percentage of the population has the notion that

people who are on their early old age or retirement have mixed or combined emotion of fear and freedom at the same time fear as some of them associate retirement with aging alienation and detachment from society generation gap age discrimination and apprehension with illness and mortality freedom for those who look at seniority as a privilege no work to worry blessed with monthly retirement money children are grown up independent and married no responsibility hello peace goodbye anxiety this book is based on research and shared personal stories of several elders who d rather be called seniors than elderly right after their regular wednesday bowling practice the six bosom buddies carla charles michael miriam joe and laurena the senior friends who were more popular in their club as the the age fear fighters were tired and sweating but they still had the energy to tease each other about the game they loved to play the team posed as the role model for the elders in their apartment complex and to those seniors whom they meet instead of worrying for an added number of years on their birthdays they counted and celebrated another happy year of freedom instead of fearing sickness and death they look at it as part of life s challenges and the beginning of eternal life instead of accepting gifts on their birthdays and christmas they treated friends for celebrating with them as their special buddies these are some of the reasons why they were branded as the age fear fighters

Seniors Guide to Health 2015-02-25 the world is aging faster than many people realize we need to remember that from the beginning to end life was meant to be lived with dignity using the empathy and compassion that god gives us everyone should greet each day as a gift to be lived cherished and shared with those they love you matter because you are you and you matter until the last moment of your life when you are told that someone you love is going to die it s as if time skips a beat and once the clock resumes ticking nothing is ever the same again my mom lived until the ripe age of 82 years old and so did her mother so i guess you can say i am descended from a line of long lived however back then things were simpler and

they had access to natural foods and lived in clean environments when my mother died my father had passed on over 20 years earlier my 8 siblings and i had no idea of the amount of work we needed to do not only did we need to make sure all her affairs were in order but we had to make sure she was comfortable during the last days of her life if you have never experienced the pain of losing a loved one especially an elderly person in your family then you need to keep reading this book due to a culture that celebrates youth and ignores the elderly seniors and their families are largely unprepared to deal with the challenges seniors face as they age this book is an easy to read guide for those who are seeking to become more knowledgeable on how to age gracefully and how to take care of the seniors in their care in this country seniors are treated horribly many countries hispanic or latino countries and others allows seniors to move in with their families as they age this not only helps families out with childcare but it s also a great support system for seniors however in this country as seniors age we look for nursing homes aka old folks homes to drop seniors off at as if it is an elephant s graveyard this kind of mindset has been the norm in this country for a long time and despite a fallen economy many are still looking for these homes because they lack the proper knowledge on how to care for their loved ones therefore this book is a must read for the entire family good luck
