Great Small Fiats 2014-05-19 in deciding which models to choose for inclusion in this book selected from fiat's huge inventory the author concentrated on three criteria greatness size and emotion where size is an easy parameter to qualify greatness is more complicated because it is a combination of both the manufacturer's and the public's opinion a car that is highly regarded by the public may not have been a commercial success and vice versa a truly great car is one that works well for both parties emotion may be considered to be an element of greatness in that the public's love for a car is a fantastic benefit for a manufacturer and must be treasured fiat have made the mistake of improving an icon on several occasions only to find that public opinion went against them fortunately fiat has been magnanimous enough to respond by giving the car buying public more of what it wants as long as they continue to do so then fiat's reputation as the world's greatest small car manufacturer is set to continue the author chose the topolino as the starting point as the car fulfils all the criteria and it was the first fiat built in the late 1930s to satisfy the italian public's new found desire for mobilisation the old conventions of car production were turned upside down with the arrival of the 600 which revolutionised car production techniques and maximised on passenger space and performance at minimal cost these principals continued via a succession of models which include the 500 850 126 127 through to more recent models like the cinquecento and seicento running in parallel with these cheeky fiats this book covers a range of slightly larger cars that were built in huge numbers though rather staid in appearance the 1950s millecento was family transport for millions of italians covering three decades four when the indian built cars are included similarly the 128 panda and uno were the italian small cars of the 70s 80s and 90s nuova panda carries the banner to the present day
