An Impartial History of the Naval, Military and Political Events in Europe, from the commencement of the French Revolution to the entrance

of the Allies into Paris and the conclusion of a general peace ... Embellished with fine engravings 1815 the phenomenon of false allegations of mental illness is as old as our first interactions as human beings every one of us has described some other person as crazy or insane and most all of us have had periods moments at least of madness but it took the confluence of the law and medical science mad doctors alienists priests and barristers to raise the matter to a level of science capable of being used by conniving relatives designing families and scheming neighbors to destroy people who found themselves in the way people whose removal could provide their survivors with money or property or other less frivolous benefits girl interrupted in only a recent example and reversing this sort of diagnosis and incarceration became increasingly more difficult as even the most temperate attempt to leave these homes or hospitals was deemed crazy kept in a madhouse one became a little mad as jack nicholson and ken kesey explain in one flew over the cuckoos nest in this sadly terrifying emotionally moving and occasionally hilarious book twelve cases of contested lunacy are offered as examples of the shifting arguments regarding what constituted sanity and insanity they offer unique insight into the fears of sexuality inherited madness greed and fraud until public feeling shifted and turned against the rising alienists who would challenge liberty and freedom of people who were perhaps simply difficult but were turned into victims of this unscrupulous trade this fascinating book is filled with stories almost impossible to believe but wildly engaging a book one will not soon forget
