sector and these challenges undermine the country's inclusive growth goal and its ambition to become a competitive upper middle income country. The authors of Sri Lanka Education Sector Assessment: Achievements, Challenges, and Policy Options offer a thorough review of Sri Lanka's education sector from early childhood education through higher education. With this book, they attempt to answer three questions: how is Sri Lanka's education system performing, especially with respect to participation rates, learning outcomes, and labor market outcomes; how can the country address the challenges at each stage of the education process, taking into account both country and international experience and also best practices; which policy actions should Sri Lanka make a priority for the short and medium term? The authors identify the most critical constraints on performance and present strategic priorities and policy options to address them to attain inclusive growth and become globally competitive. Sri Lanka needs to embark on integrated reforms across all levels of education. These reforms must address both short-term skill shortages and long-term productivity. As Sri Lanka moves up the development ladder, the priorities of primary, secondary, and postsecondary education must be aligned to meet the increasingly complex education and skill requirements. The Indian Ocean tsunami, which devastated 70 percent of Sri Lanka's coastline and killed an estimated 35,000 people, was remarkable both for the magnitude of the disaster and for the unprecedented scale of the relief and recovery operations mounted by national and international agencies. The reconstruction process was soon hampered by political patronage, by the competing efforts of hundreds of foreign humanitarian organizations, and by the ongoing civil war. The book is framed within this larger political and social context, offering descriptions and comparisons between two regions (southwest vs. eastern coast) and four ethnic communities (Sinhalese, Tamils, Muslims, and Burghers) to illustrate how disaster relief unfolded in a culturally pluralistic political landscape. Approaching the issue from four disciplinary perspectives—anthropology, demography, political science, and disaster studies—chapters by experts in the field analyze regional and ethnic patterns of post-tsunami reconstruction according to different sectors of Sri Lankan society, demonstrating the key importance of comprehending the local cultural contexts of disaster recovery processes. The book is a timely and useful contribution to the
