

## Free epub Microcontroller lab manual for ece vtu [PDF]

INTERNATIONAL CONFERENCE ON ADVANCES IN BUSINESS MANAGEMENT AND INTELLIGENCE SYSTEM-22 Sustainable Technology and Advanced Computing in Electrical Engineering 5th International Conference on Biomedical Engineering in Vietnam Proceeding of First Doctoral Symposium on Natural Computing Research Nanoelectronics, Circuits and Communication Systems APPLIED CHEMISTRY FOR ECE STREAM High Performance Computing and Networking International Conference on Intelligent Data Communication Technologies and Internet of Things (ICICI) 2018 Information Management and Machine Intelligence Artificial Intelligence and Evolutionary Computations in Engineering Systems Innovations in Electronics and Communication Engineering Proceedings of International Conference on VLSI, Communication, Advanced Devices, Signals & Systems and Networking (VCASAN-2013) Analog and Digital Communication Emerging Research in Computing, Information, Communication and Applications Recent Advances in Artificial Intelligence and Data Engineering Rainbow Vibes 4th international conference electrical, electronics, communication, computer technologies and optimization techniques Inventive Systems and Control Innovative Design, Analysis and Development Practices in Aerospace and Automotive Engineering A Text-Book of Low Complexity Restoration Algorithms for Video Images THE PENCIL PACK Low Power Architectures for IoT Applications Advances in Electrical and Computer Technologies Recent Trends in Computational Intelligence Enabled Research BASIC ELECTRONICS Emerging Research in Electronics, Computer Science and Technology Intelligent Systems Design and Applications Micro and Nanoelectronics Devices, Circuits and Systems Applications of Parallel Data Processing for Biomedical Imaging Confluence of Artificial Intelligence and Robotic Process Automation Novel Research and Development Approaches in Heterogeneous Systems and Algorithms Sentimental Analysis and Deep Learning Intelligent Control, Robotics, and Industrial Automation Internet of Things Intelligent Communication Technologies and Virtual Mobile Networks Proceeding of the International Conference on Computer Networks, Big Data and IoT (ICCBI - 2018) International Conference on Computer Networks and Communication Technologies New Trends in Computational Vision and Bio-inspired Computing Applied Soft Computing BASIC ELECTRICAL ENGINEERING

**INTERNATIONAL CONFERENCE ON ADVANCES IN BUSINESS MANAGEMENT AND INTELLIGENCE SYSTEM-22** 2022-11-02 the book includes peer reviewed papers of the international conference on sustainable technology and advanced computing in electrical engineering icstage 2021 the main focus of the book is electrical engineering the conference aims to provide a global platform to the researchers for sharing and showcasing their discoveries findings innovations the book focuses on the areas related to sustainable development and includes research works from academicians and industry experts the book discusses new challenges and provides solutions at the interface of technology information complex systems and future research directions

**Sustainable Technology and Advanced Computing in Electrical Engineering** 2014-11-18 this volume presents the proceedings of the fifth international conference on the development of biomedical engineering in vietnam which was held from june 16 18 2014 in ho chi minh city the volume reflects the progress of biomedical engineering and discusses problems and solutions i aims identifying new challenges and shaping future directions for research in biomedical engineering fields including medical instrumentation bioinformatics biomechanics medical imaging drug delivery therapy regenerative medicine and entrepreneurship in medical devices

5th International Conference on Biomedical Engineering in Vietnam 2021-03-18 the book is a collection of papers presented at first doctoral symposium on natural computing research dsncr 2020 held during 8 august 2020 in pune india the book covers different topics of applied and natural computing methods having applications in physical sciences and engineering the book focuses on computer vision and applications soft computing security for internet of things security in heterogeneous networks signal processing intelligent transportation system vlsi design and embedded systems privacy and confidentiality big data and cloud computing bioinformatics and systems biology remote healthcare software security mobile and pervasive computing biometrics based authentication natural language processing analysis and verification techniques large scale networking distributed systems digital forensics and human computer interaction

*Proceeding of First Doctoral Symposium on Natural Computing Research* 2020-11-17 this book features selected papers presented at the fifth international conference on nanoelectronics circuits and communication systems nccs 2019 it covers a range of topics including nanoelectronic devices microelectronics devices material science machine learning internet of things cloud computing computing systems wireless communication systems advances in communication 5g and beyond further it discusses vlsi circuits and systems mems ic design and testing electronic system design and manufacturing speech signal processing digital signal processing fpga based wireless communication systems and fpga based system design industry 4 0 e farming semiconductor memories and ic fault detection and correction

**Nanoelectronics, Circuits and Communication Systems** 2022-03-22 preface chemistry is the branch of science that deals with the study of matter its composition physical and chemical properties and applications it is important for engineers to have knowledge of chemistry as those may face problems in fields as diverse as design and development of new materials quality control and environmental engineering that are basically chemistry oriented in nature chemistry is the backbone in designing and understanding the nature of various engineering materials many advances in engineering and technology either produce a chemical demand like polymers chemical developments for their application in powder metallurgy and alloys preventing methods of pollution etc currently electronics and computer field require biopolymers and nano materials electrical engineers require proper conducting materials mechanical engineers are in search of micro fluids and civil engineers are looking for environment friendly materials this book in engineering chemistry is prepared for the students studying i year engineering and technology this book is written in simple and easily understandable manner

tabular columns figures and worked examples are given wherever necessary at the end of each chapter short answer questions and long answer questions are given test your understanding questions are given wherever required which will motivate the students for further study

*APPLIED CHEMISTRY FOR ECE STREAM 2018-12-20* this book comprises the proceedings of the 2nd international conference on computer vision high performance computing smart devices and networks chsn 2021 this book highlights the high quality research articles in machine learning computer vision and networks the content of this volume gives the reader an up to date picture of the state of the art connection between computational intelligence machine learning and iot the papers included in this volume are peer reviewed by experts in the related areas the book will serve as a valuable reference resource for academics and researchers across the globe

**High Performance Computing and Networking 2020-09-16** this book discusses data communication and computer networking communication technologies and the applications of iot internet of things big data cloud computing and healthcare informatics it explores examines and critiques intelligent data communications and presents inventive methodologies in communication technologies and iot aimed at researchers and academicians who need to understand the importance of data communication and advanced technologies in iot it offers different perspectives to help readers increase their knowledge and motivates them to conduct research in the area highlighting various innovative ideas for future research

International Conference on Intelligent Data Communication Technologies and Internet of Things (ICICI) 2018 2016-02-05 this book features selected papers presented at the international conference on information management and machine intelligence icimmi 2019 held at the poornima institute of engineering technology jaipur rajasthan india on december 14 15 2019 it covers a range of topics including data analytics ai machine and deep learning information management security processing techniques and interpretation applications of artificial intelligence in soft computing and pattern recognition cloud based applications for machine learning application of iot in power distribution systems as well as wireless sensor networks and adaptive wireless communication

**Information Management and Machine Intelligence 2017-11-08** the book is a collection of high quality peer reviewed research papers presented in the first international conference on international conference on artificial intelligence and evolutionary computations in engineering systems icaiecs 2015 held at velammal engineering college vec chennai india during 22 23 april 2015 the book discusses wide variety of industrial engineering and scientific applications of the emerging techniques researchers from academic and industry present their original work and exchange ideas information techniques and applications in the field of communication computing and power technologies

*Artificial Intelligence and Evolutionary Computations in Engineering Systems 2013-07-10* the book contains high quality papers presented in the fifth international conference on innovations in electronics and communication engineering iciece 2016 held at guru nanak institutions hyderabad india during 8 and 9 july 2016 the objective is to provide the latest developments in the field of electronics and communication engineering specially the areas like image processing wireless communications radar signal processing embedded systems and vlsi design the book aims to provide an opportunity for researchers scientists technocrats academicians and engineers to exchange their innovative ideas and research findings in the field of electronics and communication engineering

**Innovations in Electronics and Communication Engineering 2022-08-04** this book is a collection of papers presented by renowned researchers keynote speakers and academicians in the international conference on vlsi communication analog designs signals systems and networking vcasan 2013 organized by b n m institute of technology bangalore india during july 17 19 2013 the book provides global

trends in cutting edge technologies in electronics and communication engineering the content of the book is useful to engineers researchers and academicians as well as industry professionals

*Proceedings of International Conference on VLSI, Communication, Advanced Devices, Signals & Systems and Networking (VCASAN-2013)* 2015-07-17 an introductory course on analog and digital

communications is fundamental to the undergraduate program in electrical engineering this course is usually offered at the junior level typically it is assumed that the student has a background in calculus electronics signals and systems and possibly probability theory bearing in mind the introductory nature of this course a textbook recommended for the course must be easy to read accurate and contain an abundance of insightful examples problems and computer experiments these objectives of the book are needed to expedite learning the fundamentals of communication systems at an introductory level and in an effective manner this book has been written with all of these objectives in mind given the mathematical nature of communication theory it is rather easy for the reader to lose sight of the practical side of communication systems throughout the book we have made a special effort not to fall into this trap we have done this by moving through the treatment of the subject in an orderly manner always trying to keep the mathematical treatment at an easy to grasp level and also pointing out practical relevance of the theory wherever it is appropriate to do so

**Analog and Digital Communication** 2021-10-31 this proceedings volume covers the proceedings of ercica 2015 ercica provides an interdisciplinary forum for researchers professional engineers and scientists educators and technologists to discuss debate and promote research and technology in the upcoming areas of computing information communication and their applications the contents of this book cover emerging research areas in fields of computing information communication and applications this will prove useful to both researchers and practicing engineers

**Emerging Research in Computing, Information, Communication and Applications** 2021-03-28 this book presents select proceedings of the international conference on artificial intelligence and data engineering aide 2020 various topics covered in this book include deep learning neural networks machine learning computational intelligence cognitive computing fuzzy logic expert systems brain machine interfaces ant colony optimization natural language processing bioinformatics and computational biology cloud computing machine vision and robotics ambient intelligence intelligent transportation sensing and sensor networks big data challenge data science high performance computing data mining and knowledge discovery and data privacy and security the book will be a valuable reference for beginners researchers and professionals interested in artificial intelligence robotics and data engineering

**Recent Advances in Artificial Intelligence and Data Engineering** 2022-08-01 this book is completely mixed with varieties of genres languages and topics topics which you can relate it to your day to day emotions feelings and activities around 51 to 52 talented ink magicians belonging to sparkling pen a writing community where writers are allowed to display their hidden talents through major different competitions and daily challenges ink this book rainbow vibes is all about colourful and diversely vibes created by our pure iconic talents featuring love friendship betrayal motivation inspiration relatable and life portraying an enchanted magical land to get lost into it by reading this book you will surely fall in love with the words constructed by pure talents

**Rainbow Vibes** 2020-09-26 this book presents selected papers from the 6th international conference on inventive systems and control icisc 2022 held on 6 7 january 2022 at jct college of engineering and technology coimbatore india the conference proceedings of icisc 2022 includes an analysis of the class of intelligent systems and control techniques that utilizes various artificial intelligence technologies where there is no mathematical models and system available to make them remain controlled inspired by various existing intelligent techniques the primary goal of icisc 2022 proceedings is to present the emerging innovative models to tackle the challenges faced by the existing computing and communication technologies

*4th international conference electrical, electronics, communication, computer technologies and optimization techniques* 2022-02-17 this book gathers the best articles presented by researchers and industrial experts at the international conference on innovative design analysis and development practices in aerospace and automotive engineering i dad 2020 the papers discuss new design concepts and analysis and manufacturing technologies with a focus on achieving improved performance by downsizing improving the strength to weight ratio fuel efficiency and operational capability at room and elevated temperatures reducing wear and tear addressing nvh aspects while balancing the challenges of euro vi bharat stage vi emission norms greenhouse effects and recyclable materials presenting innovative methods this book is a valuable reference resource for professionals at educational and research organizations as well as in industry encouraging them to pursue challenging projects of mutual interest

*Inventive Systems and Control* 2023-04-04 every morning bring new things to achieve new problems to solve new colours to fill in our life new thoughts to think new challenges to overcome new moments to celebrate the pencil pack is the anthology with the motive of giving opportunity to new writers this anthology is a collection of different kinds of thoughts of variety of authors who choose to grab this opportunity

**Innovative Design, Analysis and Development Practices in Aerospace and Automotive Engineering** 2021-02-26 this book provides comprehensive coverage of different aspects of low power circuit synthesis for iot applications at various levels of the design hierarchy starting from the layout level to the system level for a seamless understanding of the subject the basics of mos circuits have been introduced at the transistor gate and circuit level followed by various low power design methodologies such as supply voltage scaling switched capacitance minimization techniques and leakage power minimization approaches the contents of this book are useful to students researchers as well as practicing engineers low power architectures refer to the latest development in computer microchips which are created by integrating hundreds of thousands of transistors on one chip for different iot applications emerging research in this area has the potential to uncover further applications for iot in addition to system advancements

A Text-Book of Low Complexity Restoration Algorithms for Video Images 2021-07-31 this book comprises select proceedings of the international conference on advances in electrical and computer technologies 2020 icaect 2020 the papers presented in this book are peer reviewed and cover latest research in electrical electronics communication and computer engineering topics covered include smart grids soft computing techniques in power systems smart energy management systems power electronics feedback control systems biomedical engineering geo informative systems grid computing data mining image and signal processing video processing computer vision pattern recognition cloud computing pervasive computing intelligent systems artificial intelligence neural network and fuzzy logic broad band communication mobile and optical communication network security vlsi embedded systems optical networks and wireless communication the volume can be useful for students and researchers working in the different overlapping areas of electrical electronics and communication engineering

**THE PENCIL PACK** 2018-08-01 the field of computational intelligence has grown tremendously over that past five years thanks to evolving soft computing and artificial intelligent methodologies tools and techniques for envisaging the essence of intelligence embedded in real life observations consequently scientists have been able to explain and understand real life processes and practices which previously often remain unexplored by virtue of their underlying imprecision uncertainties and redundancies and the unavailability of appropriate methods for describing the incompleteness and vagueness of information represented with the advent of the field of computational intelligence researchers are now able to explore and unearth the intelligence otherwise insurmountable embedded in the systems under

consideration computational intelligence is now not limited to only specific computational fields it has made inroads in signal processing smart manufacturing predictive control robot navigation smart cities and sensor design to name a few recent trends in computational intelligence enabled research theoretical foundations and applications explores the use of this computational paradigm across a wide range of applied domains which handle meaningful information chapters investigate a broad spectrum of the applications of computational intelligence across different platforms and disciplines expanding our knowledge base of various research initiatives in this direction this volume aims to bring together researchers engineers developers and practitioners from academia and industry working in all major areas and interdisciplinary areas of computational intelligence communication systems computer networks and soft computing provides insights into the theory algorithms implementation and application of computational intelligence techniques covers a wide range of applications of deep learning across various domains which are researching the applications of computational intelligence investigates novel techniques and reviews the state of the art in the areas of machine learning computer vision soft computing techniques

Low Power Architectures for IoT Applications 2019-04-24 this book is prepared as per the syllabus of basic electronics for first year b tech engineering course under visvesvaraya technological university karnataka using the reference books given in the course syllabus authors have tried to elucidate the topics such a way that even a mediocre student can assimilate them many solved problems sample question papers and exercise given in every section will provide a thorough understanding of topics

Advances in Electrical and Computer Technologies 2019-04-11 this book presents the proceedings of the international conference on emerging research in electronics computer science and technology icerecct organized by pes college of engineering in mandya featuring cutting edge peer reviewed articles from the field of electronics computer science and technology it is a valuable resource for members of the scientific research community

Recent Trends in Computational Intelligence Enabled Research 2021-09-09 this book highlights recent research on intelligent systems and nature inspired computing it presents 212 selected papers from the 18th international conference on intelligent systems design and applications isda 2018 and the 10th world congress on nature and biologically inspired computing nabic which was held at vit university india isda nabic 2018 was a premier conference in the field of computational intelligence and brought together researchers engineers and practitioners whose work involved intelligent systems and their applications in industry and the real world including contributions by authors from over 40 countries the book offers a valuable reference guide for all researchers students and practitioners in the fields of computer science and engineering

BASIC ELECTRONICS 2024-04-26 the book presents select proceedings of the international conference on micro and nanoelectronics devices circuits and systems mndcs 2021 the volume includes cutting edge research papers in the emerging fields of micro and nanoelectronics devices circuits and systems from experts working in these fields over the last decade the book is a unique collection of chapters from different areas with a common theme and will be immensely useful to academic researchers and practitioners in the industry who work in this field

Emerging Research in Electronics, Computer Science and Technology 2023-03-13 despite the remarkable progress witnessed in the last decade in big data utilization and parallel processing techniques a persistent disparity exists between the capabilities of computer aided diagnosis systems and the intricacies of practical healthcare scenarios this disconnection is particularly evident in the complex landscape of artificial intelligence ai and iot innovations within the biomedical realm the need to bridge this gap and explore the untapped potential in healthcare and biomedical applications has never been

---

more crucial as we navigate through these challenges applications of parallel data processing for biomedical imaging offers insights and solutions to reshape the future of biomedical research the objective of applications of parallel data processing for biomedical imaging is to bring together researchers from both the computer science and biomedical research communities by showcasing state of the art deep learning and large data analysis technologies the book provides a platform for the cross pollination of ideas between ai based and traditional methodologies the collaborative effort seeks to have a substantial impact on data mining ai computer vision biomedical research healthcare engineering and other related fields this interdisciplinary approach positions the book as a cornerstone for scholars professors and professionals working in software and medical fields catering to both graduate and undergraduate students eager to explore the evolving landscape of parallel computing artificial intelligence and their applications in biomedical research

**Intelligent Systems Design and Applications** 2023-03-07 this book provides a detailed insight into robotic process automation rpa technologies linked with ai that will help organizations implement industry 4.0 procedures rpa tools enhance their functionality by incorporating ai objectives such as use of artificial neural network algorithms text mining techniques and natural language processing techniques for information extraction and the subsequent process of optimization and forecasting scenarios for the purpose of improving an organization's operational and business processes the target readers of this book are researchers professors graduate students scientists policymakers professionals and developers working in the it and ites sectors i.e. people who are working on emerging technologies this book also provides insights and decision support tools necessary for executives concerned with different industrial and organizational automation centric jobs knowledge dissemination information and policy development for automation in different educational government and non government organizations this book is of special interest to college and university educators who teach ai machine learning blockchain business intelligence cognitive intelligence and brain intelligence courses in different capacities

*Micro and Nanoelectronics Devices, Circuits and Systems* 2021-10-25 almost every element of life from commerce and agriculture to communication and entertainment has been profoundly altered by computing around the world people rely on computers for the creation of systems for energy transportation and military use additionally computing fosters scientific advancements that advance our basic understanding of the world and assist in finding answers to pressing health and environmental issues novel research and development approaches in heterogeneous systems and algorithms addresses novel research and developmental approaches in heterogeneous systems and algorithms for information centric networks of the future covering topics such as image identification and segmentation materials data extraction and wireless sensor networks this premier reference source is a valuable resource for engineers consultants practitioners computer scientists students and educators of higher education librarians researchers and academicians

**Applications of Parallel Data Processing for Biomedical Imaging** 2023-12-19 this book gathers selected papers presented at the international conference on sentimental analysis and deep learning icsadl 2021 jointly organized by tribhuvan university nepal prince of songkla university thailand and ejesra during june 18-19 2021 the volume discusses state of the art research works on incorporating artificial intelligence models like deep learning techniques for intelligent sentiment analysis applications emotions and sentiments are emerging as the most important human factors to understand the prominent user generated semantics and perceptions from the humongous volume of user generated data in this scenario sentiment analysis emerges as a significant breakthrough technology which can automatically analyze the human emotions in the data driven applications sentiment analysis gains the ability to sense the existing voluminous unstructured data and delivers a real time analysis to

---

efficiently automate the business processes meanwhile deep learning emerges as the revolutionary paradigm with its extensive data driven representation learning architectures this book discusses all theoretical aspects of sentimental analysis deep learning and related topics

*Confluence of Artificial Intelligence and Robotic Process Automation* 2020-12-29 this volume comprises peer reviewed proceedings of the international conference on robotics control automation and artificial intelligence rcaai 2022 it aims to provide a broad spectrum picture of the state of art research and development in the areas of intelligent control the internet of things machine vision cybersecurity robotics circuits and sensors among others this volume will provide a valuable resource for those in academia and industry

**Novel Research and Development Approaches in Heterogeneous Systems and Algorithms** 2019-08-12 provides an understanding of the concepts of iot security discusses how security needs to be built into the foundation of iot systems covers data encryption rigorous validity checks authentication and data verification processes presents software development organization issues such as writing code that is stable resilient and trustworthy goes over code development standards training threat analysis and testing

*Sentimental Analysis and Deep Learning* 2019-07-31 this book presents the outcomes of the intelligent communication technologies and virtual mobile networks conference icicv 2019 held in tirunelveli india on february 14 15 2019 it presents the state of the art in the field identifying emerging research topics and communication technologies and defining the future of intelligent communication approaches and virtual computing in light of the tremendous growth ict it examines the rapid developments in virtual reality in communication technology and high quality services in mobile networks including the integration of virtual mobile computing and communication technologies which permits new technologies based on the resources and services of computational intelligence big data analytics internet of things iot 5g technology automation systems sensor networks augmented reality data mining and vehicular ad hoc networks with massive cloud based backend these services have a significant impact on all areas of daily life like transportation e commerce health care secure communication location detection smart home smart city social networks and many more

*Intelligent Control, Robotics, and Industrial Automation* 2018-09-17 this book presents the proceedings of the international conference on computer networks big data and iot iccbi 2018 held on december 19 20 2018 in madurai india in recent years advances in information and communication technologies ict have collectively aimed to streamline the evolution of internet applications in this context increasing the ubiquity of emerging internet applications with an enhanced capability to communicate in a distributed environment has become a major need for existing networking models and applications to achieve this internet of things iot models have been developed to facilitate a smart interconnection and information exchange among modern objects which plays an essential role in every aspect of our lives due to their pervasive nature computer networks and iot can easily connect and engage effectively with their network users this vast network continuously generates data from heterogeneous devices creating a need to utilize big data which provides new and unprecedented opportunities to process these huge volumes of data this international conference on computer networks big data and internet of things iccbi brings together state of the art research work which briefly describes advanced iot applications in the era of big data as such it offers valuable insights for researchers and scientists involved in developing next generation big data driven iot applications to address the real world challenges in building a smartly connected environment

**Internet of Things** 2020-09-27 the book features research papers presented at the international conference on computer networks and inventive communication technologies iccnct 2018 offering significant contributions from researchers and practitioners in academia and industry the topics covered include computer networks network protocols and wireless networks data communication technologies and

---

network security covering the main core and specialized issues in the areas of next generation wireless network design control and management as well as in the areas of protection assurance and trust in information security practices these proceedings are a valuable resource for researchers instructors students scientists engineers managers and industry practitioners

**Intelligent Communication Technologies and Virtual Mobile Networks 2022-02-03** this volume gathers selected peer reviewed original contributions presented at the international conference on computational vision and bio inspired computing iccvbic conference which was held in coimbatore india on november 29 30 2018 the works included here offer a rich and diverse sampling of recent developments in the fields of computational vision fuzzy image processing and bio inspired computing the topics covered include computer vision cryptography and digital privacy machine learning and artificial neural networks genetic algorithms and computational intelligence the internet of things and biometric systems to name but a few the applications discussed range from security healthcare and epidemic control to urban computing agriculture and robotics in this book researchers graduate students and professionals will find innovative solutions to real world problems in industry and society as a whole together with inspirations for further research

*Proceeding of the International Conference on Computer Networks, Big Data and IoT (ICCBi - 2018)* 2016-08-01 this new volume explores a variety of modern techniques that deal with estimated models and give resolutions to complex real life issues soft computing has played a crucial role not only with theoretical paradigms but is also popular for its pivotal role for designing a large variety of expert systems and artificial intelligence based applications involving the concepts and practices of soft computing in conjunction with other frontier research domains this book begins with the basics and goes on to explore a variety of modern applications of soft computing in areas such as approximate reasoning artificial neural networks bayesian networks big data analytics bioinformatics cloud computing control systems data mining functional approximation fuzzy logic genetic and evolutionary algorithms hybrid models machine learning metaheuristics neuro fuzzy system optimization randomized searches and swarm intelligence this book will be helpful to a wide range of readers who wish to learn applications of soft computing approaches it will be useful for academicians researchers students and machine learning experts who use soft computing techniques and algorithms to develop cutting edge artificial intelligence based applications

International Conference on Computer Networks and Communication Technologies this book is prepared as per the syllabus of visvesvaraya technological university karnataka for first year b tech engineering course using the reference books given in the course syllabus authors have tried to elucidate the topics such a way that even a mediocre student can assimilate them many solved problems sample question papers and exercise given in every section will provide a thorough understanding of topics

**New Trends in Computational Vision and Bio-inspired Computing**

**Applied Soft Computing**
