1975

once the rarified stuff of scientists and statisticians data are now at the heart of our global digital economy transforming everything from how we perceive the value of a professional athlete to the intelligence gathering activities of governments we are told that the right data can turn an election help

predict crime improve our businesses our health and our capacity to make decisions beginning with a simple question how do most people encounter and experience data nathaniel tkacz sets out on a path at odds with much of the contemporary discussion about data when we encounter data he contends it is often in highly routinised ways through formatted displays and for specific cognitive tasks what data are and can do is largely a matter of how they are formatted to understand our datafied societies we need to turn our attention to data s formats and the powers of formatting this book offers an account of one such format the dashboard from their first appearance with the horse and carriage tkacz guides readers on the historical development of this format through analyses of car dashboards early managerial dashboards and the gradual emergence of dashboards as a computer display technology tkacz shows how today s digital dashboards came to be and how their cultural history conditions the present highly original and wide ranging this book will change how you think about data

## **A Brief Introduction to Psychology**

1977-01-01

although little known today raymond ruyer was a post world war ii french philosopher whose works and ideas were significant influences on major thinkers including deleuze guattari and simondon with the publication of this translation of neofinalism considered by many to be ruyer s magnum opus english language readers can see at last how this seminal mind allied philosophy with science unfazed by the idea of philosophy ending where science began ruyer elaborated a singular nearly unclassifiable metaphysics and reactivated philosophy s capacity to reflect on its canonical questions what exists how are we to account for life what is the status of subjectivity and how is freedom possible ha neofinalism offers a systematic and lucidly argued treatise that deploys the innovative concepts of self survey form and absolute surface to shape a theory of the virtual and the transspatial it also makes a compelling plea for a renewed appreciation of the creative activity that organizes spatiotemporal structures and makes possible the emergence of real beings in a dynamic universe

## **Current Catalog**

1993

the biographical dictionary of psychology provides biographical information and critical analysis of the influences and reception of over 500 people who have made a significant contribution to the field of psychology written by an international team of contributors this volume charts the development of the

practice of psychology worldwide from its emergence in the 1850s up to the present day biographies range from important historical figures to those who have had a more recent impact on the field including chris argyris donald broadbent kay deaux leon festinger sigmund freud erich fromm francis galton eleanor gibson doreen kimur ulric neisser jean piaget herbert a simon b f skinner amos tversky entries are alphabetically organized and similarly structured for ease of access and allowing comparison of information introductory biographical details cover main fields of interest nationality principal appointments honours and places and dates of birth and death this is followed by full bibliographic details of principal publications as well as secondary and critical literature which provide a useful route into further research following on from there is an invaluable critical appraisal of the major achievements influences and reception of the psychologists themselves thorough indexing allows the reader to access information by american psychological association subject division key concepts name and institution
