 ssa a topical issue with regards to european security while the literature on ssa
 has increased significantly in the past decade too little remain in the way of
 comparative analyses of ssa case studies that are geared toward theory development
 this collection strives to push the ssa literature in that direction one key
 question it focuses on is whether the eu pursues a holistic approach vis à vis ssa

 conflict management peacebuilding and statebuilding have produced a wide variety of
 outcomes that range from the failure to reform any or all of the sub set of security
 sectors police justice military etc to complete and integrated reform the volume

this book examines the importance possibilities and complexities of the university
 as an ethical academy universities may be seen as an evolving network of ethical
 systems that govern teaching research service and administration however the
 university system is changing adding new rules new ways of working and new ideas to
 its repertoire of operations the theories that we have traditionally employed may be
 now put up for questioning and examination universities now comprise a spectacularly
 large body of regulations and policies both internal and external that cover issues
 from cheating human subject research academic integrity research on animals
 environmental ethics and the ethics of sexual harassment these interconnected
 ecological systems of ethics have not emerged in one rational process but rather
 reflect the ongoing historical and dynamic development of law and ethics in relation
 to the creation of new values this has played out in a particular political and
 ideological environment which has produced the university as a set of practices and
 beliefs and a particular set of rationalities this book was originally published as
 a special issue of the journal educational philosophy and theory
