this book traces changing attitudes towards secrecy in eighteenth century france and explores the cultural origins of ideas surrounding government transparency the idea of keeping secrets both on the part of individuals and on the part of governments came to be viewed with more suspicion as the century progressed by the eve of the french revolution writers voicing concerns about corruption saw secrecy as part and parcel of despotism and this shift went hand in hand with the rise of the idea of transparency the author argues that the emphasis placed on government transparency especially the mania for transparency that dominated the french revolution resulted from the surprising connections and confluence of changing attitudes towards honour religious movements rising nationalism literature and police practices exploring religious ideas that associated secrecy with darkness and wickedness and proto nationalist discourse that equated foreignness with secrecy this book demonstrates how cultural shifts in eighteenth century france influenced its politics covering the period of

secrets and leaks examines the complex relationships among executive power national security and secrecy state secrecy is vital for national security but it can also be used to conceal wrongdoing how then can we ensure that this power is used responsibly typically the onus is put on lawmakers and judges who are expected to oversee the executive yet because these actors lack access to the relevant information and the ability to determine the harm likely to be caused by its disclosure they often defer to the executive s claims about the need for secrecy as a result potential abuses are more often exposed by unauthorized disclosures published in the press but should such disclosures which violate the law be condoned drawing on several cases rahul sagar argues that though whistleblowing can be morally justified the fear of retaliation usually prompts officials to act anonymously that is to leak information as a result it becomes difficult for the public to discern when an unauthorized disclosure is intended to further partisan interests because such disclosures are the only credible means of checking the executive sagar writes they must be tolerated however the public should treat such disclosures skeptically and subject irresponsible journalism to concerted criticism

an epic history of the people and institutions that have built the global economy since the great depression in this vivid landmark history the distinguished economic historian martin daunton pulls back the curtain on the institutions and individuals who have created and managed the global economy over the last ninety years revealing how and why one economic order breaks down and another is built during the great depression trade and currency warfare led to the rise of economic nationalism a retreat from globalization that culminated in war from the second world war came a new liberal economic order squarely reflecting the interests of the west in the cold war liberalism faced collapse in the 1970s and was succeeded by neoliberalism financialization and hyper globalization now as leading nations are tackling the fallout from covid 19 and threats of inflation food insecurity and climate change daunton calls for a return to a more just and equitable form of globalization western imperial powers have overwhelmingly determined the structures of world economic government often advancing their own self interests and leading to ruinous resource extraction debt poverty and political and social instability in the global south he argues that while our current economic system is built upon the politics of and between the world s biggest economies a future of global recovery and the reduction of economic inequality requires the development of multilateral institutions dramatic and revelatory the economic government of the world offers a powerful analysis of the origins of our current global crises and a path toward a fairer international order

the 1945 1952 british government s opposition to zionism and the emergent state of israel tells the story of a longstanding campaign conducted by senior members of a british government against zionism a fledgling nationalist movement immediately after world war ii the book argues that although the british labour party had once been firm supporters of zionism and the creation of a jewish homeland once in office and particularly under the influence of the anti zionist foreign office their position changed the two senior cabinet ministers prime minister clement atlee and foreign secretary ernest bevin had very little knowledge about or interest in zionism at the time that they took office and so various internal and external bodies were able to persuade them to adopt their own firmly held position when they had no position of their own despite the horrors of the holocaust and displacement of large numbers of jews ultimately the british government were not willing to risk alienating middle east arabs in support of a jewish homeland the book examines the motivations and roles of the two men and their fascinating relationship with the zionist movement of the mid twentieth century culminating in the triumphant establishment of the state of israel against all odds
