly follows the current ib diploma syllabus is sequenced by section chapter and topic as in our textbook has higher level only questions clearly marked has over 450 questions with many new questions covering the mathematical content of the current syllabus has answers that can be removed if using the book for course tests is ideal for use with economics from a global perspective is at a suitable level for use with gce a level courses professional courses and university introductory courses

Developing and Validating Multiple-choice Test Items 2004

Anatomy 2013-10-22

anatomy 1800 multiple choice questions contains 1 800 multiple choice questions related to anatomy the questions are supported by illustrations and arranged into nine sections upper limb lower limb thorax abdomen pelvis and perineum head and neck nervous system histology and embryology in the histology section the questions in each of the six standard formats are arranged in the same sequence as follows the cell the tissues commencing with the epithelia and ending with nervous tissue and the systems commencing with the cardiovascular and ending with the reproductive readers will encounter questions dealing with the spine of the scapula the vein that pierces the clavipectoral fascia branch of the axillary artery and the quadriceps femoris muscle other topics include muscle pair inserted into iliotibial tract bony prominences on which you kneel muscle that flexes hip and knee and the chromosomal formula of the oocyte at ovulation this text also discusses the rate of regeneration of peripheral nerves following injury structures that occupy the carotid sheath and the location of sphincter urethrae this book will be extremely valuable to students and teachers of anatomy

Constructing Test Items 1997-12-31

constructing test items for standardized tests of achievement ability and aptitude is a task of enormous importance the interpretability of a test s scores flows directly from the quality of its items and exercises concomitant with score interpretability is the notion that including only carefully crafted test items and the primary method by which the skilled test developer reduces unwanted error variance or errors of measurement and thereby increases the test score s reliability is to increase the test constructor s awareness of this source of measurement error and then to describe methods for identifying and reducing measurement error

oxidative stress and hormesis in evolutionary ecology and physiology a marriage between mechanistic and evolutionary approaches

oxidative stress and hormesis in evolutionary ecology and physiology a marriage between mechanistic and evolutionary approaches
and minimizing it during item construction and later review
persons involved in assessment are keenly aware of the increased attention given to alternative formats for test items in recent years yet in many writers zeal to be curriculum relevant or authentic or realistic the items are often developed seemingly without conscious thought to the interpretations that may be garnered from them this book argues that the format for such alternative items and exercises also requires rigor in their construction and even offers some solutions as one chapter is devoted to these alternative formats this book addresses major issues in constructing test items by focusing on four ideas first it describes the characteristics and functions of test items a second feature of this book is the presentation of editorial guidelines for writing test items in all of the commonly used item formats including constructed response formats and performance tests a third aspect of this book is the presentation of methods for determining the quality of test items finally this book presents a compendium of important issues about test items including procedures for ordering items in a test ethical and legal concerns over using copyrighted test items item scoring schemes computer generated items and more

125 Multiple-Choice Questions in Java 2003-04-01

5 timed tests each offering 25 challenging multiple choice questions the questions mostly stay within the range of the standard ap cs curriculum
