12 VARSH VAAR CTET Paper 1 Solved Papers (2011 - 2019) - Hindi Edition 2015 the uk s 347 000 kilometre network of sewers and 9 000 sewage treatment works fulfil the vital function of managing over 11 billion litres of waste water each day changing weather patterns and population growth are leading to increased volumes of waste water in some parts of the country in coming years there will be a need to construct new infrastructure to manage waste water in particular new infrastructure is needed in the river thames area to cope with population growth and to meet the european union s environmental requirements but the draft national policy statement nps on waste water needs radical improvement if it is to provide a valuable policy framework

to guide decision makers the committee criticise the draft national policy statement for focussing on two specific london projects the thames tunnel and replacement of a sewage treatment works in north east london they argue that it should set out a strong set of general principles for decision makers to apply to any waste water project once a specific application is made rather than have site specific sections the planning act 2008 s new regime for nationally significant infrastructure nsips does not currently apply to the thames tunnel project a surprising omission given that this multi billion pound project is one of only two waste water projects likely to be of sufficient scale to come within the ambit of this nps the government must rectify this urgently
