the potential threat posed by leonid meteroids to
orbiting spacecraft over the next several years
calls for new dynamic mitigation strategies to
assist the satellite community in reducing the
danger to its vehicles this book offers deliberate
dynamic mitigation strategies to complement the
traditional shielding strategies providing mission
operators additional ways to decrease the danger
five different attitude control and orbit
maneuvering options are examined in detail the
information is presented in algorithmic form to
allow technically competent but meteoroid
inexperienced operators to easily understand the
phenomena assess the danger and implement
procedures although general in scope the book
emphasizes the leonid meteor events of the 1998
2002 timeframe
