Process Engineering

1988

Process engineering is a branch of chemical engineering that deals with the design, development, and operation of industrial processes. It involves the application of scientific and engineering principles to the production of goods and services. The field is highly interdisciplinary, drawing on chemistry, physics, and mathematics. Key areas of focus include process design, optimization, and control. The goal is to create efficient, safe, and sustainable processes that meet the needs of society.

Directory of Portable Databases

1992

This directory provides a comprehensive list of portable databases available for various operating systems. It includes information on the database's features, performance, and compatibility. The entries are organized by database type, such as relational, object-oriented, and NoSQL. The directory is a valuable resource for developers and system administrators looking for a suitable database solution. etc.

Western Contractor

1915

Western Contractor is a leading provider of construction services and equipment. The company has a long history of excellence in the industry, serving a wide range of clients and projects. Its commitment to quality and customer service has earned it a reputation as a trusted partner in the construction sector. The company's extensive product line and experienced workforce make it a go-to choice for all construction needs.
