The Infallibility of the Church in Orthodox Theology 2008

although several orthodox theologians have significantly enhanced the development of ecclesiology in the twentieth century the contribution of archbishop stylianos harkianakis primate of the greek orthodox church in austria remains without doubt a landmark in the history of that theological field today essentially the authors consideration of the church is that it is the most intimate and graced communion not only of human persons but of the entire created cosmos bonded together in a wondrous relationship with the uncreated god unconfusedly and indivisibly united with god the church therefore enjoys and rightly proclaims the truth ie it is infallible for the world s salvation and the glorification of god ultimately his the author s theology of the church s infallibility ie it s truthfulness is simply a doxological affirmation of the genuine presence of god among his people and the world at large

the philokalia literally love of the beautiful or good is after the bible the most influential source of spiritual tradition within the orthodox church first published in greek in 1782 by st nicodemus of the holy mountain and st macarios of corinth the philokalia includes works by thirty six influential orthodox authors from the fourth to fifteenth centuries such as maximus the confessor peter of damascus symeon the new theologian and gregory palamas surprisingly this important collection of theological and spiritual writings has received little scholarly attention with the growing interest in orthodox theology the need for a substantive resource for philokalic studies has become increasingly evident the purpose of the present volume is to remedy that lack by providing an ecumenical collection of scholarly essays on the philokalia that will introduce readers to its background motifs authors and relevance for contemporary life and thought

Facing the World 2003

this little book is intended to supply not so much matter for controversy as a certain amount of information about the orthodox church people in the west have too long forgotten that enormous mass of their fellow christians who live on the other side of the adriatic sea and the river vistula and now that anglicans especially have begun to take an interest in what they look upon as another branch of the church it seems regrettable that english catholics as a rule have only the vaguest and the most inaccurate ideas about the people whom they confuse under the absurd name of greeks during the late war one saw how widespread were such ideas as that the russian clergy were under the patriarch of constantinople and said mass in greek it is chiefly with the hope of rectifying such mistakes that the book has been written there is nothing in it that has not been said often and better before and the only excuse for its publication is that there does not seem to be yet anything of the kind from the catholic point of view in english as it is written for catholics i have generally supposed that point of view and have not filled up the pages by repeating once more arguments for the

primacy infallibility of the pope and so on such as can be easily found already in the publications of the catholic truth society the other point is the use of the word orthodox since the schism i have called the people in union with the ecumenical patriarch so of course the name then has a special and technical meaning orthodox in its real sense is just what we believe them not to be but in the first place it seems impossible to find any other name eastern is too wide the copts and armenians form eastern churches schismatic involves the same difficulty besides being needlessly offensive we do not in ordinary conversation speak of protestants as heretics the name commonly used greek is the worst of all the only body that ever calls itself or can with any sort of reason be called the greek church is the established church of the kingdom of greece j and that is only one and a very small one of the sixteen bodies that make up this great communion to call the millions of russians who say their prayers in old slavonic and obey the holy synod at petersburg greeks is as absurd as calling us all italians there is no parallel with our name roman we use the roman liturgy in the roman language and obey the roman patriarch they use the byzantine liturgy in all sorts of languages and the enormous majority obey no patriarch at all byzantine orthodox would more or less correspond to roman catholic but the byzantine patriarch has no jurisdiction outside his reduced patriarchate and occupies a very different position from that of the roman pope and then courteous and reasonable people generally call any religious body by the name it calls itself we have no difficulty in speaking of evangelicals in germany the church of england at home and the salvation army everywhere of course one conceives these names as written in inverted commas like those of the holy roman and the celestial empires in the same way most people call us catholics naturally all christians believe that they are members of the universal church of christ and most of them profess their faith in it when they say the creed the way in which high church anglicans have suddenly realized this and have discovered that they would give away their own case by calling us catholics is astonishingly naive of course they think that they are really catholics too so do all christians and we never imagined that we are called so except as a technical name which happens to have become ours and which even turks give only to us the body about which this book treats always calls itself the orthodox eastern church and in the east we call them orthodox and they call us catholics and no one thinks for a moment that either uses these names except as technical terms

The Place of the Heart 1991-11-01

when fr seraphim found out that the early western father blessed augustine of hippo was being attacked in contemporary eastern orthodox circles then he himself a western convert to orthodoxy rose in his defense this book is the outcome fr seraphim said he wrote it in the hope that it would help remove augustine as a scapegoat for today s academic theologians and thus help free us all to see his and our own weaknesses in a little closer light for his weaknesses to a surprising degree are indeed close to our own after discussing blessed augustine s strengths and weaknesses fr seraphim examines the opinions of other holy fathers concerning him his main benefit to us today he writes is probably precisely as a father of orthodox piety something with which he was filled to overflowing here he is one with the simple orthodox faithful as well as with all the holy fathers of east and west who whatever their various failings and differences in theoretical points of doctrine had a single deeply christian heart and soul it is this that makes him unquestionably an orthodox father this new edition of the place of blessed augustine in the orthodox church contains letters written by fr seraphim concerning augustine passages from augustine s confessions which fr seraphim found especially moving and an orthodox service to blessed augustine commissioned by st john maximovitch

The Resurrection of the Church in Albania 2002

life after death according to the orthodox tradition presents the teachings from orthodox church tradition on a few points these teachings differ significantly from those of the catholic and protestant confessions some divergences between eastern and western traditions have existed since the fifth century but have been considerably accentuated since the twelfth century when the west to borrow an expression from the historian jacques le goff invented purgatory the latin tradition is however in its roots in perfect agreement with the eastern tradition also although in our references we give the greatest space to the greek fathers we will surely cite convergent or complementary teachings and testimonies of the latin fathers and hagiographers of antiquity we hope in this way to make better known to orthodox the teachings of their own often scattered about and poorly known tradition and also to acquaint catholic or protestant readers with teachings unknown to them or which long ago ceased being within the compass of their faith but which nevertheless belong to the rich patrimony of an ancient christian tradition which in its origins is or should be common to all

this book analyses the discourses of orthodox christianity in western europe to demonstrate the emerging discrepancies between the mother church in the east and its newer western congregations showing the genesis and development of these discourses over the twentieth century it examines the challenges the orthodox church is facing in the modern world organised along four different discursive fields the book uses these fields to analyse the orthodox church in western europe during the twentieth century it explores pastoral ecclesiological institutional and ecumenical discourses in order to present a holistic view of how the church views itself and how it seeks to interact with other denominations taken together these four fields reveal a discursive vitality outside of the traditionally orthodox societies that is however only partly reabsorbed by the church hierarchs in core orthodox regions like southeast europe and russia the orthodox church is a complex and multi faceted global reality therefore this book will be a vital guide to scholars studying the orthodox church ecumenism and religion in europe as well as those working in religious studies sociology of religion and theology more generally
