in spite of the seeming heterogeneity of topics in its title revolutions systems and theories this volume purports to be something more than a random collection of essays in political philosophy the colloquium of the philosophy department of the university of western ontario 29 31 october 1971 at which initial versions of the first eight papers were delivered was entitled political theory and while the organizers anticipated and indeed welcomed topicality in the issues accorded priority and in the empirical evidence invoked they were also hoping for a reasonably comprehensive exploration of some of the central issues of political philosophy for this reason it was quickly decided that in such a field a philosophical focus on clarification of ordering concepts required the supplement and test of researches into more particular subject matters by social scientists thus to speak in general terms where the specializations and their taxonomies multiply fissiparously contributors include political scientists economists and sociologists barnard baston tullock rapoport as well as philosophers scriven morgenbesser braybrooke taylor and juxtaposed as proponents and commentators to generate exchanges across disciplinary frontiers while the five additional invited papers are all by professional philosophers they extend the original colloquium either by continuing controversy on its fundamental issues e.g. rubinoff nielsen roy or by their continued explorations in what are acknowledged to be boundary areas e.g. schick wartofsky the greatest topical emphasis is that on revolution
