successful metropolitan economies do not spring forth spontaneously the values norms and institutions that shape social relationships are national attributes the preconditions for the creation of wealth the rule of law public education and sound macroeconomic management among the most fundamental are the responsibility of the state by considering national fiscal and monetary policies and state policies governing the organization of cities this book disentangles two processes the mechanics of creating wealth and the mechanics of agglomeration or capturing wealth polèse explains the two stage process in which the proper conditions must first be in place for the benefits of agglomeration to fully flower polèse interweaves evocative descriptions of various cities contrasting cities that have been helped or hurt by local and national policies wise or ill advised from new york to vienna buenos aires to port au prince the cities come to life throughout the book polèse highlights four factors that help explain strengths and weaknesses of cities as foci of economic opportunity and social cohesion institutions people centrality and chance the result is a nuanced and accessible introduction to the economy of cities and an original perspective on what needs to improve cities that have managed to produce livable urban environments for the majority of their citizens mirror the societies that spawned them similarly cities that have failed are almost always signs of more deep rooted failures if the nation does not work neither will its cities this book is a comprehensive study of the
