what s the point of international relations casts a critical eye on what it is that we think we are doing when we study and teach international relations ir it brings together many of ir s leading thinkers to challenge conventional understandings of the discipline s origins history and composition it sees ir as a discipline that has much to learn from others which has not yet lived up to its ambitions or potential and where much work remains to be done at the same time it finds much that is worth celebrating in the discipline s growing pluralism and views ir as a

deeply political critical and normative pursuit the volume is divided into five parts what is the point of it the origins of a discipline policing the boundaries engaging the world imagining the future although each chapter alludes to and or discusses central aspects of all of these components each part is designed to capture the central thrust of the concerns of the contributors moving beyond western debate orthodox perspectives and uncritical histories this volume is essential reading for all scholars and advanced level students concerned with the history development and future of international relations

in modern world politics there exists a dynamic of change and an observable pattern of phenomena these phenomena consist of driving forces of new paradigms that their exigencies induce of new epochs that such exigencies provoke of adjustments made by states who may be initiators new comers late comers or inactive and of shifts in the hierarchy of world powers that the differentiated rate of their adjustment success produces causing what power shift theory refers to as hegemonic transition this book examines the conditions under which such change occurs the recurrence of such change in various epochs of the modern era and the pattern that such recurrence displays in order to explain the recurrent shift in the hierarchy of wealth status and power among peer states

neutrality in world history provides a cogent synthesis of five hundred years of neutrality in global history author leos müller argues that neutrality and neutral states such as switzerland sweden belgium have played an important historical role in implementing the free trade paradigm shaping the laws of nations and humanitarianism and serving as key global centers of trade and finance offering an intriguing alternative to dominant world history narratives which hinge primarily on the international relations and policies of empires and global powers neutrality in world history provides students with a distinctive introduction to neutrality s place in world history

foreign policy and domestic policy feed into each other to a large degree the latter informs the former this book demonstrates the relationship between the two paying particularly close attention to how south africa envisioned its foreign policy during the negotiation process importantly it spells out how south africa s foreign policy has evolved since the early 1990s the critics of south africa s foreign policy often question the motives behind the country s involvement in african and global affairs the contributions here demonstrate the complex nature of foreign policy making approaching the subject both from a broad theoretical perspective and specifically through empirical case studies the book will appeal to political scientists historians policy practitioners international relations specialists and government officials and their advisors as well as international relations theorists

this book brings postcolonial critique directly to bear on established ways of theorizing international relations its primary concern is with the non european world and its relations with the north in advancing an alternative conception of relations international the book draws on alternative source material and different forms of writing it also features short stories an interview and explores the role of poetics and performance the suzerainty of the disciplinary writ is challenged on three primary grounds firstly on its eurocentrism which leads the discipline to pass lightly over the distinctive life experiences of most of the world s people secondly on the discipline s failure to engage in any systematic way with other bodies of knowledge about the

international as for example international political economy postcolonialism and development  
lastly it confronts the top down nature of the politics of the discipline and that seldom addresses  
everyday life from squatter towns to the evasions of the poor from law through to literature this  
work raises a number of problems for international relations it challenges a colonial mindset de  
centres the west and opens the field to new approaches that are far more inter disciplinary than  
international relations generally allows it is a provocative contribution for students and scholars  
of ir and postcolonial studies alike

the mind of edmund burke has attracted the attention of countless political theorists historians  
and biographers nonetheless one aspect of burke s thinking has been neglected his perspective  
on international relations this book seeks to address that gap by analysing burke s reaction to  
the international events of his century the book argues that the tension between burke s  
constitutionalism and crusading is ultimately reconciled by his broader conception of  
international legitimacy and order it is only by widening the definition of international theory to  
include domestic as well as international politics that one can resolve this tension in burke s  
theory and arrive at a richer understanding of the nature of international order both historically  
and today

for forty years ajis has been a trusted plat form for researchers scholars and practitioners  
serving as a conduit for the exchange of ideas the dissemination of cutting edge research and  
the cultivation of intellectual dialogue many of us found this journal a space for ruminating  
discussing and developing our own narratives on our islamic heritage and what it means in the  
contemporary world especially compared to anti islamic biases in other corners of academia ajis

is a coming home one constant throughout the past four decades is the journal's commitment to scholarship that documents and explores Islam's rich religious, intellectual, legal, philosophical, and social heritages. The assumption is that these various perspectives have meaningful things to say about the human condition and our place in the world. Debate, discussion, and disagreement all appear in these pages but always grounded in an underlying steadfastness that Islam is a faith tradition that is not obsolete; that Muslims can contribute positively to humanity's betterment. That said, the journal is not a place of religious homilies. This is an academic journal with a double-blind peer review process. Articles that are published thus pass muster in the discipline in which they conduct their research. Let us thank the authors who have entrusted us with their groundbreaking research, pushing the boundaries of knowledge and enriching our understanding of critical issues in our disciplines. Let us thank the journal's editors, editorial boards, diligent reviewers, and committed staff members who have meticulously upheld the journal's reputation for excellence, contributing to its sustained success.

Chinese President Xi Jinping's One Belt One Road (OBOR) vision, heralded as an attempt to revive the pre-modern Silk Route, is intended to strengthen West Asia's economic links with China through ambitious infrastructural projects. Central to this are fast-track rail links funded by the newly established Asia Infrastructure and Investment Bank (AIIB), which has its headquarters in Beijing. This book explores the implications of OBOR and the AIIB for the Middle East, West Asia, and addresses a number of key strategic questions arising from China's new initiatives. These include: how far are the strategic imperatives underpinning China's policies connected to the political dynamics of Xinjiang and the spread of radical Islam in Central Asia? How are Middle Eastern stakeholders' views of China affected by the new initiatives? How does China's increasing involvement in the Middle East, West Asia affect other regional powers with ambitions in the region, notably Russia? The book also considers the impact of China's increasing presence on individual countries, including Saudi Arabia and Israel.

This book contributes to the multidisciplinary debate about social-ecological systems (SES) within the perspective of rethinking the nature of interaction between these systems, especially in the Anthropocene era. Most chapters either deliberate on risk dynamics threatening current SES or stimulate thought processes to manage such risks and related negative implications. After analyzing the main drivers of SES vulnerability, the book highlights the shifts to be made to enhance the sustainability and resilience of these systems, mainly the integration and restructuring of governance frameworks, the reorganization of production and consumption

systems far from conventional models based on consumerism the elaboration of mitigation adaptation and sdgs implementation measures from a co benefit perspective and the consideration of appropriate approaches and paradigms while elaborating and implementing response mechanisms this volume is relevant to researchers experts students practitioners and decision makers from different scales and spheres
