the letters is this volume cover the eighteen months katherine mansfield spent in england france and switzerland from may 1920 to the end of 1921 it is the period of her finest stories and when her life took its most decisive turn there is a subtle but unmistakable change in her expectations a new spiritual insistence that is both elusive and resolute from her chekovian acceptance that they are cutting down the cherry trees she derives a tough existential directness the little boat enters the dark fearful gulf nobody listens the shadowy figure rows

on one ought to sit still and uncover one's eyes there is a determined push not always successful towards a necessary honesty as much as to artistic achievement while those qualities of her earlier correspondence remain undiminished the precision and directness the intelligence and wit the dark incisiveness as much as sheer fun above all perhaps these letters comprise a record of very considerable courage against increasingly adverse odds as they approach the final years of her life

taking into account the popularity and variety of the genre this collaborative volume considers a wide range of english romantic

autobiographical writers and modes including working class autobiography the familiar essay and the staged presence in the wake of rousseau s confessions autobiography became an increasingly popular as well as a literary mode of writing by the early nineteenth century this hybrid and metamorphic genre is found everywhere in english letters in prose and poetry by men and women of all classes as such it resists attempts to provide a coherent historical account or establish a neat theoretical paradigm the contributors to romantic autobiography in england embrace the challenge focusing not only on major writers such as william wordsworth de quincey and mary shelley but on more recent additions to the canon such as mary robinson dorothy wordsworth and mary hays there are also essays on the scandalous memoirs of mrs billington and on joseph severn s autobiographical scripting of himself as the friend of keats the result is an exploratory and provisional mapping of the field provocative rather than exhaustive intended to inspire future scholarship and teaching

progressive nineteenth century americans believed firmly that human perfection could be achieved with the aid of modern science to many the science of that turbulent age appeared to offer bright new answers to life s age old questions such a climate not surprisingly fostered the growth of what we now view as pseudo sciences disciplines delicately balancing a dubious inductive methodology with moral and spiritual concerns disseminated with a combination of aggressive entrepreneurship and sheer entertainment such sciences as mesmerism spiritualism homoeopathy hydropathy and phrenology were warmly received not only by the uninformed and credulous but also by the respectable and educated rationalistic egalitarian and utilitarian they struck familiar and reassuring chords in american ears and gave credence to the message of reformers that health and happiness are accessible to all as the contributors to this volume show the diffusion and practice of these pseudo

sciences intertwined with all the major medical cultural religious and philosophical revolutions in nineteenth century america hydropathy and particularly homoeopathy for example enjoyed sufficient respectability for a time to challenge orthodox medicine the claims of mesmerists and spiritualists appeared to offer hope for a new moral social order daring flights of pseudo scientific thought even ventured into such areas as art and human sexuality and all the pseudo sciences resonated with the communitarian and women s rights movements this important exploration of the major nineteenth century pseudo sciences provides fresh perspectives on the american society of that era and on the history of the orthodox sciences a number of which grew out of the fertile soil plowed by the pseudo scientists

a comparative look at religion and spirituality in postcolonial china and india the modern spirit of asia challenges the notion that modernity in china and india are derivative imitations of the west arguing that these societies have transformed their ancient traditions in unique and distinctive ways peter van der veer begins with nineteenth century imperial history exploring how western concepts of spirituality secularity religion and magic were used to translate the traditions of india and china he traces how modern western notions of religion and magic were incorporated into the respective nation building projects of chinese and indian nationalist intellectuals yet how modernity in china and india is by no means uniform while religion is a centerpiece of indian nationalism it is viewed in china as an obstacle to progress that must be marginalized and controlled the modern spirit of asia moves deftly from kandinsky s understanding of spirituality in art to indian yoga and chinese qi gong from modern theories of secularism to histories of christian conversion from orientalist constructions of religion to chinese campaigns against magic and superstition and from muslim kashmir to muslim xinjiang van der veer an outspoken proponent of the importance of comparative studies of religion and society eloquently makes his case in this groundbreaking examination of the spiritual and the secular in china and india

since the dawn of history people have used charms and spells to try to control their environment and forms of divination to try to foresee the otherwise unpredictable chances of life many of these techniques were called superstitious by educated elites for centuries religious believers used superstition as a term of abuse to denounce another religion that they thought inferior or to criticize their fellow believers for practising their faith wrongly from the middle ages to the enlightenment scholars argued over what superstition was how to identify it and how to persuade people to avoid it learned believers in demons and witchcraft in their treatises and sermons tried to make rational sense of popular superstitions by blaming them on the deceptive tricks of seductive demons every major movement in christian thought from rival schools of medieval theology through to the renaissance the reformation and the enlightenment added new twists to the debates over superstition protestants saw catholics as superstitious and vice versa enlightened philosophers mocked traditional cults as superstitions eventually the learned lost their worry about popular belief and turned instead to chronicling and preserving superstitious customs as folklore and ethnic heritage enchanted europe is the first comprehensive integrated account of western europe s long complex dialogue with its own folklore and popular beliefs drawing on many little known and rarely used texts euan cameron constructs a compelling narrative of the rise diversification and decline of popular superstition in the european mind

in popular thought christianity is often figured as being opposed to dance conventional scholarship traces this controversy back to the middle ages throughout the medieval era the latin church denounced and prohibited dancing in religious and secular realms often aligning it with demonic intervention lust pride and sacrilege historical sources however suggest that medieval dance was a complex and ambivalent phenomenon during the high and late middle ages western theologians liturgists and mystics not only tolerated dance they transformed it into a dynamic component of religious thought and practice this book investigates how dance became a legitimate form of devotion in christian culture sacred dance functioned to gloss scripture frame spiritual experience and imagine the afterlife invoking numerous manuscript and visual sources biblical commentaries sermons saints lives ecclesiastical statutes mystical treatises vernacular literature and iconography this book highlights how medieval dance helped shape religious identity and social stratification moreover this book shows the political dimension of dance which worked in the service of christendom conversion and social cohesion in ringleaders of redemption kathryn dickason

reveals a long tradition of sacred dance in christianity one that the professionalization and secularization of renaissance dance obscured and one that the reformation silenced and suppressed

the devil s dominion examines the use of folk magic by ordinary men and women in early new england the book describes in vivid detail the magical techniques used by settlers and the assumptions which underlaid them godbeer argues that layfolk were generally far less consistent in their beliefs and actions than their ministers would have liked even church members sometimes turned to magic the devil s dominion reveals that the relationship between magical and religious belief was complex and ambivalent some members of the community rejected magic altogether but others did not godbeer argues that the controversy surrounding astrological prediction in early new england paralleled clerical condemnation of magical practice and that the different perspectives on witchcraft engendered by magical tradition and puritan doctrine often caused confusion and disagreement when new englanders sought legal punishment of witches

augustine and world religions examines augustine's thought for how it can inform modern inter religious dialogue despite augustine's reputation as the father of christian intolerance one finds in his thought the surprising claim that within non christian writings there are some truths in regard even to the worship of the one god this it seems hints at a deeper level of respect and dialogue between religions because one engages in such dialogue in order to better understand and worship god the essays here uncover provocative points of comparison and similarity between christianity and other religions to further such an augustinian dialogue
