this book deals with curriculum issues and problems and one of its aims is to help practising teachers to clarify their own theory and practice in relation to the curriculum the contributors look at three popular theories or sets of assumptions held by teachers the child centred view of education the subject centred or knowledge centred view and the society centred view each of these views is incomplete on its own but each has something to contribute in planning a curriculum as a whole and the authors emphasize that a comprehensive theory of curriculum planning would take into account the individual nature of the pupil and also recognize the social value of education this kind of comprehensive curriculum planning has been described as the situation centred curriculum based on the idea that schools should be concerned with preparing the young for the world as it will be when they leave school one of the purposes of education is to develop a child s autonomy he or she must learn to cope with the variety of situations which will face him or her in society thus many different approaches must be employed in establishing a basis for the complex task of curriculum planning the book draws on the disciplines of philosophy psychology history and sociology to suggest new approaches to curriculum objectives and evaluation it considers the theoretical bases of curriculum models practical issues of planning evaluation and pedagogy and discusses some urgent contemporary questions about the politics and control of the curriculum

studies of shakespeare and politics often ask the question whether his dramas are on the side of aristocratic or monarchical sovereign authority or are on the side of those who resist whether he endorses a standard view of male and patriarchal authority or whether his cross

dressing heroines put him among feminist thinkers scholars also show that shakespeare s representations of rule revolt and arguments about laws and constitutions draw on and allude to stories and real events that were contemporaneous for him as well as historical ones building on scholarship about shakespeare and politics this book argues that shakespeare s representations and stagings of political power sovereignty resistance and controversy are more complex the merits of political life as opposed to life governed by monetary exchange religious truth supernatural power military heroism or interpersonal love are rehearsed in the plots and the clashing and contradictory meanings of politics its association with free truthful speech but also with dishonest hypocrisy with open action and argument as much as occult behind the scenes manoeuvring are dramatized by him to show that although violence lies and authoritarianism do often win out in the world there is another kind of politics and a political way that we would do well to follow when we can the book offers original readings of the characters and plots of shakespeare s dramas in order to illustrate the subtlety of his pictures of political power how it works and what is wrong and right with it

in this new volume gavin walker attempts to open a conversation between sociology and jungian psychology both often overlooked by each other through a series of wide ranging essays this book provides a jungian counterpoint to the more accepted freudian perspective in sociology by engaging with several key themes including race gender urban sociology religion and the environment the chapters here consider methodological issues such as how jungian psychology might contribute to our understanding of human nature and jung s and sociology s complex and manylevelled relationship with anthropology as a whole this unique work provides an open ended exploration of what sociology includes and excludes from its agenda and asks how engagement with jung might shift the centre of gravity of a heterogeneous

discipline psyche science and society will be of interest to academics and students working in the fields of analytical psychology and sociology as well as psychoanalysis anthropology feminism environmentalism comparative religion and the history of science
