writing violence and the military takes representations of reading and writing in eighteenth  
dynasty egypt ca 1550 1295 bce as its point of departure asking how patrons of art  
conceptualized literacy and how in turn they positioned themselves with respect to it exploring  
statuary and tomb art through the prism of self representation and group formation it makes three  
claims firstly that the elite of this period held a variety of notions regarding literacy among which  
violence and memory are most prominent secondly that among the eighteenth dynasty elite

literacy found its strongest advocates among men whose careers brought them to engage with the military either as military officials or as civil administrators who accompanied the army beyond the borders of Egypt finally that Haremhab the general in chief who later ascended the throne voiced unique views regarding literacy that arose from his career as an elite military official and thus from his social world consequently images of reading and writing allow us to study literacy with regard to those who commissioned them and to consider these patrons' roles in changing conceptualizations throughout their different formulations these representations call for a discussion on literacy in relation to self-representation and to art's role in society they also invite us to reconsider our own approach to literacy and its significance in ancient times

commonwealth caribbean business law breaks away from the traditional english approach of treating business law primarily as the law of contract and agency the book takes a panoramic view of the foundation of various legal systems with a subsequent examination of different areas of legal liability that may affect business activities these areas include contract law agency tort law criminal law and internet law as significant challenges confronting the business sector the book primarily targets the development of business law in several caribbean commonwealth jurisdictions but also where appropriate embraces the jurisprudence of other commonwealth nations such as the united kingdom canada and australia with respect to internet law the proliferation of judicial pronouncements emerging from the united states provided the platform for the only non commonwealth treatment of a topic the approach of the book is to use excerpts from judgments so as to allow students particularly the non legal student to understand legal principles as espoused by the judiciary without the filtering bias of authors
