a critic takes issue with the art world s romanticizing of networks and participatory projects linking them to the values of a globalized neoliberal economy over the past twenty years the network has come to dominate the art world affecting not just interaction among art professionals but the very makeup of the art object itself the hierarchical and restrictive structure of the museum has been replaced by temporary projects scattered across the globe staffed by free agents hired on short term contracts viewed by spectators defined by their predisposition to participate and make connections in this book lane relyea tries to make sense of these changes describing a general organizational shift in the art world that affects not only material infrastructures but also conceptual categories and the construction of meaning

examining art practice exhibition strategies art criticism and graduate education relyea creates the transformation of the art world with the advent of globalization and the neoliberal economy he analyzes the new networked participatory art world hailed by some as inherently democratic in terms

widely acknowledged as the most authoritative art
critic of his generation hilton kramer advanced
his comments and judgments largely in the form of
essays and short pieces thus this first collection
of his work to appear in twenty years is a signal
event for the art world and for criticism
generally the triumph of modernism not only traces
the vicissitudes of the art scene but diagnoses
the state of modernism and its vital legacy in the
postmodern world mr kramer bracingly updates his
incisive critique of the artists critics
institutions and movements that have formed the
basis for modern art appearing for the first time
in greatly expanded form is his consideration of
the foundations of modern abstract painting and
the future of abstraction the aesthetic
intelligence that mr kramer brings to bear on
certain tired assumptions about modernism many of
them derived from methodologies and politics that
have little to do with art helps rescue the peter

institutions such as the art museum and the

extraordinary proliferation based on her recent

behind this boom the different motivations of
collectors to display their art in public and the
various ways in which the institutions are

but their relationship with public institutions
can also be problematic should private museums
