The Best of Boards

2011-12

you can be an excellent nurse in the clinical setting and still fail to prove that you are an excellent nurse if your documentation is inadequate having worked in a variety of inpatient and outpatient settings i understand the obstacles nurses face there s just not time nor do nurses have the mental energy to meticulously document every little thing on top of the rest of their to do list that s part of why i became passionate about documentation education it doesn t have to be an overwhelming endless challenge to chart exhaustively in hopes that you enter enough data into the chart to defend yourself one day rather leveraging the most critical data knowing how to format notes and exactly what to say and when to spend five minutes dumping information into the chart can be learned skills that make documentation faster easier and less stressful while doing a better job of defending your actions the importance of documentation overcoming obstacles purpose s of documentation defensive charting obstacles impacting quality of medical record overcoming obstacles legal responsibilities of the nurse duties of the nurse nurse practice acts duties of the hospital hospital policy vs state board of nursing regulations reasonable prudence failure to fulfill document responsibilities fulfilling responsibilities vs documenting responsibilities what if responsibilities aren t fulfilled mistakes happen professional liability insurance malpractice medical negligence acting with malice fraud what happens when a nurse is charged with malpractice what to do if you receive notification of a claim common charting mistakes how to avoid them the most common errors charting by exception charting to capture minimal data but i ve always charted this way and nothing bad has happened yet what you should be charting how and what to chart quick glance charting checklists what is a timely manner documenting assessments sample focused assessment criteria sharing the responsibility modifying electronic data abbreviations standing orders early warning systems scores scales informed consent special circumstances paper charting writing an incident report patient leaving ama patient threatening to sue you identifying patient belongings another member of the team is not documenting correctly restraints defective equipment suspected abuse patient requesting to view their emr on hospital computer narrative notes when how to write notes one note or several notes daily narrative notes examples of common notes written as needed how to title narrative notes how to format notes using patient names in notes length of notes create a template tips for less stress when charting bonus how i chart on a typical shift about the author

i m andrea rn msn perfecting my own documentation and working to find concrete guidelines to share with my fellow nurses has become my passion as i gained more knowledge and researched the dusty forgotten corners of the internet for obscure evidence based practice and case studies becoming a subject matter expert on nursing documentation lit a spark because sharing this information helps empower nurses to understand exactly what should appear in their patient charts where when it should entered and how it should be phrased

2012 Comprehensive Accreditation Manual for Behavioral Health Care (Cbhc12)

2021-03-17

psychologists offer an increasing variety of services to the public among these services psychological assessment of personality and behavior continues to be a central activity one main reason is that other mental health professionals often do not possess a high level of competence in this area and when dealing with children and adolescents psychological assessment seems to take on an even greater role therefore it follows that comprehensive graduate level instruction in assessment should be a high priority for educators of psychologists who will work with these youth this textbook is organized into three sections consistent with the authors approach to teaching part i provides students with the psychological knowledge base necessary for modern assessment practice including historical perspectives measurement science child psychopathology ethical legal and cultural issues and the basics of beginning the assessment process part ii gives students a broad review of the specific assessment methods used by psychologists accompanied by specific advice regarding the usage and strengths and weaknesses of each method in part iii we help students perform some of the most sophisticated of assessment practices integrating and communicating assessment results and infusing assessment practice with knowledge of child development and psychopathology to assess some of the most common types of behavioral and emotional disorders in youth a text focusing on assessment practices must be updated every four to six years to keep pace with advances in test development for example several of the major tests reviewed in the text such as the behavioral assessment system for children and the child behavior checklist have undergone major revisions since the publication of the last edition making the current content outdated further another major test the conners rating scales is undergoing substantial revisions that should be completed before publication of the next edition finally the evidence for the validity of the tests and the recommendations for their appropriate use evolve as research accumulates and requires frequent updating to remain current for example there was a special issue of the journal of clinical child and adolescent psychology published focusing on evidenced based assessment of the major forms of childhood psychopathology that will need to be integrated into the chapters in part 3 this latter point reflects an important trend in the field that should influence the marketing of the book that is there are several initiatives being started in all of the major areas of applied psychology e g school clinical and counseling to promote evidenced based assessment practices these initiatives have all emphasized the need to enhance the training of graduate students in this approach to assessment this has been the orientation of this textbook from its first edition that is clinical assessment of child and adolescent personality and behavior has focused on using research to guide all recommendations for practice the ability of the textbook to meet this training need should be an important focus of marketing the book to training programs across all areas of applied psychology

Principles and Practices of Assessment

2000

this book discusses the application of geospatial data geographic information system gis and remote sensing rs technologies in analysis and modeling of urban growth process and its pattern with special focus on sprawl and compact form of urban development the book explains these two kinds of urban forms sprawl and compact urban development in detail regarding their advantages disadvantages indicators assessment modeling implementation and

their relationship with urban sustainability it confirms that the proposed modeling approaches geospatial data and gis are very practical for identifying urban growth land use change patterns and their general trends in future the analyses and modeling approaches presented in this book can be employed to guide the identification and measurements of the changes and growth likely to happen in urban areas in addition this book can be helpful for town planning and development in order to design urban areas in a compact form and eventually sustainable manner
