will also appeal to politicians and consultants engaged in national and international policy as the companion deals with the highly important and ever topical phenomena of economic development glen o hara draws a compelling picture of second world war britain by investigating relations between people and government the electorate s rising expectations and demands for universally available social services the increasing complexity of the new solutions to these needs and mounting frustration with both among both governors and governed the major problems the world faces have increased since the turn of the millennium recurrent storms on the financial markets have ravaged many countries poverty is still widespread notwithstanding decades of massive development aid the environment remains in acute jeopardy and the major world institutions have often reached an impasse in attempting to combat these difficulties the issues ask for rapid and consistent action by policy makers but the interests of international organizations such as the wto world bank and kyoto protocol have become too diversified to come to multilateral agreements setting uniform rules and asking for strict compliance with these rules alternative solutions are sought and development in the future is likely to be characterized by fuzzy and complex interactions between flexible groups of actors seeking agreements on the solutions for the most pressing new problems progress will become rather unpredictable and will depend on time place and subject specific cases as well as convergence of interests this need not be only negative flexible solutions have the advantage that they can be easily adapted in case the conditions change in this new book the follow up to his global economic institutions willem molle maps out the unfolding of this process even after achieving the status of a developed economy many economies face other challenges which may include economic stagnation and income inequality the book looks at how a mature economy can continue to weather challenges and how the growth of living standards will depend on productivity growth through singapore s experience after singapore s rapid economic transformation the nation is at a crossroads the book explains how productivity growth in turn depends on technological diffusion from abroad as well as indigenous innovation it also examines how the design of policy to develop indigenous innovation to promote economic dynamism may come with creative destruction and disruptive effects on jobs and wages the singapore economy provides insight into how we can maintain social cohesion and establish a political equilibrium that embraces the new sources of growth through policy formulation for economic inclusion seminar paper from the year 2020 in the subject economics economic cycle and growth grade 4 chukwuemeka odumegwu ojukwu university social sciences language english abstract this paper examined the implication of big push theory on nigerian economic development the theory provided an explanation of how developing countries can industrialize through broad based investment and coordination the paper looked at the meaning of big push theory assumptions and its implication on nigeria economic development if the need for a big push to survive in an economy that is open to international trade and capital movements or if openness to trade and capital movements is sufficient to overcome all poverty traps these questions have daunted development economics since its inception the theory of the big push asserts that underdeveloped countries require large amounts of investments to come out of the problem of backwardness and launch policies for economic development the logic behind this theory is that a programme of bit by bit investment will not have much impact on the process of growth and will only lead to a dissipation of resources policies designed to encourage the development of the nigerian economy will need to be guided by the big push theory entrepreneurial finance is a discipline that studies financial resource mobilization resource allocation risk moderation optimization in financial contracting value creation and value monetization within the context of entrepreneurship however without proper strategic consideration the discipline is incomplete this book examines how the activity of entrepreneurial finance can be enhanced via a concentration on value creation and through improved strategic decision making the most unique feature of the book is its focus on value creation for entrepreneurs value creation is not a one off activity but rather a continuous cycle of incremental improvements across a wide range of business activities entrepreneurial value creation is described in four comprehensive stages value creation value measurement value enhancement and value realization referred to as the c mer model this book focuses on what creates value rather than merely presenting value creation in a straight accounting framework at the same time deliberate and tactical planning and implementation ensure that the firm does not ignore the components necessary for it to survive and flourish vigorous strategic deliberations maximize the entrepreneurial firm s chances of making the right business decisions for the future enable the firm to manage its available financial and non financial resources in the most optimal manner ensure that the necessary capital is secured to progress the development of the firm to its desired development level and build value while financial considerations are important the field of strategic entrepreneurial finance represents a fusion of three disciplines strategic management financial management and entrepreneurship this orientation represents a natural evolution of scholarship to combine specific domains and paradigms of naturally connected business disciplines and reflects the need to simultaneously examine business topics from different

perspectives which may better encapsulate actual entrepreneurial practices the topic of entrepreneurial finance involves many issues including but not limited to the risks and returns to being an entrepreneur financial contracting business planning capital gaps and the availability of capital market booms and busts public policy and international differences in entrepreneurial finance stemming from differences in laws institutions and culture as these issues are so extremely broad and complex the academic and practitioner literature on topic usually focuses on at most one or two of these issues at one time the oxford handbook of entrepreneurial finance provides a comprehensive picture of issues dealing with different sources of entrepreneurial finance and different issues with financing entrepreneurs the handbook comprises contributions from 48 authors based in 12 different countries it is organized into seven parts the first of which introduces the issues explains the organization of the handbook and briefly summarizes the contributions made by the authors in each of the chapters part ii covers the topics pertaining to financing new industries and the returns and risk to being an entrepreneur part iii deals with entrepreneurial capital structure part iv discusses business planning funding and funding gaps in entrepreneurial finance with a focus on credit markets part v provides analyses of the main alternative sources of entrepreneurial finance part vi considers issues in public policy towards entrepreneurial finance part vii considers international differences in entrepreneurial finance including analyses of entrepreneurial finance in weak institutional environments as well as microfinance academic research on developed countries has scientifically evaluated the role of entrepreneurship on economic growth market expansion commercializing innovation and reducing unemployment in this research regions or industries with higher rates of entrepreneurship show higher levels of innovation and economic growth the literature on entrepreneurship and innovation has largely ignored developing countries despite the positive results from new venture investments in india china and elsewhere this volume bridges this gap by bringing together research by scholars in germany and india whose analysis of entrepreneurship innovation and economic development in their respective countries reveals commonalities covering such timely issues as r d and labor policies and including case examples from the chemical biotech and it industries the authors offer insight into the entrepreneurial process the volume concludes with a discussion of the global implications for entrepreneurship research and policy the decade since the publication of the cadbury report in 1992 has seen growing interest in corporate governance this growth has recently become an explosion with major corporate scandals such as worldcom and enron in the us the international diffusion of corporate governance codes and wider interest in researching corporate governance in different institutional contexts and through different subject lenses in view of these developments this book will be a rigorous update and development of the editor s earlier work corporate governance economic management and financial issues each chapter written by an expert in the subject offers a high level review of the topic embracing material from financial accounting strategy and economic perspectives this bibliography of more than 2 000 titles contains both books and journal articles primarily those published since 1970 most of the entries are annotated the material is classified according to forty eight categories and there is also a list of relevant titles for each major country in africa asia and latin america advances in pacific basin business economics and finance apbbef is a peer reviewed series designed to focus on interdisciplinary research in finance economics and management among pacific rim countries the book presents a comprehensive treatment of unemployment and economic problems in jammu kashmir kashmir being a conflict ridden zone has far less opportunities for employment than rest of the other states with an underdeveloped industrial sector and the inability of government to create enough jobs there seems to be no immediate solution lack of avenues to engage the youth in meaningful ways result in making miscreants out of many of them young populations across the world are generally seen as drivers of socio economic growth but in kashmir the youth bulge is a problem unemployed youths destabilize the economy by being used to create mayhem by the anti social elements in the region underdevelopment and unemployment in jammu kashmir is the manifestation of a mismatch between physical and human resources this exists when a large segment of the working age population does not possess the appropriate skills and knowledge to be gainfully employed in addition lackadaisical and imprudent policies pursued by subsequent governments are the major challenge a radical shift in its policies especially in the education sector is an absolute prerequisite for the birth of a capable workforce the remedy lies in revamping the education sector by crafting appropriate policies for suitable skills in line with the socio economic requirements of the society the book argues the government must think about a long term plan for unemployed youth and devise a policy to channel the youth bulge constructively the past thirty years have witnessed a transformation of government economic intervention in broad segments of industry throughout the world many industries historically subject to economic price and entry controls have been largely deregulated including natural gas trucking airlines and commercial banking however recent concerns about market power in restructured electricity markets airline industry instability amid chronic

financial stress and the challenges created by the repeal of the glass steagall act which allowed commercial banks to participate in investment banking have led to calls for renewed market intervention economic regulation and its reform collects research by a group of distinguished scholars who explore these and other issues surrounding government economic intervention determining the consequences of such intervention requires a careful assessment of the costs and benefits of imperfect regulation moreover government interventions may take a variety of forms from relatively nonintrusive performance based regulations to more aggressive antitrust and competition policies and barriers to entry this volume introduces the key issues surrounding economic regulation provides an assessment of the economic effects of regulatory reforms over the past three decades and examines how these insights bear on some of today s most significant concerns in regulatory policy this handbook provides a comprehensive overview of the relationship between financial and real sector development the different chapters written by leading contributors in the field survey research on the importance of financial development for economic growth the causes and consequences of financial fragility the historic development of financial systems in several major economies and regions of the world and the regulatory and supervisory underpinnings of financial sector development
