(Free Sample) Comprehensive Guide to BITSAT Online Test with Past Solved Papers & 90 Online Mock Tests 12th edition 2005-09-01 observations plus recipes it has been said that science is the orderly collection of facts about the natural world scientists however are wary of using the word fact fact has the feeling of absoluteness and universality whereas scientific observations are neither absolute nor universal for example children have 20 deciduous baby teeth is an observation about the real world but scientists would not call it a fact some children have fewer deciduous teeth and some have more even those children who have exactly 20 deciduous teeth use the full set during only a part of their childhood when they are babies and toddlers children have less than 20 visible teeth and as they grow older children begin to lose their deciduous teeth which are then replaced by permanent teeth children have 20 deciduous baby teeth is not even a

complete scientific statement for one thing the statement children have 20 deciduous teeth does not tell us what we mean by teeth when we say teeth do we mean only those that can be seen with the unaided eye or do we also include the hidden unerupted teeth an observation such as children have 20 deciduous teeth is not a fact and by itself it is not acceptable as a scientific statement until its terms are explained scientifically children have 20 deciduous teeth must be accompanied by definitions and qualifiers
